Alaska Marijuana Control Board

Operating Plan Supplemental

Form MJ-05: Marijuana Product Manufacturing Facility

What is this form?

This operating plan supplemental form is required for all applicants seeking a marijuana product manufacturing facility license and must accompany **Form MJ-01: Marijuana Establishment Operating Plan**, per 3 AAC 306.020(b)(11). Applicants should review **Chapter 306: Article 5** of the **Alaska Administrative Code.** This form will be used to document how an applicant intends to meet the requirements of the statutes and regulations.

If your business has a formal operating plan, you may include a copy of that operating plan with your application, but all fields of this form must still be completed per 3 AAC 306.020 and 3 AAC 306.520(3).

What additional information is required for cultivation facilities?

Applicants must identify how the proposed establishment will comply with applicable regulations regarding the following:

- Equipment, compounds, and processes to be used
- Waste disposal
- Testing procedure and protocols
- Proposed marijuana concentrates and marijuana products
- Proposed product packaging and sample labels
- Prohibitions

This form must be completed and submitted to AMCO's main office before any new or transfer application for a marijuana product manufacturing facility or marijuana concentrate manufacturing facility license will be considered complete.

Section 1 – Establishment Information

Enter information for the business seeking to be licensed, as identified on the license application.

Licensee:	Tundra Farm 1 Inc.	**MJ License #:**		18706	
License Type:	Marijuana Product Manufacturing Facility				
Doing Business As:	Tundra Farms				
Premises Address:	1210 E. 70th Ave. #3				
City:	Anchorage	**State:**	Alaska	**ZIP:**	99518

Received by AMCO 1.25.19

Section 2 – Overview of Operations

2.1. Provide an overview of your proposed facility's operations. Include information regarding the intake, flow, and transfer of marijuana, marijuana concentrate, and marijuana product at and from your premises:

All shipments of marijuana and marijuana product that arrives at the facility will be first inspected by a member of the Tundra Farms management team before it is accepted and added to the facility's inventory. The shipment will be reconciled with the transport manifest, shipment labels and packaging labels to ensure consistency. All product will be weighed by Tundra Farms and reconciled with the weight listed on the manifest and labels. Any shipments with discrepancies will be rejected. Shipments that pass initial inspection will be accepted into the facility, entered into Metrc and added to the facility's inventory. All marijuana and marijuana products will be tracked from the time it is received, to it's use in a manufactured product or disposal to it's transfer to another licensed facility. Tundra Farms' management team will reconcile each transaction to another licensed facility with Metrc and the inventory on hand to ensure consistency and to resolve discrepancies immediately. A random sample of each product manufactured at the facility will be sent to a licensed testing lab before being transferred to another licensed facility and the remainder of the production lot will be segregated from all other product until the testing results are received. Once passing testing results are received from the testing lab, marijuana products will be packaged and labeled in compliance with 3 AAC 306.565 and 3 AAC 306.570. The packaged products will then be transported by an agent of Tundra Farms who holds a valid marijuana handler permit or by a third party transport company with valid marijuana handler permits. All transfers will be entered into Metrc and a trip manifest will be sent with each shipment as well as stored on site as a business record.

Section 3 – Equipment and Compounds to be Used

Review the requirements under 3 AAC 306.555.

3.1. Describe the equipment and solvents, gases, chemicals, and other compounds the marijuana product manufacturing facility will use to create marijuana concentrates:

The following equipment will be used:
- closed loop system, hydraulic heat press, micron filters, vacuum chamber/oven, terpene distillation, short path distillation
- rosin Press- Rosintech 20ton press with air compressor
- closed loop extractor- BHOgart 12" - 2 tube setup-Recovery pump- master vapor 6CFM
- vacuum Oven 7.3 cuft.
- BHOgart Rotary Evaporator 20L kit

The following solvents will be used:
- butane, propane, ethanol, Isopropyl alcohol, CO2, | CH3CHOHCH3 or (CH3)2CHOH or C3H8O)

The following gases and chemicals to be used:
- CO2
- Isopropyl Alcohol

Received by AMCO 1.25.19

Section 4 – Waste Disposal

Review the requirements under 3 AAC 306.740.

