Alaska Marijuana Control Board

Operating Plan Supplemental

Form MJ-05: Marijuana Product Manufacturing Facility

What is this form?

This operating plan supplemental form is required for all applicants seeking a marijuana product manufacturing facility license and must accompany **Form MJ-01: Marijuana Establishment Operating Plan**, per 3 AAC 306.020(b)(11). Applicants should review **Chapter 306: Article 5** of the **Alaska Administrative Code.** This form will be used to document how an applicant intends to meet the requirements of the statutes and regulations.

If your business has a formal operating plan, you may include a copy of that operating plan with your application, but all fields of this form must still be completed per 3 AAC 306.020 and 3 AAC 306.520(3).

What additional information is required for cultivation facilities?

Applicants must identify how the proposed establishment will comply with applicable regulations regarding the following:

- Equipment, compounds, and processes to be used
- Waste disposal
- Testing procedure and protocols
- Proposed marijuana concentrates and marijuana products
- Proposed product packaging and sample labels
- Prohibitions

This form must be completed and submitted to AMCO's main office before any new or transfer application for a marijuana product manufacturing facility or marijuana concentrate manufacturing facility license will be considered complete.

Section 1 – Establishment Information

Enter information for the business seeking to be licensed, as identified on the license application.

Licensee:	ISG, Inc.	MJ License #:		12315	
License Type:	Marijuana Product Manufacturing Facility				
Doing Business As:	EVERGREEN EXTRACTS				
Premises Address:	5011 Short Street, Suite 2				
City:	Juneau	State:	Alaska	ZIP:	99801

Received by AMCO 9.20.18

Section 2 – Overview of Operations

2.1. Provide an overview of your proposed facility's operations. Include information regarding the intake, flow, and transfer of marijuana, marijuana concentrate, and marijuana product at and from your premises:

Before being accepted into the facility, each shipment of marijuana and marijuana product that arrives at the facility will be inspected by a member of Evergreen Extracts' management team. Shipment contents will be reconciled with the transport manifest, shipment and packaging labels to ensure consistency. Evergreen Extracts will weight all product and ensure it matches the weight listed on the manifest and labels. Any shipments with discrepancies will be rejected. Shipments that pass initial inspection will be accepted into the facility, entered into METRC and added to the facility's inventory. All marijuana and marijuana products will be tracked from the time it is received at the facility, to it's use in a manufactured product or disposal, to it's transfer to another licensed facility. Evergreen Extracts' management team will reconcile each transaction to other licensed facilities with METRC and the inventory on hand to ensure consistency and to be able to correct discrepancies immediately. A random sample of each product manufactured at the facility will be sent to a licensed testing lab before being transferred to another licensed facility. While awaiting testing results, the remainder of the production lot will be segregated from all other product until the testing results are received. Once passing testing results are received from the testing lab, marijuana products will be packaged and labeled in compliance with 3 AAC 306.565 and 306.570. The packaged products will then be transported by an agent of Evergreen Extracts who holds a valid marijuana handler permit or by a third party transport company with valid marijuana handler permits. All transfers will be entered into METRC and a trip manifest will accompany each shipment and a copy will be stored on site as a business record.

Section 3 – Equipment and Compounds to be Used

Review the requirements under 3 AAC 306.555.

3.1. Describe the equipment and solvents, gases, chemicals, and other compounds the marijuana product manufacturing facility will use to create marijuana concentrates:

Equipment:
Hydraulic Rosin press 20,000 psi
parchment paper
micron bags
refrigerator

Other compounds:
ice
water

Received by AMCO 9.20.18

Section 4 – Waste Disposal

Review the requirements under 3 AAC 306.740.

You must be able to certify the statement below. Read the following and then sign your initials in the box to the right: Initials

4.1. The marijuana product manufacturing facility shall give the board at least three days written notice required under 3 AAC 306.740(c) before making marijuana waste unusable and disposing of it.

4.2. Describe how you will store, manage, and dispose of any solid or liquid marijuana waste, including expired or outdated marijuana or marijuana product, in compliance with any applicable laws. Include details about the material(s) you will mix with ground marijuana waste and the processes that you will use to make the marijuana waste unusable for any purpose for which it was grown or produced:

The following marijuana plant and product waste is anticipated at the manufacturing facility; (1) contaminated or infected marijuana or marijuana products (2) marijuana or marijuana products deemed by the licensee or a manager as unfit for sale or consumption for any reason (3) marijuana product that fails testing (4) marijuana plant waste created during the extraction process (5) marijuana or marijuana product that becomes expired (6) other marijuana or marijuana product waste as determined by the board or director. Once marijuana or marijuana product is deemed as waste, it will be separated from all other marijuana and marijuana products and securely stored in locked bins on the licensed premises and an email notification will be sent to AMCO Enforcement at least 3 days prior to rendering the waste unusable as well as recording the waste in metrc. All solid marijuana plant waste (plant matter waste from the extraction process such as plant matter that is pressed/squeezed to extract oil) and marijuana product waste will be ground in a grinder and then mixed with other solid compostable or noncompostable waste until the mixture is no more than 50% marijuana waste. Liquid marijuana waste such as concentrates, will be mixed with at least equal parts of non-marijuana waste and then stored away from all other marijuana and marijuana products in locked containers on the premises. The city waste truck will collect the waste mixture and dispose of it at the local waste station. This information will be recorded in the disposal log and securely stored as a business record, available to AMCO upon request.

