Alaska Marijuana Control Board

Operating Plan Supplemental

Form MJ-05: Marijuana Product Manufacturing Facility

What is this form?

This operating plan supplemental form is required for all applicants seeking a marijuana product manufacturing facility license and must accompany the **Marijuana Establishment Operating Plan (Form MJ-01)**, per 3 AAC 306.020(b)(11). Applicants should review **Chapter 306: Article 5** of the **Alaska Administrative Code.** This form will be used to document how an applicant intends to meet the requirements of those regulations. If your business has a formal operating plan, you may include a copy of that operating plan with your application, but all fields of this form must still be completed per 3 AAC 306.020 and 3 AAC 306.520(3).

What additional information is required for product manufacturing facilities?

Applicants must identify how the proposed establishment will comply with applicable regulations regarding the following:

- Prohibitions
- Equipment, compounds, and processes to be used
- Proposed marijuana concentrates and marijuana products
- Proposed product packaging and sample labels
- Waste disposal plan
- Testing

This form must be submitted to AMCO's main office before any marijuana product manufacturing facility license application will be considered complete.

Section 1 – Establishment Information

Enter information for the business seeking to be licensed, as identified on the license application.

Licensee:	ISG, Inc.	**License Number:**		12315	
License Type:	Marijuana Product Manufacturing Facility				
Doing Business As:	EVERGREEN EXTRACTS				
Premises Address:	5011 Short Street, Suite 2				
City:	Juneau	**State:**	ALASKA	**ZIP:**	99801

Alaska Marijuana Control Board

Operating Plan Supplemental

Form MJ-05: Marijuana Product Manufacturing Facility

Section 2 – Prohibitions

Applicants should review 3 AAC 306.510 and be able to answer "Agree" to all items below.

The marijuana product manufacturing facility will not:	Agree	Disagree
Sell, deliver, distribute, or transfer any marijuana, marijuana concentrate, or a marijuana product directly to a consumer, with or without compensation	✓	☐
Allow any person, including a licensee, employee, or agent, to consume marijuana, marijuana concentrate, or a marijuana product on its licenses premises	✓	☐

The marijuana product manufacturing facility will not manufacture or sell any product that:	Agree	Disagree
Is an adulterated food or drink	✓	☐
Closely resembles a familiar food or drink item including candy	✓	☐
Is packaged to look like candy, or in bright colors or with cartoon characters or other pictures or images that would appeal to children	✓	☐

Section 3 – Equipment, Compounds, and Processes to be Used

Review the requirements under 3 AAC 306.555, and identify how the proposed premises will meet the listed requirements.

Describe the equipment and solvents, gases, chemicals, and other compounds the marijuana product manufacturing facility will use to create marijuana concentrates:

Equipment:
Hydraulic Rosin press 20,000 psi
parchment paper
micron bags

Phone: 907.269.0350

Alaska Marijuana Control Board

Operating Plan Supplemental

Form MJ-05: Marijuana Product Manufacturing Facility

Describe the processes to be used to create marijuana concentrates:

Evergreen Extracts will be using Rosin press extraction method to create marijuana concentrates. Unlike extracts like butane hash oil (BHO), which utilizes solvents, heavy equipment, and time-consuming processes to extract the resin from the plant, rosin production requires only two mechanisms: heat and pressure. At the center of rosin production is the press, a machine responsible for producing controlled amounts of heat and pressure over short periods of time. When you press the cannabis flower between the machine the oil is removed from the plant material and is then made available for collection.

Ice water extraction is a solventless process that uses ice, water and agitation to remove the trichomes from the marijuana plant material. The water with the extracted trichomes is then put through several screens of varying micron sizes to remove small plant particulates. The concentrates from the 25, 73 and 90 micron bags is then dried for use.

Section 4 – Proposed Marijuana Concentrates and Marijuana Products

Review the requirements under 3 AAC 306.520 - 3 AAC 306.525 and 3 AAC 306.560, and identify how the proposed establishment will meet the listed requirements. **Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.**

Product Name:	Evergreen Extracts Cannabis Hard Candy Pops "Perseverance Pops" Assorted Flavors
Type:	Marijuana Product

Product Description: Details must include the color, shape, and texture.	Evergreen Extracts Cannabis Hard Candy Pops "Perseverance Pops" are a marijuana edible product. They are light yellow, red, green or Blue in color and are slightly translucent. Each hard candy pop will be round with the dimensions measuring 1 inch in diameter, The hard candy has a three inch cardboard pop stick. The texture is smooth on the outside and the candy is considered "Hard ball" in the candy making stage. (Estimated shelf life 1 year)

Ingredients: This box is not applicable to marijuana concentrates	Organic White Sugar Lite Corn Syrup Water lecithin Organic coconut oil Organic Lemon, Lime, fruit punch, sour apple, blue raspberry flavor oil Organic Powdered sugar Malic Acid (Vitamin C) Rosin Hash Oil

Standard Production Procedure and Detailed Manufacturing Process:	The Standard Production Procedure to create the Cannabis Hard Candy consists of combining the ingredients in a metal pot and cooking them to the desired temperature. The concentrates are added to the hot mixture and stirred to incorporate them evenly. The hard candy is then poured into molds and cooled in a fridge. After the candy is completely cooled the candy is removed from the molds and then packaged.

Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.

Product Name:	Evergreen Extracts Rosin Hash Oil
Type:	Concentrate

Product Description: Details must include the color, shape, and texture.	Golden amber in color and translucent. It is very sticky and viscous.

Ingredients: This box is not applicable to marijuana concentrates	

Standard Production Procedure and Detailed Manufacturing Process:	Bubble Hash, Kief or cannabis flower is place between two pieces of parchment paper. The paper is placed between the heated hydraulic press plates. The press is activated and the immense pressure and low heat pushes the oil out and away from the plant material allowing the press operator to collect it. The oil is collected using a silicone dab pad.

Form MJ-05: Marijuana Product Manufacturing Facility

Section 6 – Waste Disposal Plan

Review the requirements under 3 AAC 306.520, and identify how the proposed premises will meet the listed requirements.

Describe the marijuana product manufacturing facility's plan for disposal of any expired or outdated marijuana or marijuana product that is not sold or transferred to another licensed marijuana establishment:

All Expired or outdated marijuana or marijuana product that is not sold or transferred to another licensed marijuana establishment will be processed in a commercial composter until it is no longer considered a marijuana product and rendered unusable. AMCO enforcement will be notified no more than 3 days prior to rendering the marijuana or marijuana product unusable. The waste will be kept in locked containers, separate from other product until it can be rendered unusable and composted.
