Alaska Marijuana Control Board

Operating Plan Supplemental

Form MJ-05: Marijuana Product Manufacturing Facility

What is this form?

This operating plan supplemental form is required for all applicants seeking a marijuana product manufacturing facility license and must accompany the **Marijuana Establishment Operating Plan (Form MJ-01)**, per 3 AAC 306.020(b)(11). Applicants should review **Chapter 306: Article 5** of the **Alaska Administrative Code.** This form will be used to document how an applicant intends to meet the requirements of those regulations. If your business has a formal operating plan, you may include a copy of that operating plan with your application, but all fields of this form must still be completed per 3 AAC 306.020 and 3 AAC 306.520(3).

What additional information is required for product manufacturing facilities?

Applicants must identify how the proposed establishment will comply with applicable regulations regarding the following:

- Prohibitions
- Equipment, compounds, and processes to be used
- Proposed marijuana concentrates and marijuana products
- Proposed product packaging and sample labels
- Waste disposal plan
- Testing

This form must be submitted to AMCO's main office before any marijuana product manufacturing facility license application will be considered complete.

Section 1 – Establishment Information

Enter information for the business seeking to be licensed, as identified on the license application.

Licensee:	Brown Bear Enterprises, LLC	**License Number:**	14619		
License Type:	Marijuana Product Manufacturing Facility				
Doing Business As:	Brown Bear Labs				
Premises Address:	6209 Mike St., Suite 2B				
City:	Anchorage	**State:**	ALASKA	**ZIP:**	99518

Operating Plan Supplemental

Form MJ-05: Marijuana Product Manufacturing Facility

Section 2 – Prohibitions

Applicants should review 3 AAC 306.510 and be able to answer "Agree" to all items below.

The marijuana product manufacturing facility will not:	Agree	Disagree
Sell, deliver, distribute, or transfer any marijuana, marijuana concentrate, or a marijuana product directly to a consumer, with or without compensation	✓	
Allow any person, including a licensee, employee, or agent, to consume marijuana, marijuana concentrate, or a marijuana product on its licenses premises	✓	

The marijuana product manufacturing facility will not manufacture or sell any product that:	Agree	Disagree
Is an adulterated food or drink	✓	
Closely resembles a familiar food or drink item including candy	✓	
Is packaged to look like candy, or in bright colors or with cartoon characters or other pictures or images that would appeal to children	✓	

Section 3 – Equipment, Compounds, and Processes to be Used

Review the requirements under 3 AAC 306.555, and identify how the proposed premises will meet the listed requirements.

Describe the equipment and solvents, gases, chemicals, and other compounds the marijuana product manufacturing facility will use to create marijuana concentrates:

Equipment: Subcritical/Supercritical CO2 System, Ethanol Extractor, Diaphragm Pump, Vacuum Pump, Rotary Evaporator, Chiller, Distiller, Oven, Deep Freezer, Purifier, Hydraulic Rosin Press, Cloth Sieves, Vacuum Oven, Dry Oven, Grinder, Bubble Bags

Gases: CO2

Solvents: Ethanol, ice, dry ice, water

Alaska Marijuana Control Board

Operating Plan Supplemental

Form MJ-05: Marijuana Product Manufacturing Facility

Describe the processes to be used to create marijuana concentrates:

Closed loop extraction using a Sub-critical/Supercritical CO2 System: Ground marijuana material is loaded manually into a stainless steel vessel, which is then pressurized. CO2 passes through the material and carries out the cannabinoids, terpenes, plant waxes and other volatile organic compounds. Pressures and temperatures can be varied to target specific compounds. The vessel is then depressurized and the plant material is disposed of per Brown Bear Labs waste procedures in compliance with 3 AAC 306.740. The concentrate is removed from the collection vessel and stored in a freezer.

Hydraulic rosin press extraction: Ground marijuana material or whole flower is placed into a stainless steel die, which is loaded into a hydraulic press. The die is heated with an electric element while the hydraulic press squeezes the concentrates out of the marijuana plant material. The marijuana concentrates are removed from the die and stored in a freezer.

