Alaska Marijuana Control Board

Form MJ-01: Marijuana Establishment Operating Plan

What is this form?

An operating plan is required for all marijuana establishment license applications. Applicants should review **Title 17.38** of **Alaska Statutes** and **Chapter 306** of the **Alaska Administrative Code.** This form will be used to document how an applicant intends to meet the requirements of those statutes and regulations. If your business has a formal operating plan, you may include a copy of that operating plan with your application, but all fields of this form must still be completed per 3 AAC 306.020(c).

What must be covered in an operating plan?

Applicants must identify how the proposed premises will comply with applicable statutes and regulations regarding the following:

- Security
- Inventory tracking of all marijuana and marijuana product on the premises
- Employee qualification and training
- Waste disposal
- Transportation and delivery of marijuana and marijuana products
- Signage and advertising
- Control plan for persons under the age of 21

Applicants must also complete the corresponding operating plan supplemental forms (**Form MJ-03, Form MJ-04, Form MJ-05,** or **Form MJ-06)** to meet the additional operating plan requirements for each license type.

Section 1 – Establishment Information

Enter information for the business seeking to be licensed, as identified on the license application.

Section 2 – Security

Review the requirements under 3 AAC 306.710 – 3 AAC 306.720 and 3 AAC 306.755, and identify how the proposed premises will meet the listed requirements.

Describe how the proposed premises will comply with each of the following:

Restricted Access Areas (3 AAC 306.710):

Describe how you will prevent unescorted members of the public from entering restricted access areas:

Unescorted members of the public are prevented from entering all restricted access areas of the proposed licensed premises through the use of full-time locked, penetration resistant, commercial grade security doors on all entrances to the restricted access areas. All restricted access areas and enhanced security areas within the restricted access areas can only be accessed by entering the unique individually assigned access codes into the keyless entry pad or use the separate manager keys for gaining access through each layer of the security doors. Each entry door to the proposed licensed premises is secured with Schlage Sense Smart Commercial Grade 1 keypad or key deadbolt locks. These deadbolts allow for full auditing of the use of all users' access codes assigned only to individuals authorized to be within the proposed licensed premises. These deadbolt locks all meet the standards for the highest rated commercial and residential deadbolt lock requirements. The area of this facility dedicated to the proposed licensed premises is underground on three sides and the "day light" side has the existing two windows 2x6 framed-in from behind the window blinds and secured with 4.5" Timberlock bolts, 1.25" marine grade plywood and then corrugated metal screwed from the inside so as to look normal from the outside for residential neighbors and further to ensure no actual ability to access the proposed licensed premises should someone try to break through the windows from the outside.

Describe your processes for admitting visitors into and escorting them through restricted access areas:

Any visitor to the restricted access area must show identification to prove that person is 21 years of age or older, and obtain a visitor identification badge before entering the restricted access area. After receiving a visitor identification badge, all visitors to the proposed licensed premises will be escorted within all restricted access areas at all times by only the Grow Manager and/or the Grow Owner.
No underage, unauthorized, nor unescorted visitors will be allowed access to restricted access areas of the proposed licensed premises at any time.
Prior to any visitor being escorted within the restricted access areas of the proposed licensed premises, the visitor will be required to sign into the visitor's logbook by the Grow Manager and/or Grow Owner and the reason for their visit documented at that time along with date of the visitation, visitor's valid photo identification type, state of issue and ID #. The visitor will remain with the Grow Manager and/or the Grow Owner at all time within the restricted access areas of the proposed licensed premises.

These visitation records will be kept onsite at the proposed licensed premises and made available for inspection at all times in perpetuity.

Describe your recordkeeping of visitors who are escorted into restricted access areas:

All visitors to the proposed licensed premises shall only enter restricted access areas after having been assured by the Grow Manager and/or the Grow Owner to have signed into the facility's Visitor Logbook. These visitation records will document the date of the visitation, the visitor's name, and the reason for the visitor being at the proposed licensed facility.

Provide a copy of a sample identification badge to be displayed by each licensee, employee, or agent while on the premises:

See Attached Page for detailed image of Rock Hard Nugz AK ID Badge used for the Grow Manager, Grow Owner/Licensee, Grow Employees, and Visitors to the proposed Licensed premises.

