Alaska Marijuana Control Board

Operating Plan Supplemental
Form MJ-04: Marijuana Cultivation Facility

What is this form?

This operating plan supplemental form is required for all applicants seeking a marijuana cultivation facility license and must accompany **Form MJ-01: Marijuana Establishment Operating Plan**, per 3 AAC 306.020(b)(11). Applicants should review **Chapter 306: Article 4** of the **Alaska Administrative Code.** This form will be used to document how an applicant intends to meet the requirements of the statutes and regulations.

If your business has a formal operating plan, you may include a copy of that operating plan with your application, but all fields of this form must still be completed per 3 AAC 306.020 and 3 AAC 306.420(2).

What additional information is required for cultivation facilities?

Applicants must identify how the proposed establishment will comply with applicable regulations regarding the following:

- Prohibitions
- Cultivation plan
- Waste disposal
- Odor control
- Testing procedure and protocols
- Packaging and labeling

This form must be completed and submitted to AMCO's main office before any new or transfer application for a standard marijuana cultivation facility or limited marijuana cultivation facility license will be considered complete.

Section 1 – Establishment Information

Enter information for the business seeking to be licensed, as identified on the license application.

Licensee:	POTTER'S HARVEST, LLC.	**MJ License #:**		16181	
License Type:	LIMITED MARIJUANA CULTIVATION FACILITY				
Doing Business As:	POTTER'S HARVERST, LLC.				
Premises Address:	4123 S. GON FISHIN DRIVE				
City:	WASILLA	**State:**	Alaska	**ZIP:**	99687

Form MJ-04: Marijuana Cultivation Facility Operating Plan Supplemental

Section 2 – Overview of Operations

2.1. Provide an overview of your proposed facility's operations. Include information regarding the flow of marijuana from seed or clone to harvest and transfer from your premises:

Upon inspection, our seed banks will be organized into strain-specific packages, containing less than fifty seeds each, grouped and packaged in METRC, and will be tracked by and through their assigned package tag, until unpackaged and planted. Clones and seedlings will be in segregated into strain specific groups of less than fifty, physically, and within METRC. We will use clone charts, clone maps, and/or other internal procedures to ensure accountability and tracking of clones and seedlings. Once clones have reached 8" in height, they will be assigned an individual Plant ID tags within METRC, and their growth phase will be changed to vegetative. All vegetative plants will be assigned individual plant tags, which will be used to track them through to harvest. When a plant changes physical location (rooms) or growth phases, it will be tracked through plant logs and/or other internal tracking and communication documents, and will be updated in METRC. When the plants are harvested, strain specific harvest batches will be made from plants harvested on the same day. Wet waste (drying) will be logged on internal tracking forms as well as in METRC. Plant waste (root balls, stalks, leaves) will be deducted from the harvest batch within METRC and AMCO will be notified 3 days in writing before rendering unusable. Packages of Bud and Trim will be made from the harvest batch, and dry waste will be logged through internal tracking forms, through METRC, and reported to AMCO as set forth above. Each package will have a representative sample submitted, from the same package, for testing. After testing results from this "related package" has cleared testing, additional packages will be made from that package to fulfill wholesale or retail orders, which will then be tracked as they are transferred from our facility, physically, and within METRC.

We will further select homogeneous samples from our limited cultivation facility for random testing during our growing cycles in order to ensure the highest of quality of standards are met. See Cont'd Response.

Section 3 – Prohibitions

Review the requirements under 3 AAC 306.405 and 3 AAC 306.410.

3.1. I certify that the marijuana cultivation facility will not: Initials

a. **sell, distribute, or transfer any marijuana or marijuana product to a consumer, with or without compensation;** JC

b. **allow any person, including a licensee, employee, or agent, to consume marijuana or marijuana product on the licensed premises or within 20 feet of the exterior of any building or outdoor cultivation facility; or** JC

c. **treat or otherwise adulterate marijuana with any organic or nonorganic chemical or compound to alter the color, appearance, weight, or odor of the marijuana.** JC

Section 4 – Cultivation Plan

Review the requirements under 3 AAC 306.420 and 3 AAC 306.430.

4.1. Describe the size of the space(s) the marijuana cultivation facility intends to be under cultivation, including dimensions and overall square footage. Provide your calculations below:

The area under cultivation will be one room with the following areas under cultivation as follows:

Four grow tables each: 4' x 8' at 32 sq. ft. each for a total of 128 sq. ft.

&

Two grow tents each: 4' x 8' at 32 sq. ft. each for a total of 64 sq. ft.