Ice water extraction: Ground marijuana material or whole flower is placed into a bucket lined with cloth sieves. The bucket is then filled with ice water, and the mixture is manually agitated. After the ice melts, the sieves are removed sequentially, leaving concentrate of different consistency in each screen. The concentrates can be heated in an oven to remove residual moisture, then stored in a freezer.

Ethanol extraction both of raw material and of CO2 extracted material: Pure, lab grade ethanol is added to ground marijuana material or marijuana concentrate and the mixture is placed in a refrigerator or freezer for a specific period of time, ranging from an hour to several days. The plant wax is then filtered out of the mixture using either a pump and filter with plumbing or a vacuum funnel. The filtered plant wax is disposed of and the ethanol/concentrate mixture is removed from its collection vessel and stored in a freezer.

Section 4 – Proposed Marijuana Concentrates and Marijuana Products

Review the requirements under 3 AAC 306.520 - 3 AAC 306.525 and 3 AAC 306.560, and identify how the proposed establishment will meet the listed requirements. **Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.**

Product Name:	Brown Bear Shatter
Type:	Concentrate

Product Description: Details must include the color, shape, and texture.	Shatter has a smooth glass-like texture, that is hard and brittle when cold (shatters when broken apart) and has the consistency and appearance of honey when warm. Color ranges from yellow to amber. Comes in a variety of strains with varying THC and CBD levels.

Ingredients: This box is not applicable to marijuana concentrates	

Standard Production Procedure and Detailed Manufacturing Process:	Solvent extraction is used to extract the necessary chemicals from the plant, and then evaporated from the compound, which leaves the plants resin. The solution is strained and purged to remove plant material and ethanol from the product. The extraction is placed in a vacuum oven in a low temperature range from 130 to 140F for 5-6 days.

Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.

Section 5 – Proposed Product Packaging and Sample Labels

Review the requirements under 3 AAC 306.520 and 3 AAC 306.565 – 3 AAC 306.570, and identify how the proposed establishment will meet the listed requirements. **Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.**

Product Name:	Brown Bear Shatter
Type:	Concentrate

Packaging Description: Details must include the color(s), size, packaging materials used, total amount of THC, individual serving sizes (if multiple), and other specifics showing compliance with 3 AAC 306.565. Attached photos, drawings, or graphic representations are preferred.	Packaging consists of non-toxic, opaque, black or white mylar with an optional clear front/back to show the product. Bags range from 3"x4" to 4"x5" (1gm not to be repackaged) bags. The designated amount of product will be packaged in a glass/plastic container or parchment paper, and then placed in the mylar bag. Total THC per product will range from 40-99%. *To be placed into exit packaging in compliance with 3 AAC 306.345(a)(3) by the retailer*

Sample Labels: Provide sample labels showing how the labeling information required in 3 AAC 306.570 will be set out.	Produced By: Brown Bear Labs License Number: 14619 Product Name:Brown Bear Shatter Batch/Lot Number: Gross Weight: Net MJ Weight: Packaging Date: Best By Date: Strain: Tested By: License Number: Total THC: THCA: CBD: CBDA: CBN: Microbial Test: Residual Solvent Te Contaminants Test Results: Retailer: License Number: **Alaska Safety Warning:** Marijuana has intoxicating effects and may be habit forming and addictive. Marijuana impairs concentration, coordination and judgment. Do not operate a vehicle or machinery under its influence. There are health risks associated with consumption of marijuana. For use only by adults twenty-one and older. Keep out of the reach of children. Marijuana should not be used by women who are pregnant and/or breast feeding.

Section 4 – Proposed Marijuana Concentrates and Marijuana Products

Review the requirements under 3 AAC 306.520 - 3 AAC 306.525 and 3 AAC 306.560, and identify how the proposed establishment will meet the listed requirements. **Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.**

Product Name:	Brown Bear Clear Honey
Type:	Concentrate

Product Description: Details must include the color, shape, and texture.	Brown Bear Clear Honey is oil extracted from the plant using a solvent. Color ranges from transparent to yellow, that has a gooey and smooth consistency. The oil is sticky and oily in nature, and forms to the container its in. Comes in a variety of strains with varying THC and CBD levels. Used for inhalation, vaping and making tinctures.