Security Alarm Systems and Lock Standards (3 AAC 306.715):

Exterior lighting is required to facilitate surveillance. Describe how the exterior lighting will meet this requirement:

All exterior and interior lighting of the entry points and exits to the proposed licensed premises will be assured through the use of either motion sensored or timed LED security lights to facilitate clear recognition of individuals recorded through video surveillance per 3 AAC 306.

An alarm system is required for all license types. Describe the security alarm system for the proposed premises:

The security system will be activated during all non-working hours and working hours when perimeter security doors are activated to ensure worker safety and asset security. The system will trigger an alarm if fire/smoke is detected, water is detected on the floor, movement between the first and second outer security doors is detected or an unauthorized breach of the outer or inner commercial Grade 1 deadbolt locked security doors to the proposed licensed premises is detected. The security system will both alarm audibly with a high decibel horn speaker to further deter possible intruders from continued attempts at gaining entry to the proposed licensed premises. If the security system is triggered during either situstion automated report is made to local law enforcement via the Security System Company.

The alarm system must be activated on all exterior doors and windows when the licensed premises is closed for business. Describe how the security alarm system meets this requirement:

The entries and exits to the entire facility as well as the double security doors to the proposed licensed premises within the facility will be equipped with entry sensors that report wirelessly to the base station which will sense any unauthorized entry into the facility or the licensed premises. Since there are no windows in the proposed licensed facility where access could be gained, there is no need for having any glass-break sensors.

Form MJ-01: Marijuana Establishment Operating Plan

Describe your policies and procedures for preventing diversion of marijuana or marijuana product:

All marijuana plants will be tagged wih RFID tags and tracked from the time they are created as clones through to vegetation, flowering and finally harvesting, curing, transport and sale the a licensed marijuana retail store. These plants will be tracked from birth to death using the State of Alaska Marijuana Control Board AMCO's authorized Franwell Marijuana Enforcement Tracking Reporting and Compliance(METRC) inventory tracking system. Both the Grow Manager and the Grow Owner will both go through training to learn proper utilization and tracking procedures to ensure full tracing of all final product weights back to the source and through to transfer to a retail facility. All final product will be housed within the licensed premises until transfer to the retail stores in a secure storage room that is metal lined and only accessible to the Grow Owner and Grow Manager.

Describe your policies and procedures for preventing loitering:

The proposed licensed premises are quite well hiden from the general public and therefore the risk of loitering by unauthorized persons is extremely low. Further reducing the risk of loitering is the fact there are two security dogs that monitor the permiter of the facility day and night that would prevent any unauthorized loitering. Should there ever be anyone caught loitering around in the vicinity of the proposed licensed premises, all attempts will be made to document the individual/s name/s and personal information and date of loitering prior to asking them to leave the private property of the proposed licensed premises. Any person/s found to continue to loiter on or near the proposed licensed premises will be reported to local law enforcement along with any relevant information previously documented.

Describe your policies and procedures regarding the use of any additional security device, such as a motion detector, pressure switch, and duress, panic, or hold-up alarm to enhance security of the proposed premises:

In addition to the natural barriers to unauthorized breach or entry to the proposed licensed premises by one or more individuals presented by the mere fact there are no windows and double layer commercial security doors with Grade 1 deadbolt locks, there are security dogs, as well as several defensive tools available to thwart any continued efforts by criminals to gain access from outside the proposed licensed premises.

Alaska Marijuana Control Board

Form MJ-01: Marijuana Establishment Operating Plan

Describe your policies and procedures regarding the actions to be taken by a licensee, employee, or agent when any automatic or electronic notification system alerts a local law enforcement agency of an unauthorized breach of security:

Our policy and procedure is for the Grow Manager, Grow Owner/Licensee, or any employee to immediately call local law enforcement in the event of any inadvertent or false alarms and in the event of any actual triggered breach alarm scenarios when possible immediately after any incident to 911.