Total grow area under cultivation = 192 sq. ft.

See corrected MJ-02 filed herewith.

Form MJ-04: Marijuana Cultivation Facility Operating Plan Supplemental

You must be able to certify the statement below. Read the following and then sign your initials in the box to the right: Initials

4.2. The proposed area(s) for cultivation are clearly identified on the Form MJ-02: Premises Diagram that is submitted with this application. JC

Answer "Yes" or "No" to the following question: Yes No

4.3. Will the marijuana cultivation facility include outdoor production? ☐ ☒

If "Yes", describe the outdoor structure(s) or the expanse of open or clear ground and how it is fully-enclosed by a physical barrier:

n/a

4.4. Describe the method(s) used to ensure that any marijuana at the marijuana cultivation facility, whether indoors or outdoors, cannot be observed by the public from outside the facility:

This is a completely indoor limited cultivation facility. All marijuana is blocked from the public viewing. There are no windows that are not covered/blocked and the doors have no windows including the garage door. No marijuana will be viewable by the public at all.

4.5. Describe the marijuana cultivation facility's growing medium(s) to be used:

Soil growing facility will use the following: Roots Original Organic Potting Soil; Roots Organic Formula 707; Roots Organic Green Fields; Green Lite; Royal Gold Mendo Mix; Royal Gold Coco Fiber; Royal Gold King's Mix; Royal Gold Tupur; Royal Gold Basement Mix; AllPursose Pro-Mix; Pro-Mix HP Mycorrhizae; Pro-Mix BX; Premier Tech Pro-Mix BX Mycorrhizae and Black Gold.

4.6. Describe the marijuana cultivation facility's fertilizers, chemicals, gases, and delivery systems, including carbon dioxide management, to be used:

No CO2 will be used.

(MICROBE Life)-Company
1.) Microbe Life All in One- Nitrogen, Phosphate, Soluble Potash, Magnesium, Sulfur, Cobalt, Copper, Iron, Manganese, Zinc, De-ionized water, Glomus aggrefatum, Glomus etunicatum, Glomus intraradices, Glomus Mosseae.
2.) Microbe Life Dechlorinator H- Sodium Thisulfate, De-ionized water.
3.) Microbe Life Foliar Spray and Root Dip- Water, Beneficial endo & ecto mycorrhizal.
4.) Microbe Life Growth Accelerator- Active Components, Water, Beneficial endo and ecto mycorrhizal.
5.) Microbe Life Iron Supplement- Active Components are proprietary, Water
6.) Microbe Life Lawn Conditioner/Sod Starter- Active Components, water, Beneficial endomycorrhizal, other ingredients (non- hazardous liquid organic substrate)

Response to Question 4.6 Continued:

Raw

1.) Raw B-Vitamin- Magnesium Sulfate Thiamine Mononitrate (soluble Granular Crystals)
2.) Raw Calcium/Mag- Calcium Nitrate magnesium sulfate (soluble/ Crystals)
3.) Raw Humic Acid- Potassium Salt of Humic Acids (soluble Flakes)
4.) Raw ominA- Amino Acids
5.) Raw Bloom- Amino Acid, Ascophyllum Nodosum, Cane Molasses, Humates, Magnesium Sulfate, Mono Potassium Phosphate, Potassium Salts of humic Acids, Silicon Dioxide, Sulfate of Potash, Yucca Schidigera Extract (Soluble Granular/ Powder)
6.) Raw Cane Molasses- Cane Molasses (Soluble Powder/Crystals)
7.) Raw Grow- Amino acid, Ascophyllum Nodosum, Cane Molasses, Humates, Magnesium Sulfate, Mono Potassium Phosphate, Potassium Salts of Humic Acids, Silicon Dioxide, Sulfate of Potash, Yucca Schidigera Extract (soluble Granular/ Powder)
8.) Raw Kelp- Ascophyllum Nodosum (soluble/Crystals)
9.) Raw Nitrogen- Ammonium Sulfate (soluble Granular/ Crystals)
10.) Raw Silica- Silicon Dioxide (Flowable Powder)
11.) Raw Yucca- Yucca Schidigera Extract (soluble Powder)