Ingredients: This box is not applicable to marijuana concentrates	

Standard Production Procedure and Detailed Manufacturing Process:	Brown Bear Clear Honey is produced by extracting the THC and CBD from the dried and cured plants, with a solvent, and then mixed with ethanol. The solvent is then evaporated from the compound, and the remaining resin is strained and purged to remove any excess plant material and ethanol. The solution is then distilled to preserve the concentrate. Expiration is one (1) year.

Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.

Product Name:	Brown Bear Rosin
Type:	Concentrate

Product Description: Details must include the color, shape, and texture.	Rosin has a bright, golden yellow to light brown color, that has a gooey and silky consistency. Rosin is sticky and oily in nature, and can have a hard or soft consistency, depending on the strain. Comes in a variety of strains with varying THC and CBD levels. Used for inhalation, vaping and making tinctures. Expiration is one (1) year.

Ingredients: This box is not applicable to marijuana concentrates	

Standard Production Procedure and Detailed Manufacturing Process:	Fresh or cured plant material is taken and pressed to form Rosin which is a solid form of resin that is obtained by adding pressure & heat to vaporize volatile liquid terpenes, with an industrial heat press. After pressing, the product is placed in a freezer until cool and solid.

Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.

Product Name:	Brown Bear Wax
Type:	Concentrate

Product Description: Details must include the color, shape, and texture.	Wax has a soft, waxy appearance and comes in an amber to brown opaque color. Wax is soft, pliable and has a creamy consistency. Comes in a variety of strains with varying THC and CBD levels. Used for inhalation. Expiration is one (1) year.

Ingredients: This box is not applicable to marijuana concentrates	

Standard Production Procedure and Detailed Manufacturing Process:	Wax is produced by extracting the THC and CBD from the dried and cured plants, with a solvent, and then mixed with ethanol. The solvent is then evaporated from the compound, and the remaining resin is strained and purged to remove any excess plant material and ethanol. The product is then placed in a vacuum oven for 3-5 days.

Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.

Product Name:	Brown Bear Cannabis Lip Balm
Type:	Topical Marijuana Product

Product Description: Details must include the color, shape, and texture.	Cannabis Lip Balm is a wax like substance applied topically to the lip to moisturize and revive chapped lips. The lip balm has a light golden opaque color and formed into a cylindrical shape, in order to fit into a lip balm tube. It can be infused with essential oils to enhance the smell of the lip balm. Used for topical application. 5mg serving in each lip balm tube. Lip balm will be strain specific with varying THC and CBD levels.

Ingredients: This box is not applicable to marijuana concentrates	Marijuana (oil or concentrate), beeswax, carnauba wax, cocoa butter, shea butter, almond oil,, organic flavoring oil and coconut oil (or similar).

Standard Production Procedure and Detailed Manufacturing Process:	Melt the beeswax, carnauba wax, cocoa butter with the almond oil in a double boiler. Add marijuana and stir until liquid. Remove from heat, add flavoring oils and blend until mixture cools but still pourable. Pour into tubes and leave untouched until set. Lip Balm will be stored at room temperature and have an estimated expiration date of one (1) year.

Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.

Section 5 – Proposed Product Packaging and Sample Labels

Review the requirements under 3 AAC 306.520 and 3 AAC 306.565 – 3 AAC 306.570, and identify how the proposed establishment will meet the listed requirements. **Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.**

Product Name:	Brown Bear Cannabis Oil
Type:	Concentrate - intended for inhalation via smoking or vaping

Packaging Description: Details must include the color(s), size, packaging materials used, total amount of THC, individual serving sizes (if multiple), and other specifics showing compliance with 3 AAC 306.565. Attached photos, drawings, or graphic representations are preferred.	Packaging consists of non-toxic, opaque, black or white mylar with an optional clear back to show the product. Bags range from 3"x4.5" (1gm not to be repackaged) to 2.5"x9". The designated amount of product will be packaged in a glass/plastic vape pen cartridge or syringe, and then placed in the mylar bag. Syringe packaging will hold 0.5-1.5g per vessel and be placed in a 2.5"x9" mylar bag, not to be repackaged by retail stores. Vape Cartridges will be plastic or glass 0.3-0.8ml and placed in mylar bags. Total THC per product will range 40-99%.
Sample Labels: Provide sample labels showing how the labeling information required in 3 AAC 306.570 will be set out.	Produced By: Brown Bear Labs License Number: 14619 Product Name: Brown Bear Cannabis Oil Batch/Lot Number: Gross Weight: Net MJ Weight: Packaging Date: Best By Date: Strain: Tested By: License Number: Total THC: THCA: CBD: CBDA: CBN: Microbial Test: Residual Solvent Test: Contaminants Test Result: Retailer: License Number: **Alaska Safety Warning:** Marijuana has intoxicating effects and may be habit forming and addictive. Marijuana impairs concentration, coordination and judgment. Do not operate a vehicle or machinery under its influence. There are health risks associated with consumption of marijuana. For use only by adults twenty-one and older. Keep out of the reach of children. Marijuana should not be used by women who are pregnant and/or breast feeding.