You must be able to certify the statement below. Read the following and then sign your initials in the box to the right: Initials

4.1. The marijuana product manufacturing facility shall give the board at least three days written notice required under 3 AAC 306.740(c) before making marijuana waste unusable and disposing of it. DR

4.2. Describe how you will store, manage, and dispose of any solid or liquid marijuana waste, including expired or outdated marijuana or marijuana product, in compliance with any applicable laws. Include details about the material(s) you will mix with ground marijuana waste and the processes that you will use to make the marijuana waste unusable for any purpose for which it was grown or produced:

Tundra Farms anticipates the following marijuana plant and product waste at the manufacturing facility; (1) contaminated or infected marijuana or marijuana products; (2) marijuana or marijuana products deemed by Danny or a manager as unfit for sale or consumption for any reason; (3) marijuana product that fails testing; (4) marijuana plant waste created during the extraction process; (5) marijuana or marijuana product that becomes expired; and (6) other marijuana or marijuana product waste as determined by the board or director. Once marijuana or marijuana product is deemed as waste, it will be separated from all other marijuana and marijuana products and securely stored in locked bins or containers on the licensed premises and an email notification will be sent to AMCO Enforcement at least three (3) days prior to rendering the waste unusable as well as recording the waste in Metrc. All solid marijuana plant waste (plant matter waste from the extraction process such as plant matter that is pressed/squeezed to extract oil) and marijuana product waste will be ground in a grinder and then mixed with other solid compostable or noncompostable waste until the mixture is no more than 50% marijuana waste. Liquid marijuana waste such as concentrates, will be mixed with at least equal parts of non-marijuana waste and then stored away from all other marijuana and marijuana products in locked containers on the premises. The municipal waste truck will collect the waste mixture and dispose of it at the local waste station. During phases of small waste batches, Danny or the general manager may dispose of the unusable waste in their outdoor compost. This information will be recorded in the disposal log and securely stored as a business record, available to AMCO upon request. The logged information will be available to AMCO at any time upon request.

Received by AMCO 1.25.19

Section 5 – Testing Procedure and Protocols

Review the requirements under 3 AAC 306.520 and 3 AAC 306.550.

You must be able to certify the statement below. Read the following and then sign your initials in the box to the right: Initials

5.1. I will ensure that any individual responsible for collecting random samples for required laboratory testing under 3 AAC 306.455 will prepare the necessary accompanying signed statement, provide the signed statement to the marijuana testing facility, and maintain a copy as a business record under 3 AAC 306.755. DK

Answer "Yes" or "No" to the following question: Yes No

5.2. Will the marijuana product manufacturing facility be performing in-house testing (as defined under 3 AAC 306.990(b)(20)? ☐ ☒

If "Yes" to 6.2, you must be able to certify the statement below. Read the following and then sign your initials in the box: Initials

5.3. The area where in-house testing will occur is clearly identified on the Form MJ-02: Premises Diagram that is submitted with this application. DA

5.4. Describe the testing procedures and protocols the marijuana product manufacturing facility will follow:

A designated employee of Tundra Farms will collect a random sample from each production lot to be sent to a licensed testing facility. The designated employee will sign a statement certifying that the sample was taken at random. One copy of the statement will be sent to the testing lab and one will be filed on-site as a business record available to AMCO upon request. The sample will be transported to the testing facility by a Tundra Farms agent who holds a valid marijuana handler permit or by a third party transport company holding valid handler permits. The remainder of the production lot will be kept separate from all other marijuana and marijuana products until the testing results are received back from the testing lab. During this quarantine period, the product will be securely stored on-site and the Tundra Farms general manager or Danny will ensure the product is kept cool and dry to prevent contamination or loss of efficacy. A copy of the testing results will be stored on-site as an official business record, available to AMCO upon request.

