Alaska Marijuana Control Board

Operating Plan Supplemental
Form MJ-05: Marijuana Product Manufacturing Facility

What is this form?

This operating plan supplemental form is required for all applicants seeking a marijuana product manufacturing facility license and must accompany the **Marijuana Establishment Operating Plan (Form MJ-01)**, per 3 AAC 306.020(b)(11). Applicants should review **Chapter 306: Article 5** of the **Alaska Administrative Code.** This form will be used to document how an applicant intends to meet the requirements of those regulations. If your business has a formal operating plan, you may include a copy of that operating plan with your application, but all fields of this form must still be completed per 3 AAC 306.020 and 3 AAC 306.520(3).

What additional information is required for product manufacturing facilities?

Applicants must identify how the proposed establishment will comply with applicable regulations regarding the following:

- Prohibitions
- Equipment, compounds, and processes to be used
- Proposed marijuana concentrates and marijuana products
- Proposed product packaging and sample labels
- Waste disposal plan
- Testing

This form must be submitted to AMCO's main office before any marijuana product manufacturing facility license application will be considered complete.

Section 1 – Establishment Information

Enter information for the business seeking to be licensed, as identified on the license application.

Licensee:	Baked Alaska LLC	**License Number:**	15800		
License Type:	Marijuana Product Manufacturing Facility				
Doing Business As:	Baked Alaska LLC				
Premises Address:	2745 Hanson Road, Unit B				
City:	Fairbanks	**State:**	ALASKA	**ZIP:**	99709

Alaska Marijuana Control Board

Operating Plan Supplemental
Form MJ-05: Marijuana Product Manufacturing Facility

Section 2 – Prohibitions

Applicants should review 3 AAC 306.510 and be able to answer "Agree" to all items below.

The marijuana product manufacturing facility will not:	Agree	Disagree
Sell, deliver, distribute, or transfer any marijuana, marijuana concentrate, or a marijuana product directly to a consumer, with or without compensation	☑	☐
Allow any person, including a licensee, employee, or agent, to consume marijuana, marijuana concentrate, or a marijuana product on its licenses premises	☑	☐

The marijuana product manufacturing facility will not manufacture or sell any product that:	Agree	Disagree
Is an adulterated food or drink	☑	☐
Closely resembles a familiar food or drink item including candy	☑	☐
Is packaged to look like candy, or in bright colors or with cartoon characters or other pictures or images that would appeal to children	☑	☐

Section 3 – Equipment, Compounds, and Processes to be Used

Review the requirements under 3 AAC 306.555, and identify how the proposed premises will meet the listed requirements.

Describe the equipment and solvents, gases, chemicals, and other compounds the marijuana product manufacturing facility will use to create marijuana concentrates:

Baked Alaska LLC will use a crockpot to create our concentrates (cannabutter and cannaoil). The cannabutter process involves combining butter and decarboxylated marijuana in a crockpot and heating to a temperature ranging from 185 F to 240F for approximately 4-10 hours. The cannaoil process will be the same as the cannabutter process. These base concentrates are not for retail sale and will be used in our recipes to make edible products for retail sale.

Alaska Marijuana Control Board

Operating Plan Supplemental

Form MJ-05: Marijuana Product Manufacturing Facility

Describe the processes to be used to create marijuana concentrates:

Cannabis infused butter, otherwise known as cannabutter, and cannabis infused coconut oil, otherwise known as cannaoil, will be primary ingredients in many of our baked products.

Cannabutter process:
We will decarboxylate cannabis by heating it in a convection oven at a temperature of 225-240 degrees F for approximately 20-40 minutes. The decarboxylated cannabis will be combined with butter and heated to 185-225 degrees F using a crockpot for approximately 4-6 hours. We will use approx. 1oz of decarboxylated cannabis for every 16oz of butter. Then the mixture will be strained through cheesecloth, resulting in cannabis infused butter that will be used in our prouducts. A sample of the cannabis infused butter will be sent to a testing lab to be tested. We will also perform in-house testing. The cannabutter will be poured into plastic containers, labeled and stored in a secure refrigerator or freezer until the test results are received. The remaining marijuana material will be discarded. The marijuana plant waste, including roots, stalks, leaves, and stems that have not been processed with solvent will be made unusable by grinding the marijuana plant waste and mixing it with at least an equal amount of other compostable or non-compostable materials such as food waste, paper, plastic. It will be stored in a secure area before being transported to the FNSB landfill.

Cannaoil process: will use the same process as cannabutter process.
We will decarboxylate cannabis by heating it in a convection oven at a temperature of 225-240 degrees F for approximately 20-40 minutes. The decarboxylated cannabis will be combined with coconut oil and heated to 185-225 degrees F using a crockpot for approximately 4-6 hours. We will use 1oz of decarboxilated cannabis for every 16oz of coconut oil. Then the mixture will be strained through cheesecloth, resulting in cannabis infused oil that will be used in our baked goods. A sample of the cannabis infused oil will be sent to a testing lab to be tested. We will also perform in-house testing. The cannaoil will be poured into plastic containers, labeled and stored in a secure refrigerator or freezer until the test results are received. The remaining marijuana material will be discarded. The marijuana plant waste, including roots, stalks, leaves, and stems that have not been processed with solvent will be made unusable by grinding the marijuana plant waste and mixing it with at least an equal amount of other compostable or non-compostable materials such as food waste, paper, plastic. It will be stored in a secure area before being transported to the FNSB landfill.

