This is a notice to you as a licensee that you are being issued a notice of violation for the purposes described in 3 AAC 306.806(e). A description of the violation is as follows,
NOTE: This is not an accusation or criminal complaint.

On 05/28/2025 AMCO Investigator Linger condicted an inspection of your cultivation facility, The Hash Frontier Gardens, License #28104, located at 3662 S Hillrise Circle,Wasilla, AK 99654. Licensee, Joseph Giliam, was present for the inspection. During the inspection it was discovered that no plants in the facitlity were tagged with the required METRC tags.

Flower Room - Metrc showed a total of 134 plants in the flower room. There were only 56 plants physically present, which had no plant tags. Giliam stated they had harvested the room approximately 7-10 days prior to the inspection. The harvest was not updated in METRC. When asked about tagging plants, Gilliam stated they have not tagged any plants in their cultivation for about two months. The next room was the Veg Room. There were no plant tags on any plants or batch tags to identify plant batches. Plant batches had 35 plants that were well over 18 inches tall, and an additional 73 individual plants that hadn't been tagged for 108 total plants requiring METRC tags. When asked to see his Marijuana Handler Permit, Giliam could not locate it. He called his wife who was at their retail store in Anchorage. Giliam's wife had his handler permit in the store and showed it to me on a facetime call. His handler permit is valid. Giliam was honest when answering questions, but had multiple excuses for the causes of the violations. This is a total of 484 violations of 3AAC 306.410, and 3AAC 306.435(a); 242 each respectively, and 1 violation of 3AAC 306.425.

This is in violation of:
3 AAC 306.410. Limited marijuana cultivation facility: privileges and prohibited acts.
A licensed limited marijuana cultivation facility
(1) has the privileges set out in 3 AAC 305.405(a) and (b), except that it must have fewer than 500 square feet under cultivation; and
(2) is subject to each prohibition set out in 3 AAC 306.405(c).

3 AAC 306.435. Marijuana inventory tracking system.
(a) A marijuana cultivation facility shall
(1) use a marijuana inventory tracking system in compliance with 3 AAC 306.730 to ensure all marijuana propagated, grown, or cultivated on the marijuana cultivation facility's premises is identified and tracked from the time the marijuana is propagated through transfer to another licensed marijuana establishment, including when marijuana or marijuana product is
(A) relocated to a new licensed premises in the case of a transfer of a marijuana establishment license to another location approved by the board; or
(B) destroyed;
(2) assign a tracking number to each

The Hash Frontier Gardens
Wasilla, AK
License #28104

Dear Marijuana Control Board & AMCO Enforcement,

In regards to our recent NOV on May 28th, 2025. We would like to provide the Board with a written response that addresses the remedial measures we will take to fix the issue.

We opened our new retail store one year ago 60 miles away from our Garden with a very small team in order to just keep our heads above water in this industry. We are as small as it gets, a limited cultivation ran out of our home, we do everything by hand; it's just my husband and I and a very small team at our retail store. We just had to reduce our hours at the retail store to even keep our doors open, we're dealing with major staffing issues just like many small businesses nationwide.

This is our very first violation in over 3 years. We will take the steps necessary to solve the issues that were brought up during the investigation. We are only human and make mistakes just like everybody.

In the flower room there was only 56 plants that physically did not have the metrc plant tags hung. However, those 56 plants were assigned tags in metrc. They simply just did not have those tags hanging on the plant or in the pot. The physical tags were within about 30 ft. from the plants. These plants were scheduled to be destroyed due to a pollen contamination issue in our flower room resulting in seeded & unsellable buds. That is the reason the physical tags were never hung from the plants. We fell behind due to severe staffing shortage and apologize for not having the physical tags hanging when investigator Linger came on 5/28.

The remaining 134 plants in the flower room had physical plant tags hung with their assigned metrc tag prior to 5/18 when they were harvested. We just didn't update the harvest into metrc yet to reflect that. We will be sure moving forward to update a harvest into metrc within 24 hours

In reference to response Joe made "plants in our cultivation had not been tagged for two months" the question was asked by linger: "how long has it been since you tagged the plants?" in Veg room and Joe meant, that was the last time he physically performed the act of hanging plant tags, not the last time the plants had tags hung on them. The last time the plants had tags hung on them was on 5/18 when 4 strains were harvested. We admit we fell behind in logging the harvest in Metrc. They were logged in Metrc on 5/29.

The 35 Veg room plants that were "well over 18 inches" should have had metrc tags and we apologize. Plants at this growth stage grow very fast and were just under the limit a couple weeks prior. We fell behind and before we know it they had grown 1 ft. The additional 73 individual plants mentioned were within 6" of the 18" limit and reaching for the lights. We for some reason thought the board was changing the regs on this to require veg plants tagged once they move over to flower stage, which would really help cultivators be efficient; due to the percentage of some grows veg plants never making it to flower.

So in grand total we are referring to 164 physical plants in total present the time of the inspection that did not have tags (56 of them only physically did not, electronically they did).

The rest of the NOV is administrative/clerical errors that will be solved by devoting more time and manpower to METRC.

Joseph did have a photocopy (photo) of his Marijuana Handler Card that was provided to investigator Linger on 5/28 during the initial investigation**. *According to 3AAC 306.425*** *(2) has the marijuana handler permit card in the person's immediate possession, or a valid copy on file on the premises, at all times while on the Marijauana cultivation facility's licensed premises.*

Investigator Linger was not aware of this reg during the investigation, and had to confirm that was acceptable after the initial inspection. Upon confirmation, he agreed it was acceptable.

In licensees case like us, where we have two facilities that are not connected, this should be a more well known Reg by the enforcement team. We are required to keep track of hundreds of different regulations and even the people enforcing the regulations aren't capable of knowing every single regulation word for word.

We will keep a copy of this reg and photocopy of our MJ Handler Cards on file moving forward

As soon as Investigator Linger left we immediately had all the plants tagged and Metrc updated. During the re-inspection on following Monday, Investigator Linger passed us with zero issues and was impressed with the work we did to get on top of the problem so fast. We went above and beyond for the re-inspection to prove our commitment to being compliant licensees. Some days we leave our home (Garden) and cant make it back until after Midnight, just to try and keep ourselves from drowning so we can keep paying taxes and contributing to this industry.

Thank you,

Dana & Joseph Giliam