Product Name:	Brown Bear Caviar Joint
Type:	Marijuana Product - kief, cannabis oil covered marijuana flower joint

Product Description: Details must include the color, shape, and texture.	Caviar Joints have the traditional shape of a joint and come wrapped in a smokable rolling paper. They vary in size, from 3.3" to 4.3" depending on the rolling paper and tip size. The joint is dense and has a sticky, oily coating and dusted with a powder-like substance called kief. Color ranges from light yellow to dark green. Comes in a variety of strains with varying THC and CBD levels. Expiration is six (6) months.

Ingredients: This box is not applicable to marijuana concentrates	Marijuana flower, buds, cannabis oil & kief.

Standard Production Procedure and Detailed Manufacturing Process:	Dried, cured and manicured marijuana flower is ground (1 to 3g) and stuffed into a standard rolling paper, then coated in concentrate oil and rolled in kief. The caviar joint is lightly shaken to remove any excess kief and placed on a drying rack for 6 to 24 hours.

Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.

Form MJ-05: Marijuana Product Manufacturing Facility

Section 4 – Proposed Marijuana Concentrates and Marijuana Products

Review the requirements under 3 AAC 306.520 - 3 AAC 306.525 and 3 AAC 306.560, and identify how the proposed establishment will meet the listed requirements. **Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.**

Product Name:	Brown Bear Vape Pen & Oil
Type:	Concentrate

Product Description: Details must include the color, shape, and texture.	Vape Pen Oil appears as a golden amber to yellow liquid, which is translucent in nature. The liquid takes the shape of the container its placed in and has a consistency of oil. Vape Pen Oil will come in a variety of strains and flavors with differing THC and CBD levels. Used for inhalation. Product will be placed in vape pens and vape pen cartridges.

Ingredients: This box is not applicable to marijuana concentrates	Cannabis oil, glycerin (optional) and natural flavoring extracts (strawberry, grape, green apple, cherry, raspberry, blackberry, mango, pineapple, tropical punch or similar).

Standard Production Procedure and Detailed Manufacturing Process:	Cannabis oil, glycerin (optional) and flavoring will be heated and combined using a homogenizer until fully blended and then loaded into bottles and vape pens cartridges (0.5g to 1.5g total per product). The vape pen oil will be stored at room temperature and have an estimated expiration date of one (1) year.

Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.

Section 6 – Waste Disposal Plan

Review the requirements under 3 AAC 306.520, and identify how the proposed premises will meet the listed requirements.

Describe the marijuana product manufacturing facility's plan for disposal of any expired or outdated marijuana or marijuana product that is not sold or transferred to another licensed marijuana establishment:

Brown Bear Labs will ensure that all marijuana product waste is rendered unusable prior to leaving the facility. The licensees will maintain a log on the status of all marijuana product waste, tracking the type of waste, the date of disposal, the date it was rendered unusable, and the final destination of the waste. All marijuana product marked for disposal will be stored in a secured bin, separated from all other products and materials, until AMCO Enforcement has been notified and it can be rendered unusable by grinding and mixing with at least equal parts other non-marijuana compostable or noncompostable solid wastes. Once rendered unusable, marijuana product will be securely stored in locked containers located on the premises. All locks will comply with the highest UL standards. Only authorized personnel will have access to the keys that lock and unlock the disposal containers. A waste truck will collect the waste and dispose of it at the city solid waste facility or it will be composted or fed to livestock at Eli and Raquel's home where they have several small farm animals and a vegetable garden.
