Hi Jason,

Please complete and return the attached System Classification form. I will review the information you provide and determine the requirements for your drinking water system.

If the system is limited to using City of Ketchikan water delivered by an approved water hauler and it is used without any further treatment, the system will be classified as a Private Water System. Private systems are not subject to the State of Alaska Drinking Water Regulations, 18 AAC 80.

Please let me know if you have any questions.