Reforestation Technologies International

1.) Xtreme Gardening Mykos WP- Rhizophagus intraradices, Hydrated Silica, Calcined Clay
2.) Xtreme Gardening Azos- Powdered Cellulose, Azosprillum Brasilense
3.) Xtreme Gardening Kryptomite- Water, Potassium Sorbate, Ascorbic Acid, Potassium Bicarbonate, Quillaja Saponaria, Sodium Bicarbonate, Lauric Acid
4.) Xtreme Gardening Tea Brews- Worm Case
5.) Xtreme Gardening Mykos Root Paks- Rhizophagus Intraradices, Hydrated silica, Calcined Clay: See attached continued response.
6.) Xtreme Gardening Mykos mycorrhizal inoculant- Rhizophagus intraradices, Hydrated Silica, Calcined Clay
7.) Xtreme Gardening CalCarb- Precipitated Calcium Carbonate

Mammoth P

1.) Mammoth P- Bacterial Culture, Pelletized alfalfa, Water

Bloom Advanced Nutrients Floriculture

1.) Bloom Seaweed- Cold composted kelp.
2.) Bloom Cal-Mag- Calcium nitrate, magnesium nitrate, chelated iron and chelated zinc.
3.) Bloom Euro A- Chelated macro and micro trace elements, fulvic acid and vitamins
4.) Bloom Euro B- Chelated macro and micro trace elements, fulvic acid and vitamins

4.7. Describe the marijuana cultivation facility's irrigation and waste water systems to be used:

All marijuana plants will be hand watered. All plants will have catchment trays under them so as to catch any overflow that may occur. That water will then be reabsorbed back by the plants. Normal evaporation will also occur. Any waste water that may exist will be disposed through the septic system or contained within a container so that it may later be used upon the lawn or within the garden.

Section 5 – Waste Disposal

Review the requirements under 3 AAC 306.740.

You must be able to certify the statement below. Read the following and then sign your initials in the box to the right: Initials

5.1. The marijuana cultivation facility shall give the board at least three days written notice required under 3 AAC 306.740(c) before making marijuana waste unusable and disposing of it. JC

5.2. Describe how you will store, manage, and dispose of any solid or liquid marijuana waste, including wastewater generated during marijuana cultivation, in compliance with any applicable laws. Include details about the material(s) you will mix with ground marijuana waste and the processes that you will use to make the marijuana waste unusable for any purpose for which it was grown:

Solids:

Marijuana waste consisting of leaves, root balls, stems, branches etc. will be stored in a refuse collection container(s) within the licensed premises grow area. When time comes for disposal, after giving AMCO at least three days written notice before rendering the marijuana unusable and disposing of it, all marijuana waste will be mixed and mulched with household garbage consisting of paper and food products in a 50/50% ratio and made unusable. Once this is done, the mulched material will be either reused again if possible in home gardens etc. or disposed of via Alaska Waste, or within the local landfill, but again only after giving AMCO three days written notice of intent to do same.

Liquids:

All marijuana plants will be hand watered. Little if any waste water is expected to occur. All plants will have catchment trays under them so as to catch any overflow that may occur. That water will then be reabsorbed back by the plants. Normal evaporation will also occur. Any waste water that may exist will be disposed through the septic system or contained within a multi-gallon container so that it may later be used upon the lawn or within the garden. Liquids may be disposed of as well at the local landfill local collection site should there be any pursuant to their regulations.

Section 6 – Odor Control

Review the requirements under 3 AAC 306.430.

Answer "Yes" or "No" to the following question:	Yes	No
6.1. Have you received an exemption from your local government for the odor control requirement set forth in 3 AAC 306.430(c)(2)?	☐	☒

If "Yes", you must be able to certify the statement below. Read the following and then sign your initials in the box:	Initials
I am attaching to this form documentation of my odor control exemption from the local government. N/A	☐

If "No" to question 6.1., describe the odor control method(s) to be used and how the marijuana cultivation facility will ensure that any marijuana at the facility does not emit an odor that is detectable by the public from outside the facility:

Canister style, activated carbon filters will be utilized in conjunction with ducted fans within the proposed cultivation facility to prevent any marijuana odor from being detected by the public. This will keep all smell/odor from being detected outside of the premises. Ozone generator may also be used if determined to be necessary.

Section 7 – Testing Procedure and Protocols

Review the requirements under 3 AAC 306.455 and 3 AAC 306.465.

You must be able to certify each statement below. Read the following and then sign your initials in the corresponding box:	Initials
7.1. I understand and agree that the board or director will, from time to time, require the marijuana cultivation facility to provide samples of the growing medium, soil amendments, fertilizers, crop production aids, pesticides, or water for random compliance checks.	JC
7.2. I will ensure that any individual responsible for collecting random, homogenous samples for required laboratory testing under 3 AAC 306.455 will prepare the necessary accompanying signed statement, provide the signed statement to the marijuana testing facility, and maintain a copy as a business record under 3 AAC 306.755.	JC

7.3. Describe the testing procedures and protocols the marijuana cultivation facility will follow:

Upon notification that the board or the director require samples for random compliance checks of the proposed facility, a licensee or an authorized agent of the proposed facility will notify an independent testing laboratory (of the states' choice if applicable) to send a representative to collect the required samples. This way, a chain of custody is established, and the possibility of unintentional contamination due to improper sample collection practices is minimized.