It is further the policy of our company to allow local law enforcement, emergency medical personnel and fire department personnel as well as agents of the board access to our facility at all times for the purpose of ensuring safety of employees, compliance with pertinent regulations as well as for the security and protection of our employees and other company assets.

Video Surveillance (3 AAC 306.720):

All licensed marijuana establishments must meet minimum standards for surveillance equipment. Applicants should be able to answer "Yes" to all items below.

Video surveillance and camera recording system covers the following areas of the premises:	Yes	No
Each restricted access area and each entrance to a restricted access area	☑	☐
Both the interior and exterior of each entrance to the facility	☑	☐
Each point of sale area	☑	☐

Each video surveillance recording:	Yes	No
Is preserved for a minimum of 40 days, in a format that can be easily accessed for viewing	☑	☐
Clearly and accurately displays the time and date	☑	☐
Is archived in a format that does not permit alteration of the recorded image, so that the images can readily be authenticated	☑	☐

Describe how the video cameras will be placed to produce a clear view adequate to identify any individual inside the licensed premises, or within 20 feet of each entrance to the licensed premises:

There is 4K digital video of the interior and exterior of each entrance to the proposed licensed premises as well as to the interior of the inner security doors that will show very high resolution video images of anyone coming and going from the facility and also of each end of the flower room and main office and curing rooms that will also show clear view of the activities and people participating in those activities.

Describe the locked and secure area where video surveillance recording equipment and records will be housed and stored and how you will ensure the area is accessible only to authorized personnel, law enforcement, or an agent of the board:

Within the proposed licensed premises, behind the double layered exterior commercial security doors with Commercial Grade 1 deadbolts, is a separate small storage room behind the office that is lined on both sides with heavy gauge corrugated metal, vapor barrier and insulated to prevent undesirable climatic changes. All computer data storage devices will be located within this storage room and access to this storage room will be limited to the Grow Manager and/or the Grow Owner/Licensee. This room too has a Commercial Grade 1 deadbolt. Access to this small storage room will require the use of yet a third different unique four digit code to be entered into the keypad or use key provided only to Grow Manager and/or Grow Owner/Licensee. There is also a set of keys to all exterior security doors located with the fire department KnoxBox mounted to the exterior entrance to the proposed licensed premises.

Location of Surveillance Equipment and Video Surveillance Records:	Yes	No
Surveillance room or area is clearly defined on the premises diagram	☑	☐
Surveillance recording equipment and video surveillance records are housed in a designated, locked, and secure area or in a lock box, cabinet, closet or other secure area	☑	☐
Surveillance recording equipment access is limited to a marijuana establishment licensee or authorized employee, and to law enforcement personnel including an agent of the board	☑	☐
Video surveillance records are stored off-site	☑	☐

Business Records (3 AAC 306.755):

All licensed marijuana establishments must maintain, in a format that is readily understood by a reasonably prudent business person, certain business records. Applicants should be able to answer "Yes" to all items below.

Business Records Maintained and Kept on the Licensed Premises:	Yes	No
All books and records necessary to fully account for each business transaction conducted under its license for the current year and three preceding calendar years; records for the last six months are maintained on the marijuana establishment's licensed premises; older records may be archived on or off-premises	☑	☐
A current employee list setting out the full name and marijuana handler permit number of each licensee, employee, and agent who works at the marijuana establishment	☑	☐
The business contact information for vendors that maintain video surveillance systems and security alarm systems for the licensed premises	☑	☐
Records related to advertising and marketing	☑	☐
A current diagram of the licensed premises including each restricted access area	☑	☐
A log recording the name, and date and time of entry of each visitor permitted into a restricted access area	☑	☐
All records normally retained for tax purposes	☑	☐
Accurate and comprehensive inventory tracking records that account for all marijuana inventory activity from seed or immature plant stage until the retail marijuana or retail marijuana product is sold to a consumer, to another marijuana establishment, or destroyed	☑	☐
Transportation records for marijuana and marijuana product as required under 3 AAC 306.750(f)	☑	☐

Section 3 – Inventory Tracking of All Marijuana and Marijuana Product

Review the requirements under 3 AAC 306.730, and identify how the proposed establishment will meet the listed requirements.