Section 6 – Proposed Marijuana Concentrates and Marijuana Products

Review the requirements under 3 AAC 306.520, 3 AAC 306.525, and 3 AAC 306.560.

Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.

Product Name:	Shatter		
Product Type:	Concentrate		
Perishable: Yes/No	Yes	**Shelf Life:** If perishable.	Up to 1 year when stored in freezer/refrigerator

Product Description: Details must include the color, shape, and texture.	The color of shatter will range from light yellow to golden brown depending on the strain of marijuana used and will then be broken into pieces with the general shape of a square. Shatter is smooth and brittle when cold, and soft and pliable when warm.
Ingredients: This box is not applicable to marijuana concentrates.	
Standard Production Procedure and Detailed Manufacturing Process:	Shatter will be made by extracting cannabis oil (also known as BHO) through a closed loop system with a butane/propane solvent. The solvent will then be boiled out of the cannabis oil through a vacuum oven to create the final shatter product.
Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.	

Received by AMCO 1.25.19

Section 7 – Proposed Product Packaging and Sample Labels

Review the requirements under 3 AAC 306.520, 3 AAC 306.565, and 3 AAC 306.570.

Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.

Product Name:	Shatter
Product Type:	Concentrate

Packaging Description: Details must include the color(s), size, packaging materials used, total amount of THC, individual serving sizes (if multiple), and other specifics showing compliance with 3 AAC 306.565. Please include photos, drawings, or graphic representations.	One gram pieces of shatter will be placed into 1ml plastic or glass sealed containers and then placed into a black paperboard box with a tamper seal. The total amount of THC will range from 40-99%. The actual amount of total THC will be listed on the label per testing results. The box is then to be placed into a child-resistant exit bag by the retailer before the customer exits the store.  
Sample Labels: Provide sample labels showing how the labeling requirements set forth in 3 AAC 306.570 will be met.	**Produced By:** Tundra Farms **License Number:** 18706 **Product Name:** Shatter **Strain:** **Batch/Lot Number:** **Gross Weight:** **Net MJ Weight:** **Best By Date:** **Packaging Date:** **Tested By:** **License Number:** **Total THC:** **THCA:** **CBD:** **CBDA:** **CBN:** **Microbial Test:** **Pesticides:** **Herbicides:** **Fungicides:** **Residual Solvent Test:** **Contaminants Test Result:** Retailer: License Number: **Alaska Safety Warning**: *Marijuana has intoxicating effects and may be habit forming and addictive. Marijuana impairs concentration, coordination and judgment. Do not operate a vehicle or machinery under its influence. There are health risks associated with consumption of marijuana. For use only by adults twenty-one and older. Keep out of the reach of children. Marijuana should not be used by women who are pregnant or breast feeding.* ***Keep Refrigerated***

Received by AMCO 1.25.19

Section 6 – Proposed Marijuana Concentrates and Marijuana Products

Review the requirements under 3 AAC 306.520, 3 AAC 306.525, and 3 AAC 306.560.

Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.

Product Name:	Bubble Hash		
Product Type:	Concentrate		
Perishable: Yes/No	Yes	**Shelf Life:** If perishable.	Up to 1 year when stored in freezer/refrigerator

Product Description: Details must include the color, shape, and texture.	The color of bubble hash will range from light yellow, golden amber, to brown depending on the strain of marijuana used. Bubble hash is soft and comparable to clay.
Ingredients: This box is not applicable to marijuana concentrates.	
Standard Production Procedure and Detailed Manufacturing Process:	Either ground marijuana or whole marijuana flower is put into buckets lined with mesh screens. Ice water or dry ice is then added to the buckets and the mixture is manually agitated. Once the ice melts or the dry ice achieves desired reaction, the screens are removed and the concentrate is manually separated from the screens. The hash is then allowed to air dry.
Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.	

