Alaska Marijuana Control Board

Operating Plan Supplemental

Form MJ-05: Marijuana Product Manufacturing Facility

What is this form?

This operating plan supplemental form is required for all applicants seeking a marijuana product manufacturing facility license and must accompany **Form MJ-01: Marijuana Establishment Operating Plan**, per 3 AAC 306.020(b)(11). Applicants should review **Chapter 306: Article 5** of the **Alaska Administrative Code.** This form will be used to document how an applicant intends to meet the requirements of the statutes and regulations.

If your business has a formal operating plan, you may include a copy of that operating plan with your application, but all fields of this form must still be completed per 3 AAC 306.020 and 3 AAC 306.520(3).

What additional information is required for cultivation facilities?

Applicants must identify how the proposed establishment will comply with applicable regulations regarding the following:

- Equipment, compounds, and processes to be used
- Waste disposal
- Testing procedure and protocols
- Proposed marijuana concentrates and marijuana products
- Proposed product packaging and sample labels
- Prohibitions

This form must be completed and submitted to AMCO's main office before any new or transfer application for a marijuana product manufacturing facility or marijuana concentrate manufacturing facility license will be considered complete.

Section 1 – Establishment Information

Enter information for the business seeking to be licensed, as identified on the license application.

Licensee:	Petrichor LLC	**MJ License #:**	18493		
License Type:	Marijuana Product Manufacturing Facility				
Doing Business As:	Petrichor LLC				
Premises Address:	3780 Leasure St Unit A				
City:	Fairbanks	**State:**	Alaska	**ZIP:**	~~99705~~ 99701

AMCO Received 11/29/2018

Section 2 – Overview of Operations

1.Provide an overview of your proposed facility's operations. Include information regarding the intake, flow, and transfer of marijuana, marijuana concentrate, and marijuana product at and from your premises:

oPetrichor LLC will not produce its own concentrates/extracts and will instead commercially source them.
o Petrichor LLC will look to produce a wide variety of shelf stable infused edibles such as chocolates, Gummies, and small cookies and wafers.
oPetrichor LLC will produce infused topical such as shampoo, conditioners, and lotions.
oPetrichor LLC will produce infused drinks including Energy Drinks, Sodas, Iced Coffees, Iced Chais, etc.
oOperations will focus on mass production principles and best practices while adhearing to AMCO regulations concerning inventory tracking, dosing, labeling, and marketing.
oMarijuana flow for all products will go 1. intake of distillate 2. emulsion production 3. emulsion and product ingredient mix 4. cooking or carbonating (if required) 5. commercial testing 6. packaging or bottling 7. transfer to retail.

Section 3 – Equipment and Compounds to be Used

Review the requirements under 3 AAC 306.555.

3.1. Describe the equipment and solvents, gases, chemicals, and other compounds the marijuana product manufacturing facility will use to create marijuana concentrates:

Petrichor LLC will not produce concentrates in house. It will source distillates commercially to be used as infusion ingredients in production.

AMCO Received 11/29/2018

Section 4 – Waste Disposal

Review the requirements under 3 AAC 306.740.

You must be able to certify the statement below. Read the following and then sign your initials in the box to the right: Initials

1. **The marijuana product manufacturing facility shall give the board at least three days written notice required under 3 AAC 306.740(c) before making marijuana waste unusable and disposing of it.** [initials]

2.Describe how you will store, manage, and dispose of any solid or liquid marijuana waste, including expired or outdated marijuana or marijuana product, in compliance with any applicable laws. Include details about the material(s) you will mix with ground marijuana waste and the processes that you will use to make the marijuana waste unusable for any purpose for which it was grown or produced:

oLiquid waste will be stored in Plastic Drums designed for that purpose and segregated from all other products and made available for inspection.
oLiquid waste will be mixed at a 1:1 with a detergent/water solution and disposed of through the facilities sewer system following proper notification of AMCO and the mandatory 3 day waiting period.
oProduct designated for destruction will be segregated from all other products and marked in a clearly visible way and made available for inspection.
oSolid or cream based waste will be ground up to smaller then 1cm by 1cm and mixed at a 1:1 ratio with a benign medium such as sawdust, potting soil, paper mulch, etc.
oFollowing proper notification of AMCO and the mandatory 3 day waiting period the waste mix (rendered benign) will be disposed of through the appropriate waste transfer site.

AMCO Received 11/29/2018

Section 5 – Testing Procedure and Protocols

Review the requirements under 3 AAC 306.520 and 3 AAC 306.550.

You must be able to certify the statement below. Read the following and then sign your initials in the box to the right:	Initials
5.1. I will ensure that any individual responsible for collecting random samples for required laboratory testing under 3 AAC 306.455 will prepare the necessary accompanying signed statement, provide the signed statement to the marijuana testing facility, and maintain a copy as a business record under 3 AAC 306.755.	6M

Answer "Yes" or "No" to the following question:	Yes	No
5.2. Will the marijuana product manufacturing facility be performing in-house testing (as defined under 3 AAC 306.990(b)(20)?	☐	☑

If "Yes" to 6.2, you must be able to certify the statement below. Read the following and then sign your initials in the box:	Initials
3. The area where in-house testing will occur is clearly identified on the Form MJ-02: Premises Diagram that is submitted with this application.	

4. Describe the testing procedures and protocols the marijuana product manufacturing facility will follow:

o Production Runs will be segregated from all other products and placed into quarantine
o A random serving-size sample (veries by product) will be collected from the production batch and placed into a sealed and tamper evident container (bottle for liquids bag for solids)
o A statement of random sampling will be generated and signed by the site manager or designee
o Sample will be entered into a METRC transfer manifest and transported to designated testing facility
o Production run will remain in quarantine until test results have been returned.