All licensed marijuana establishments must use a marijuana inventory tracking system capable of sharing information with the system the board implements to ensure all marijuana cultivated and sold in the state, and each marijuana product processed and sold in the state, is identified and tracked from the time the marijuana propagated from seed or cutting, through transfer to another licensed marijuana establishment, or use in manufacturing a product, to a completed sale of marijuana or marijuana product, or disposal of the harvest batch of marijuana or production lot of marijuana product.

Applicants should be able to answer "Yes" to all items below.

Marijuana Tracking and Weighing:	Yes	No
A marijuana inventory tracking system, capable of sharing information with the system the board implements to ensure tracking for the reasons listed above, will be used	☑	☐
All marijuana delivered to a marijuana establishment will be weighed on a scale certified in compliance with 3 AAC 306.745	☑	☐

Describe the marijuana tracking system that you plan to use and how you will ensure that it is capable of sharing information with the system the board implements:

Our company intends to use the State appoved Franwell METRC inventory tracking system and will be connected remotely to their data systems and all new finished product will be added and recorded to the METRC inventory tracking system by the Close of Business each day. All flower products transported for sale to licensed retail stores will have transport manifests initiated by our company in the METRC inventory tracking system.

Form MJ-01: Marijuana Establishment Operating Plan

Section 4 – Employee Qualification and Training

Review the requirements under 3 AAC 306.700, and identify how the proposed establishment will meet the listed requirements.

A marijuana establishment and each licensee, employee, or agent of the marijuana establishment who sells, cultivates, manufactures, tests, or transports marijuana or a marijuana product, or who checks the identification of a consumer or visitor, shall obtain a marijuana handler permit from the board before being licensed or beginning employment at a marijuana establishment.

Applicants should be able to answer "Yes" to all items below.

Marijuana Hander Permit:	Yes	No
Each licensee, employee, or agent of the marijuana establishment who sells, cultivates, manufactures, tests, or transports marijuana or marijuana product, or who checks the identification of a consumer or visitor, shall obtain a marijuana handler permit from the board before being licensed or beginning employment at the marijuana establishment	☑	☐
Each licensee, employee, or agent who is required to have a marijuana handler permit shall keep that person's marijuana handler permit card in that person's immediate possession (or a valid copy on file on the premises of a retail marijuana store, marijuana cultivation facility, or marijuana product manufacturing facility) when on the licensed premises	☑	☐
Each licensee, employee, or agent who is required to have a marijuana handler permit shall ensure that that person's marijuana handler permit card is valid and has not expired	☑	☐

Describe how your establishment will meet the requirements for employee qualifications and training:

All licensees, employees, and agents will be required to present their Alaska Marijuana Handler Permit card at the time of initial entry to the proposed licensed facility and a copy of every individual's permit card and State issued photo identification will be made at that time and kept on file at the location of the proposed licensed premises.

We are satisfied with the overall general training that is encompassed within the State approved training our licensee, employees and agents will have been assured to have obtained through the requirements established for their Alaska Marijuana Handler Permits.

We intend to document best practices and procedures to be used internally for training our employees and tracking their progress in achieving the knowledge and experience we desire for our employees to obtain through their employment with our company. Each employee's internal and external training will be documented and tracked for the purpose of providing feedback to the employee through regular performance evaluations and to ensure each person working in our facility fully understands any precautions necessary to work safely .

Form MJ-01: Marijuana Establishment Operating Plan

Section 5 – Waste Disposal

Review the requirements under 3 AAC 306.740, and identify how the proposed establishment will meet the listed requirements.

Applicants should be able to answer "Yes" to the statement below.