Received by AMCO 9.20.18

Section 5 – Testing Procedure and Protocols

Review the requirements under 3 AAC 306.520 and 3 AAC 306.550.

You must be able to certify the statement below. Read the following and then sign your initials in the box to the right: Initials

5.1. I will ensure that any individual responsible for collecting random samples for required laboratory testing under 3 AAC 306.455 will prepare the necessary accompanying signed statement, provide the signed statement to the marijuana testing facility, and maintain a copy as a business record under 3 AAC 306.755. ☑

Answer "Yes" or "No" to the following question:	Yes	No
5.2. Will the marijuana product manufacturing facility be performing in-house testing (as defined under 3 AAC 306.990(b)(20)?	☐	☑

If "Yes" to 6.2, you must be able to certify the statement below. Read the following and then sign your initials in the box: Initials

5.3. The area where in-house testing will occur is clearly identified on the Form MJ-02: Premises Diagram that is submitted with this application. ☐

5.4. Describe the testing procedures and protocols the marijuana product manufacturing facility will follow:

Evergreen Extracts will designate an employee to collect a random, homogeneous sample from each production lot that will be sent to a licensed testing facility. The designated employee will sign a prepared statement declaring that the sample was taken at random. A copy of the statement will accompany samples to the testing lab and a copy will be filed in the office as a business record which will be available to AMCO upon request. Samples will be transported to the testing facility by an Evergreen Extracts agent who holds a valid marijuana handler permit or by a third party transport company holding valid handler permits. The remainder of the production lot will be kept separate from all other marijuana and marijuana products until the testing results are received back from the testing lab. During the quarantine period, the product will be securely stored on-site and an Evergreen Extracts manager or designated employee will ensure that the product is kept cool and dry to prevent contamination or loss of efficacy.
A copy of the testing results will be stored as an official business record, available to AMCO upon request.

Received by AMCO 9.20.18

Section 8 – Prohibitions

Review the requirements under 3 AAC 306.510.

8.1. I certify that the marijuana product manufacturing facility will not: Initials

a. **sell, deliver, distribute, or transfer any marijuana, marijuana concentrate, or marijuana product directly to a consumer, with or without compensation;**

b. **allow any person, including a licensee, employee, or agent, to consume marijuana, marijuana concentrate, or marijuana product on the licensed premises; or**

c. **manufacture or sell any product that is an adulterated food or drink, closely resembles a familiar food or drink item including candy, or is packaged to look like candy, or in bright colors or with cartoon characters or other pictures or images that would appeal to children.**

I declare under penalty of unsworn falsification that this form, including all accompanying schedules and statements, is true, correct, and complete.

Section 6 – Proposed Marijuana Concentrates and Marijuana Products

Review the requirements under 3 AAC 306.520, 3 AAC 306.525, and 3 AAC 306.560.

Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.

Product Name:	Rosin Hash Oil		
Product Type:	Marijuana Concentrate		
Perishable: Yes/No	Yes	**Shelf Life:** If perishable.	12 months

Product Description: Details must include the color, shape, and texture.	Rosin Hash Oil will be golden amber in color and slightly translucent. It is very sticky and viscous.
Ingredients: This box is not applicable to marijuana concentrates.	N/A
Standard Production Procedure and Detailed Manufacturing Process:	Bubble Hash, Kief or cannabis flower is place between two pieces of parchment paper. The paper is placed between the heated hydraulic press plates. The press is activated and the immense pressure and low heat pushes the oil out and away from the plant material allowing the press operator to collect it. The oil is collected using a silicone dab pad.
Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.	

Received by AMCO 9.20.18

Section 7 – Proposed Product Packaging and Sample Labels

Review the requirements under 3 AAC 306.520, 3 AAC 306.565, and 3 AAC 306.570.

Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.

Product Name:	Rosin Hash Oil
Product Type:	Marijuana Concentrate

Packaging Description: Details must include the color(s), size, packaging materials used, total amount of THC, individual serving sizes (if multiple), and other specifics showing compliance with 3 AAC 306.565. Please include photos, drawings, or graphic representations.	Rosin Hash Oil will be packaged in .5, 1, 3, or 7 grams in clear, glass or plastic containers with a screw top lid. Total amount of THC will range from 40 - 99%. The actual THC content will be listed on the label per the testing results. 
Sample Labels:
Provide sample labels showing how the labeling requirements set forth in 3 AAC 306.570 will be met.

Product Name:	Bubble Hash		
Product Type:	Marijuana Concentrate		
Perishable: Yes/No	Yes	**Shelf Life:** If perishable.	12 months

Product Description: Details must include the color, shape, and texture.	White to light brown in color. The consistency and texture is close to soft clay.
Ingredients: This box is not applicable to marijuana concentrates.	N/A
Standard Production Procedure and Detailed Manufacturing Process:	Ice water extraction is a solvent-less process that uses ice, water and agitation to remove the trichomes from the marijuana plant material. The water with the extracted trichomes is then put through several screens of varying micron sizes to remove small plant particulates. The concentrates from the micron bags are then dried and packaged.
Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.
