Hi Thomas,

I have reviewed the submitted corrections. Everything appears to be in order except- on the diagram for the MJ-02, your statement of, "The whole facility will be Restricted Access" needs some additional information. Even though your whole facility is Restricted Access, the Licensed Premises needs to be defined, as well. Please correct your statement to say, "The whole facility will be a Restricted Access Area and the Licensed Premises."

Once we receive this correction from you, we will do another comprehensive review of your application to make sure everything is in order, and we will be in touch if anything further is needed or if the application is deemed complete.

Thank you,

Jacqlene,

I am attaching the updated MJ-04 calculations and the hand signed signature page for the operating agreement. Each page is its own attachment. I made sure that the calculations match the dimensions on the diagram exactly, and did my best to clarify how I arrived at the total canopy space in the facility.

If the application is acceptable once these forms are deemed fixed, will I be planning a trip to Nome in April?

Thank you for your patience,

Thomas Holohan

Good afternoon,

I have reviewed the corrections that were submitted. There are further corrections needed:

-After doing another comprehensive review, I noticed that the Operating Agreement seems to be signed electronically by both Thomas and Stacy. All forms/documents must have handwritten signatures, not electronic signatures. Please correct accordingly, and resubmit the signature page.
-MJ 02 and MJ 04: Thank you for the updated diagram and MJ 04; however, there are still corrections needed.

- On page 2 of MJ-04, please include the dimensions (for example: 4'X24') before the total square footage, like what was done on the diagram. The diagram needs to match the explanation on this page exactly.
- Additionally, while comparing the calculations from MJ-04 and the diagram, the vegetation and propagation area still does not match the dimensions on the diagram. Essentially, I do not see where the 180 SF comes in. The vegetation and propagation area shows 4X24 area for vegetation and 4X4 for cloning (96SF +16SF =112SF). Where does the 180 SF come from? Please clarify and adjust accordingly.

*Note- for the requested corrections, please only submit the corrected pages instead of the whole application.

Please send any documents/correspondence to marijuana.licensing@alaska.gov.

Respectfully,
