Alaska Marijuana Control Board

Operating Plan Supplemental

Form MJ-05: Marijuana Product Manufacturing Facility

Section 4 – Proposed Marijuana Concentrates and Marijuana Products

Review the requirements under 3 AAC 306.520 - 3 AAC 306.525 and 3 AAC 306.560, and identify how the proposed establishment will meet the listed requirements. **Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.**

Product Name:	Bubble Hash
Type:	Marijuana Concentrate

Product Description: Details must include the color, shape, and texture.	Bubble hash can be crumbly and granular or sticky and waxy. It ranges in color from light yellow to green to light brown and is soft and malleable.

Ingredients: This box is not applicable to marijuana concentrates	N/A

Standard Production Procedure and Detailed Manufacturing Process:	Either ground marijuana or whole marijuana flower is put into buckets lined with mesh screens. Ice water or dry ice is then added to the buckets and the mixture is manually agitated. Once the ice melts or the dry ice achieves desired reaction, the screens are removed and the concentrate is manually separated from the screens. The hash is then allowed to air dry.

Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.

Form MJ-05: Marijuana Product Manufacturing Facility

Section 5 – Proposed Product Packaging and Sample Labels

Review the requirements under 3 AAC 306.520 and 3 AAC 306.565 – 3 AAC 306.570, and identify how the proposed establishment will meet the listed requirements. **Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.**

Product Name:	Bubble Hash
Type:	Marijuana Concentrate

Packaging Description: Details must include the color(s), size, packaging materials used, total amount of THC, individual serving sizes (if multiple), and other specifics showing compliance with 3 AAC 306.565. Attached photos, drawings, or graphic representations are preferred.	Bubbble hash will be packaged in small, opaque, heat sealed and child-resistant mylar bags or small silicone or glass containers or blister packaging for sale to retail stores. Bags/containers will contain either .5, 1, 3, 5 or 7 grams of hash. Up to 1 pound of hash will be packaged in large, opaque mylar bags or glass jars with screw top lids for wholesale transactions. THC will range from 20% to 99%.

Sample Labels: Provide sample labels showing how the labeling information required in 3 AAC 306.570 will be set out.	Label will include all of the following clearly and easily displayed on every product: Business Name: License Number: Strain: Batch / Lot Number: Gross Weight: Net MJ Weight: Packaging Date: Expiration Date: Amount of THC: Alaska Safety Warning: Marijuana has intoxicating effects and may be habit forming and addictive. Marijuana impairs concentration, coordination, and judgment. Do not operate a vehicle or machinery under its influence. There are health risks associated with consumption of marijuana. For use only by adults twenty-one and older. Keep out of the reach of children. Marijuana should not be used by women who are pregnant or breast feeding.

AMCO Received 11/8/2019

Section 6 – Proposed Marijuana Concentrates and Marijuana Products

Review the requirements under 3 AAC 306.520, 3 AAC 306.525, and 3 AAC 306.560.
Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.

Product Name:	Butuane Hash Oil (BHO)		
Product Type: Choose one.	Marijuana Concentrate		
Perishable: Yes/No	No	**Shelf Life:** If perishable.	
Intended Use: Smokable/ edible/topical/wholesale/etc.	Smokable		

Product Description: Details must include the color, shape, and texture.	BHO is smooth, hard and brittle when cold and sticky and pliable when warm. The color can range from yellow to amber.
Ingredients:	
Standard Production Procedure and Detailed Manufacturing Process:	The oil is extracted using a closed loop machine using marijuana flower and trim and one or a combination of the following solvents such as: butane, N-butane, Iso-butane, Ethanol. Once the oil extracted, it will either be winterized or placed into a vacuum. The winterization process begins by dissolving the BHO in ethanol and then freezing . The BHO is then filtered using a vacuum and evaporator. Additional cannabis terpenes purchased from licensed facilities or from production run off will be added to BHO.
Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.	
AMCO Received 11/8/2019

Section 7 – Proposed Product Packaging and Sample Labels

Review the requirements under 3 AAC 306.520, 3 AAC 306.565, and 3 AAC 306.570.
Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.

Product Name:	Butane Hash Oil (BHO)
Product Type:	Marijuana Concentrate

Packaging Description:
Details must include the color(s), size, packaging materials used, total amount of THC, individual serving sizes (if multiple), and other specifics showing compliance with 3 AAC 306.565. Please include photos, drawings, or graphic representations.

