Section 3 – On-site Consumption

	Yes	No
Do you plan to request approval of the board with your initial application to permit consumption of marijuana or marijuana product in a designated area on the proposed premises?	☐	☑

If "Yes", describe how you ensure that only marijuana or marijuana products that were purchased at your proposed premises are being consumed, per 3 AAC 306.305(a)(4):

Section 4 – Displays and Sales

Describe how marijuana and marijuana products at the retail marijuana store will be displayed and sold:

All marijuana products will be displayed in locked and secured display cases and cabinets which require employee assistance to access. Product displays will be in full view of a working video surveillance camera at all times that marijuana or marijuana product is stored in the display. Marijuana and marijuana products will be secured in a locked case at all times or hanging or in bins behind the display cases in the restrictive access area. Only marijuana that is packaged and labeled in accordance with all state and municipal laws and regulations, and in accordance with Satori policies, will be placed in product displays and accessed for sale to the public. All employees will be trained and regularly monitored to ensure compliance with the display and closing policies, and that all product is secured and accounted for at all times. Trained agents will be walking around, interacting, and educating customers on the displayed products, and the prices. When customers have made their purchasing decisions, they will then head to the check-out counter. All sell-able edibles, concentrates, and flowers will be stored behind the check-out and display counters. Any edibles that require refrigeration will be stored in a refrigerator, also securely placed behind the counter out of reach of the customers. Flower will be sold either pre-packaged or "Deli" style. "Deli" style flower will be displayed in large glass jars (behind the point of sale counter) with batch labeled strains. Employees will take customer orders at the point of sale counter and weigh the flower behind the counter using a certified scale. Once weighed to the desired amount, the employee will register the purchase in the POS system which integrates with METRC, seal the product into a child-resistant, opaque container, and print the packaging label. Any non-marijuana inventory will be stored in bins on the shelves, on hooks against the back wall, or out on the shopping floor in a separate display case.