Marijuana Waste Disposal:	Yes	No
The marijuana establishment shall give the board at least 3 days notice in the marijuana inventory tracking system required under 3 AAC 306.730 before making the waste unusable and disposing of it	☑	☐

Describe how you will store, manage, and dispose of any solid or liquid waste, including wastewater generated during marijuana cultivation, production, process, testing, or retail sales, in compliance with applicable federal, state, and local laws and regulations:

All solid and liquid waste will be managed by first documenting the dry weight for all solid waste and volume for liquid waste generated for each batch of plants and recording these weights and volumes as well as the final destination for disposal of the wastes once the waste have been made unusable. All liquid wastes generated in the cultivation of marijuana plants will be comingled and stored onsite in four large sealed wastewater storage tanks located on a covered concrete pad and not visible to the public. Liquid waste generated during the spring and summer will be beneficially reused to water our residential gardens and flower beds. During the winter and at any other time, if onsite storage of liquid waste reaches 80% of capacity, a SOA licensed local septic hauler will be contracted to pump off the liquid waste and dispose of in compliance with local, State, and Federal laws at a SOA ADEC licensed liquid waste disposal site in Anchorage operated by the Anchorage Water and Wastewater Utility. All dry solid plant wastes will be ground to less than one-half inch and mixed with equal amounts of either used cooking oil, frying greases and/or compostable food wastes to render the waste unusable. During the winter this solid waste will be stored onsite in sealed buckets awaiting later disposal in our onsite compost bin once ambient temperatures outside are above freezing and bacterial decomposition can occur. During the warmer times of the year the unusable solid waste will be mixed directly into the compost bin for later beneficial reuse as mulch for our vegetable gardens. Three days written notice will be given to the board prior to making any marijuana waste unusable and disposing of it.

Describe what material or materials you will mix with the ground marijuana waste to make it unusable:

Solid marijuana waste generated from this cultivation facility will be ground into small pieces and mixed with used cooking oil and grease, food waste and other biodegradable yard waste in a compost bin for later use as a outdoor gardening additive.

Form MJ-01: Marijuana Establishment Operating Plan

Marijuana waste must be rendered unusable for any purpose for which it was grown or produced before it leaves the marijuana establishment. Describe the process or processes that you will use to make the marijuana plant waste unusable:

Solid Marijuana Waste Disposal Plan

Three Days Written Notice will be given to the Marijuana Control Board prior to making any marijuana waste unusable and disposing of it.

Solid marijuana waste generated from this proposed Limited Marijuana Cultivation Facility will first be dried and then later processed through a grinder to reduce the nominal particle size to less than 1/2inch. Once the solid waste has been ground it will be mixed with equal amounts of either used cooking oil, frying greases and/or compostable food wastes to render it unusable. Once made unusable, during the summer months the marijuana waste will be mixed directly into our onsite compost bin for later beneficial reuse as mulch for growing vegetables. During the winter months the unusable marijuana waste may be stored onsite in sealed five-gallon buckets until spring time when warmer temperatures promote bacterial decomposition at which point the contents of all unusable marijuana waste buckets will be emptied into the compost bin and mixed with previously composted wastes.

Section 6 – Transportation and Delivery of Marijuana and Marijuana Products

Review the requirements under 3 AAC 306.750, and identify how the proposed establishment will meet the listed requirements.

Applicants should be able to answer "Yes" to all items below.

Marijuana Transportation:	Yes	No
The marijuana establishment from which a shipment of marijuana or marijuana product originates will ensure that any individual transporting marijuana shall have a marijuana handler permit required under 3 AAC 306.700	☑	☐
The marijuana establishment that originates the transport of any marijuana or marijuana product will use the marijuana inventory tracking system to record the type, amount, and weight of marijuana or marijuana product being transported, the name of the transporter, the time of departure and expected delivery, and the make, model, and license plate number of the transporting vehicle	☑	☐
The marijuana establishment that originates the transport of any marijuana or marijuana product will ensure that a complete printed transport manifest on a form prescribed by the board must be kept with the marijuana or marijuana product at all times during transport	☑	☐
During transport, any marijuana or marijuana product will be in a sealed package or container in a locked, safe, and secure storage compartment in the vehicle transporting the marijuana or marijuana product, and the sealed package will not be opened during transport	☑	☐
Any vehicle transporting marijuana or marijuana product will travel directly from the shipping marijuana establishment to the receiving marijuana establishment, and will not make any unnecessary stops in between except to deliver or pick up marijuana or marijuana product at any other licensed marijuana establishment	☑	☐
When the marijuana establishment receives marijuana or marijuana product from another licensed marijuana establishment, the recipient of the shipment will use the marijuana inventory tracking system to report the type, amount, and weight of marijuana or marijuana product received	☑	☐
The marijuana establishment will refuse to accept any shipment of marijuana or marijuana product that is not accompanied by the transport manifest	☑	☐