All marijuana product batches will be tested for a battery of state required impurities and/or contaminants by a state licensed lab in accordance with 3 AAC 306.455. The facility will collect random samples from homogeneous batches of individual strains of bud or flower in the amount required by the selected testing facility. The marijuana will be segregated and quarantined in up to five (5) pound lots and kept there until the testing has been completed and the marijuana has cleared and passed the lab.

We will further select homogeneous samples from our limited cultivation facility for random testing during our growing cycles in order to ensure the highest of quality of standards are met.

Section 8 – Packaging and Labeling

Review the requirements under 3 AAC 306.470 and 3 AAC 306.475.

Answer "Yes" or "No" to the following question:	Yes	No
8.1. Will the marijuana cultivation facility be packaging marijuana for a retail marijuana store to sell to a consumer without repackaging?	☑	☐

If "Yes", describe how the marijuana cultivation facility will ensure that the marijuana sold will meet the packaging requirements in 3 AAC 306.470, and provide a sample label that the facility will use to meet the labeling requirements set forth in 3 AAC 306.475:

After marijuana has been harvested and processed, a sample will be taken from each batch and sent for testing. While results are pending, the batch will be "quarantined" until it is deemed acceptable and passed by the testing facility. Marijuana will be packaged in a variety of ways. Batches of 1.0 gram packs may be produced as well as 1/8 oz, 1/4oz and up to 1 ounce packages. All labeling on all packaging will meet the standards as required for cultivators.

In accordance with 3 AAC 306.470, when we package the marijuana , we will either place in a package of 1 ounce or less, in approved packaging for the retail store to sell individually. In accordance with 3 AAC 306.475, the packaging shall have these 5 statements to be on the packaging:

See attached label.
Response Cont'd. p. 7.

Answer "Yes" or "No" to the following question:	Yes	No
8.2. Will the marijuana cultivation facility be packaging marijuana in wholesale packages?	☑	☐

If "Yes", describe how the marijuana cultivation facility will ensure that the marijuana sold will meet the packaging requirements in 3 AAC 306.470, and provide a sample label that the facility will use to meet the labeling requirements set forth in 3 AAC 306.475:

After marijuana has been harvested and processed, a sample will be taken from each batch and sent for testing. While results are pending, the batch will be "quarantined" until it is deemed acceptable and passed by the testing facility. Marijuana will be packaged in up to five pound wholesale packages for retail marijuana stores. All labeling on all packaging will meet the standards as required for cultivators. All marijuana slated to leave the facility will be placed into a durable, tamper-evident METRC packaging prior to transport. The shipment will be accompanied by the appropriate manifest, and will be verified by the licensee or designated agent before the shipment is permitted to leave.

In accordance with 3 AAC 306.470, when we package the marijuana in up to five pound lots consisting of a single strain or a mixture of strains as identified on the label In accordance with 3 AAC 306.475, the packaging shall have these 5 statements to be on the packaging:
(1) "Marijuana has intoxicating effects and may be habit forming and addictive.";
(2) "Marijuana impairs concentration, coordination, and judgment Do not operate a vehicle or machinery under its influence.";
(3) "There are health risks associated with consumption of marijuana.";
(4) "For use only by adults twenty-one and older. Keep out of the reach of children.";
(5) "Marijuana should not be used by women who are pregnant or breast feeding.".

See attached label.
Response Cont'd. p. 7.

I certify that as a marijuana cultivation facility, I will submit monthly reports to the Department of Revenue and pay the excise tax required under AS 43.61.010 and AS 43.61.020 on all marijuana sold or provided as a sample to a marijuana establishment, as required under 3 AAC 306.480.

I declare under penalty of unsworn falsification that this form, including all accompanying schedules and statements, is true, correct, and complete.

WARNING Marijuana has intoxicating effects and may be habit forming and addictive. Marijuana impairs concentration, coordination and judgment. Do not operate a vehicle or heavy machinery under it's influence. There are health risks associated with consumption of marijuana. For use only by adults twenty-one and older. Keep out of the reach of children. Marijuana should not be used by women who are pregnant or breast feeding.