Received by AMCO 1.25.19

Section 7 – Proposed Product Packaging and Sample Labels

Review the requirements under 3 AAC 306.520, 3 AAC 306.565, and 3 AAC 306.570.
Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.

Product Name:	Bubble Hash
Product Type:	Concentrate

Packaging Description:
Details must include the color(s), size, packaging materials used, total amount of THC, individual serving sizes (if multiple), and other specifics showing compliance with 3 AAC 306.565. Please include photos, drawings, or graphic representations.

Bubble Hash will be placed into 1ml plastic or glass sealed containers and then placed into a black paperboard box with a tamper seal. Containers will contain either .5, 1, 3, 5 or 7 grams of hash. The total amount of THC will range from 60-90%. The actual amount of total THC will be listed on the label per testing results. The box is then to be placed into a child-resistant exit bag by the retailer before the customer exits the store.

Sample Labels:
Provide sample labels showing how the labeling requirements set forth in 3 AAC 306.570 will be met.

Section 6 – Proposed Marijuana Concentrates and Marijuana Products

Review the requirements under 3 AAC 306.520, 3 AAC 306.525, and 3 AAC 306.560.

Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.

Product Name:	Vape Cartridges		
Product Type:	Distillate		
Perishable: Yes/No	Yes	**Shelf Life:** If perishable.	Up to 1 year when stored in freezer/refrigerator

Product Description: Details must include the color, shape, and texture.	The color of distillate will range from translucent yellow to a dark amber red depending on the strain of marijuana used. Distillate is thick and sticky comparable to honey.
Ingredients: This box is not applicable to marijuana concentrates.	
Standard Production Procedure and Detailed Manufacturing Process:	BHO or cannabis oil will be put through a Short Path Distillation to further isolate and purify the cannabis oil. First the terpenes/impurities/lipids will be separated from the BHO cannabis oil by heating the cannabis oil in a boiling flask. The vapor then passes through the condensing head (turning the vapor to a liquid) and collects in the collection flask, isolating THC. This distillate oil will be loaded into vape cartridges at the Tundra Farms manufacturing facility.
Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.

Section 6 – Proposed Marijuana Concentrates and Marijuana Products

Review the requirements under 3 AAC 306.520, 3 AAC 306.525, and 3 AAC 306.560.
Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.

Product Name:	Rosin		
Product Type:	Concentrate		
Perishable: Yes/No	Yes	**Shelf Life:** If perishable.	Up to 1 year when stored in freezer/refrigerator

Product Description: Details must include the color, shape, and texture.	Color will vary between translucent to dark brown. The texture will vary from a sticky sap like consistency to a smooth consistency, similar to pressed glass.
Ingredients: This box is not applicable to marijuana concentrates.	
Standard Production Procedure and Detailed Manufacturing Process:	Rosin will be made using pnematic/hydraulic presses to heat and pressurize dried marijuana, pressing the concentrates out of the marijuana plant material. The marijuana plant material is disposed of and the concentrate is then removed from the press and placed onto parchment paper.
Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.

Section 8 – Prohibitions

Review the requirements under 3 AAC 306.510.

8.1. I certify that the marijuana product manufacturing facility will not: Initials

a. **sell, deliver, distribute, or transfer any marijuana, marijuana concentrate, or marijuana product directly to a consumer, with or without compensation;** DK

b. **allow any person, including a licensee, employee, or agent, to consume marijuana, marijuana concentrate, or marijuana product on the licensed premises; or** DK

c. **manufacture or sell any product that is an adulterated food or drink, closely resembles a familiar food or drink item including candy, or is packaged to look like candy, or in bright colors or with cartoon characters or other pictures or images that would appeal to children.** DK

I declare under penalty of unsworn falsification that this form, including all accompanying schedules and statements, is true, correct, and complete.
