In as much as I reside in immediate proximity to the proposed facility I have reservations about it's establishment.
The business in question is at the head of af narrow street and even now is the cause of traffic congestion since visitors park in the street as little else is available to them. Considering also that construction has begun for a B&B at this address (per the property owner, Michael Penrod) it will only exacerbate that congestion problem and attendant safety concerns. Since Marijuana has been consumed there already it is beyond reason to assume that w/ an abundance grown there that it would cease, rather more would be consumed to the detriment of the preschool age children living at that residence
& the neighborhood as a whole.
Taking the youthfulness of the applicants, the volitility of their intended product and the afore mentioned concerns in hand it is obvious that this establishment will be neither beneficial nor benign for those nearby, therefore I strongly urge you to deny their application.

Sincerely,

Gary Jefferson
