Board members,|

Per my April meeting public comment, I want to express support for changes in 3 AAC 306.760 for trade show sample sizes. I have participated in multiple trade shows and feel strongly that if we are to be trusted on a daily basis to handle large quantities of marijuana and marijuana products that we can extend that trust at tradeshows. Currently regulations only allow for one ounce of marijuana flower to be transferred to tradeshows. However, once you have a couple strains you would like to showcase, this division of one ounce quickly becomes very little per strain. I feel we as an industry we have shown we are trustworthy individuals who only want to uphold the laws and regulations.

With that said, I ask that you allow transfer of up to one ounce of marijuana flower per strain for trade shows. 28 grams truly allows us to showcase our flower and its structure. This would be following suit with (d) of AAC 306.760 Trade Shows: which states “A licensed product manufacturing facility and a licensed retail facility may bring one sample package of each marijuana product made or sold by the facility to the event for display.” I believe we should be able to do this with flower as well. The different “products” being the different strains each cultivator cultivates, or retailer sells. I feel this small change to regulations would make trade shows more industry friendly and demonstrate the trust the board already places in licensees.

Thank you for your consideration,

Best Regards,

Bailey Stuart