BHO will be packaged two different ways:

1. In small, opaque, heat sealed and child-resistant mylar bags or blister packaging or small silicone or glass containers for sale to retail stores. Bags/containers will contain either .5, 1, 3, 5 or 7 grams of BHO. Up to 1 pound of BHO will be packaged in large, opaque mylar bags or glass jars with screw top lids for wholesale transaction. THC will range from 20% to 99%.

2. Half and one gram portions of BHO will be packaged into vape cartridges. The total THC will range from 20-99% with the actual amount of THC content listed on the label per testing results. The filled vape cartridge will be placed into an opaque mylar child resistant bag. The mylar bag is then to be placed into a child-resistant exit bag by the retailer before the customer exits the retail store.

Sample Labels:
Provide sample labels showing how the labeling requirements set forth in 3 AAC 306.570 will be met.

Alaska Marijuana Control Board

Form MJ-16: Proposed New Marijuana Product

What is this form?

This proposed new marijuana product form is required for a marijuana product manufacturing facility licensee who is seeking Marijuana Control Board (MCB) approval of a new marijuana product or marijuana concentrate for production at its licensed premises, as required under 3 AAC 306.100 and 3 AAC 306.525. **The required $250 proposed new marijuana product fee may be made by check, cashier's check, or money order.**

This form must be completed and submitted to AMCO's main office prior to production of any new marijuana product or marijuana concentrate. **The proposed new marijuana product may not be produced unless and until the MCB has approved of the product.**

Please note that licensees seeking approval of more than one proposed new marijuana product or marijuana concentrate must submit a separate completed copy of this form and pay a separate fee for each proposed new marijuana product or marijuana concentrate.

Section 1 – Establishment Information

Enter information for the business seeking to be licensed, as identified on the license application.

Licensee:	Will's World, LLC	**MJ License #:**	12536		
License Type:	Marijuana Concentrate Manufacturing Facility				
Doing Business As:	Will's World				
Premises Address:	12151 E palmer-Wasilla Hwy, Unit 1c				
City:	Palmer	**State:**	Alaska	**ZIP:**	99645

Section 2 – Proposed Marijuana Concentrate or Marijuana Product

Enter information for the marijuana concentrate or the marijuana product for which you are seeking MCB approval.

Product Name:	C02 Oil		
Product Type: Choose one.	Marijuana Concentrate		
Perishable: Yes/No	No	**Shelf Life:** If perishable.	
Intended Use: Smokable/ edible/topical/wholesale/etc.	Smokable/Wholesale		

Received 5/13/2020

Form MJ-16: Proposed New Marijuana Product

Section 3 – Proposed Product Details

Enter information for the marijuana product for which you are seeking MCB approval.

Product Description: Details must include the color, shape, and texture.	C02 Oil-filled vape cartridge with a color ranging from clear/light yellow to a dark amber. Oil is viscous in nature. C02 Oil has a "free-form" shape that fits to its container.
Ingredients:	N/A
Standard Production Procedure and Detailed Manufacturing Process:	C02 concentrate will be extracted from flower or trim using an Apeks C02 Extractor with the use of C02. The solution is purged with the use of vacuum oven and/or roto-evaporator under specified conditions to achieve desired consistency. Crude extract will be further purified through the process of distillation, resulting in distillate oil. Additional cannabis terpenes may be added to enhance the product. The mixture is then properly packaged in empty cartridges and stored until testing and sale.
Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.

Section 4 – Proposed Product Packaging and Sample Label

Enter information for the packaging and labeling of the marijuana product for which you are seeking MCB approval.

Packaging Description:
Details must include the color(s), size, packaging materials used, total amount of THC, individual serving sizes (if multiple), and other specifics showing compliance with 3 AAC 306.565. Please include photos, drawings, or graphic representations.

Full Spectrum Extract will be stored in clean and sanitized containers with sealed lids. The total volume and weight of the oil will vary with each batch. Full Spectrum Extract will be tested by a State of Alaska licensed testing facility to determine the percentage of THC and other test parameters. Full Spectrum Extract will be used inside our facility to produce vape cartridges or to be sold wholesale with the intent to be used in other facilities products. Either .5 or 1 gram of Full Spectrum Extract will be offered in Vape Cartridges. The Filled Vape Cartridges will be placed into an opaque mylar child resistant bag or blister pack. The mylar bag or blister pack is then to be placed into an opaque exit bag by the retailer before the customer leaves the retail store THC will range from 20-99% with the actual amount of THC content listed on the label per testing results. THC will range from 20-99% with the actual amount of THC content listed on the label per testing results. Up to five (5) pound of Full Spectrum Extract will be stored in jars for wholesale and in-house use.