Describe how marijuana or marijuana product will be prepared, packaged, and secured for shipment:

All prepackaged product (buds and flowers) prepared for resale to consumers at a licensed marijuana retail store will first have been tested in accordance with requirements detailed in 3 AAC 306.645. In compliance with 3 AAC 306.470 (A)(1), Rock Hard Nugz AK will package cured and dried marijuana product in opaque, resealable, child-resistant packages not exceeding one ounce for resale to consumers without additional handling by the retail marijuana store except to add the retail marijuana store's own identifying name or logo and license number. Each of our packaged products will be preweighed on a scale registered with the State of Alaska in compliance with 3 AAC 306.745 and affixed with a label meeting the disclosure requirements of 3 AAC 306.475. All product prepared for transport to a licensed marijuana retail store will be placed in opaque, sealed and tamper evident shipping containers containing not more than five pounds and a label meeting the requirements under 3 AAC 306.475 affixed to the shipping container. A transport manifest from the METRC inventory tracking system will be generated by the cultivation facility prior to transport and shall remain with the shipment at all times until the shipment arrives at the licensed retail store and is transferred to their inventory tracking system.

Describe the type of locked, safe, and secure storage compartments that will be used in any vehicles transporting marijuana or marijuana product:

All our product will be transported within a locked and secure storage compartment made to go within the back of our 2000 Ford Excursion that will allow for the transport of between eighteen and twenty four of the sealed 5 gallon buckets containing our ready for sale flower products that have already cleared testing by a State licensed marijuana testing facility.

Section 7 – Signage and Advertising

Describe any signs that you intend to post on your establishment with your business name, including quantity and dimensions:

Due to the fact the proposed Limited Marijuana Cultivation Facility will be located in my home within a residential neighborhood, I do not intend to place any signs of any kind that would cause my home to be visually distinguishable as a marijuana cultivation facility. There is a Knox-Box located outside the exterior entrance to the licensed premises to hold keys to all locked security doors in the event of an emergency. This meets both the State of Alaska and the Central Mat-Su Fire Department Plan Approval requirements. I do intend to also place an appropriate sign where indicated by the fire department to facilitate easier location of the entrance to the proposed licensed premises during any potential future emergency responses.

If you are not applying for a retail marijuana store license, you do not need to complete the rest of Section 7, including Page 17.

Restriction on advertising of marijuana and marijuana products (3 AAC 306.360):

All licensed retail marijuana stores must meet minimum standards for signage and advertising.

Applicants should be able to answer "Agree" to all items below.

No advertisement for marijuana or marijuana product will contain any statement or illustration that:	Agree	Disagree
Is false or misleading	☐	☐
Promotes excessive consumption	☐	☐
Represents that the use of marijuana has curative or therapeutic effects	☐	☐
Depicts a person under the age of 21 consuming marijuana	☐	☐
Includes an object or character, including a toy, a cartoon character, or any other depiction designed to appeal to a child or other person under the age of 21, that promotes consumption of marijuana	☐	☐

Form MJ-01: Marijuana Establishment Operating Plan

Section 8 – Control Plan for Persons Under the Age of 21

Describe how the marijuana establishment will prevent persons under the age of 21 from gaining access to any portion of the licensed premises and marijuana items:

Our policy is that no persons under the age of 21 will be allowed entry into the proposed licensed premises. As detailed earlier in this Operating Plan, all employees, agents and visitor's to the facility must present their State issued photo ID for verification of identity and to ensure the minimum age of 21 is met for all persons entering the proposed licensed premises.

Adherence to the policy above along with ensuring all marijuana product is contained within a locked area within the restricted access areas of the proposed licensed premises will ensure there is no access to marijuana items by person's under the age of 21.

I declare under penalty of perjury that I have examined this form, including all accompanying schedules and statements, and to the best of my knowledge and belief find it to be true, correct, and complete.