*Or similar Color of Product may vary

Sample Labels:
Provide sample labels showing how the labeling requirements set forth in 3 AAC 306.570 will be met.

Section 4 – Proposed Marijuana Concentrates and Marijuana Products

Review the requirements under 3 AAC 306.520 - 3 AAC 306.525 and 3 AAC 306.560, and identify how the proposed establishment will meet the listed requirements. **Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.**

Product Name:	Rosin
Type:	Marijuana Concentrate

Product Description: Details must include the color, shape, and texture.	Rosin is sticky and waxy, somewhat translucent with an amber color. The consistency is similar to sap and is smooth and pliable.

Ingredients: This box is not applicable to marijuana concentrates	N/A

Standard Production Procedure and Detailed Manufacturing Process:	Rosin will be produced via heat and pressure using a hydraulic press with heated metal pressing plates. Marijuana plant material or hash will be placed into mesh bags then placed between parchment paper and onto the press. The heat and pressure will move the rosin out of the nylon bags and onto the parchment paper.

Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.

Alaska Marijuana Control Board

Form MJ-16: Proposed New Marijuana Product

What is this form?

This proposed new marijuana product form is required for a marijuana product manufacturing facility licensee who is seeking Marijuana Control Board (MCB) approval of a new marijuana product or marijuana concentrate for production at its licensed premises, as required under 3 AAC 306.100 and 3 AAC 306.525. **The required $250 proposed new marijuana product fee may be made by check, cashier's check, or money order.**

This form must be completed and submitted to AMCO's main office prior to production of any new marijuana product or marijuana concentrate. **The proposed new marijuana product may not be produced unless and until the MCB has approved of the product.**

Please note that licensees seeking approval of more than one proposed new marijuana product or marijuana concentrate must submit a separate completed copy of this form and pay a separate fee for each proposed new marijuana product or marijuana concentrate.

Section 1 – Establishment Information

Enter information for the business seeking to be licensed, as identified on the license application.

Licensee:	Will's World, LLC	**MJ License #:**	12536		
License Type:	Marijuana Concentrate Manufacturing Facility				
Doing Business As:	Will's World				
Premises Address:	12151 E Palmer-Wasilla Hwy, Unit 1c				
City:	Palmer	**State:**	Alaska	**ZIP:**	99645

Section 2 – Proposed Marijuana Concentrate or Marijuana Product

Enter information for the marijuana concentrate or the marijuana product for which you are seeking MCB approval.

Product Name:	Select Spectrum Extract		
Product Type: Choose one.	Marijuana Concentrate		
Perishable: Yes/No	No	**Shelf Life:** If perishable.	
Intended Use: Smokable/ edible/topical/wholesale/etc.	Smokable/Wholesale

Section 3 – Proposed Product Details

Enter information for the marijuana product for which you are seeking MCB approval.

Product Description: Details must include the color, shape, and texture.	Select Spectrum extract is a viscous liquid with a density similar to honey and is translucent varying in color from yellow to brownish yellow.
Ingredients:	N/A
Standard Production Procedure and Detailed Manufacturing Process:	Cannabis concentrate will be extracted from flower or trim using an Apeks C02 Extractor with the use of C02. The residual solvent in the solution are then purged below regulated ranges using specified pressures and temperatures with the use of pressure vessels and a vacuum oven to achieve the desired consistency and appearance of Select Spectrum Extract.
Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.

Section 4 – Proposed Marijuana Concentrates and Marijuana Products

Review the requirements under 3 AAC 306.520 - 3 AAC 306.525 and 3 AAC 306.560, and identify how the proposed establishment will meet the listed requirements. **Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.**

Product Name:	Shatter
Type:	Marijuana Concentrate

Product Description: Details must include the color, shape, and texture.	Texture is smooth and glass like. Color can range from dark amber to light honey.

Ingredients: This box is not applicable to marijuana concentrates	N/A

Standard Production Procedure and Detailed Manufacturing Process:	The oil is extracted using a closed loop machine or ethanol extractor, using marijuana flower and trim and one or a combination of the following solvents such as: butane, N-butane, Iso-butane, Ethanol. Once the oil is extracted, it will either be winterized or placed into a vacuum. The winterization process begins by dissolving the BHO in ethanol and then freezing . The BHO is then filtered using a vacuum and evaporator. Various heat and temperature applications will result in shatter.

Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.