Section 4 – Proposed Marijuana Concentrates and Marijuana Products

Review the requirements under 3 AAC 306.520 - 3 AAC 306.525 and 3 AAC 306.560, and identify how the proposed establishment will meet the listed requirements. **Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.**

Product Name:	Cannaoil
Type:	Cannabis infused coconut oil

Product Description: Details must include the color, shape, and texture.	The color of the cannabis coconut oil will be green. The texture will be smooth. The cannabis coconut oil will be stored in a plastic container in a secure refrigerator or freezer. It will be the shape of the plastic container.

Ingredients: This box is not applicable to marijuana concentrates	Coconut oil, cannabis.

Standard Production Procedure and Detailed Manufacturing Process:	Bake the cannabis in a convection oven at a low heat. Combine the cannabis with coconut oil and heat in a crockpot at a low heat for several hours. Strain the cannabis from the oil. Discard the cannabis. A sample of the cannabis infused coconut oil will be sent to a testing lab. We will also perform in-house testing.

Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.

Section 4 – Proposed Marijuana Concentrates and Marijuana Products

Review the requirements under 3 AAC 306.520 - 3 AAC 306.525 and 3 AAC 306.560, and identify how the proposed establishment will meet the listed requirements. **Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.**

Product Name:	Chocolate Chip Cookie
Type:	Edible

Product Description: Details must include the color, shape, and texture.	Approximately 2"x 2" round, flat shape, medium to dark brown with dark brown spots, soft, chewy texture.

Ingredients: This box is not applicable to marijuana concentrates	All-purpose flour, chocolate chips, butter, brown sugar, granulated sugar, eggs, vanilla extract, salt, baking soda, cannabis extract (cannabutter). Contains, eggs, wheat processed on equipment used to process nuts.

Standard Production Procedure and Detailed Manufacturing Process:	The cookies will be produced using the cannabutter once all testing reports have been received. A batch will be produced in the following manner: Cream together the cannabutter and regular butter, white sugar, and brown sugar until smooth. Beat in the eggs one at a time, then stir in the vanilla. Dissolve baking soda in hot water. Add to batter along with salt. Stir in flour, chocolate chips. Shape dough into 1" balls and place on a parchment lined cookie sheet, 2" apart. Bake in a 350 degree oven for 10 minutes or until edges are nicely browned. Cool slightly then move onto a cooling rack and allow to cool completely. A sample from this batch will be sent to a marijuana testing facility with a travel manifesto. This batch will be packaged, labeled with a METRC label, and stored in locked, secure storage room. Once the sample is cleared through the testing facility, labels will be made and placed on the packaged cookies and stored in locked, secured storage room until sent to retail stores.

Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.

Product Description: Details must include the color, shape, and texture.	Approximately 2"x 2" round, flat shape with a crisscross pattern on top, medium to golden brown, soft, chewy texture.

Ingredients: This box is not applicable to marijuana concentrates	All-purpose flour, peanut butter, brown sugar, granulated sugar, eggs, baking soda, baking powder, salt, cannabis extract (cannabutter). Contains eggs, wheat processed on equipment used to process nuts.

Standard Production Procedure and Detailed Manufacturing Process:	The cookies will be produced using the cannabutter once all testing reports have been received. A batch will be produced in the following manner: Cream together the cannabutter, sugars, and peanut butter until smooth. Beat in the eggs one at a time. Stir in flour, baking powder, baking soda and salt. Refrigerate dough for one hour. Shape dough into 1" balls, flatten each ball with a fork, making a crisscross patter and place on a parchment lined cookie sheet, 2" apart. Bake in a 375 degree oven for 10 minutes or until edges are nicely browned. Cool slightly then move onto a cooling rack and allow to cool completely. A sample from this batch will be sent to a marijuana testing facility with a travel manifesto. This batch will be packaged, labeled with a METRC label, and stored in locked, secure storage room. Once the sample is cleared through the testing facility, labels will be made and placed on the packaged cookies and stored in locked, secured storage room until sent to retail stores.

Section 5 – Proposed Product Packaging and Sample Labels

Review the requirements under 3 AAC 306.520 and 3 AAC 306.565 – 3 AAC 306.570, and identify how the proposed establishment will meet the listed requirements. **Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.**

Product Name:	Peanut Butter Cookie
Type:	Edible

Packaging Description: Details must include the color(s), size, packaging materials used, total amount of THC, individual serving sizes (if multiple), and other specifics showing compliance with 3 AAC 306.565. Attached photos, drawings, or graphic representations are preferred.	Products will be packaged in child-proof, metallized zipper pouch bags (approx. 6" x 9") that offer a high barrier with an airtight, resealable zip closure. They are smell proof, food safe and heat sealable. They will be black in color and will have Baked Alaska LLC labels in compliance with 3 AAC 306.565. Each cookie will be individually wrapped with a label that will state 1 cookie = 1 serving = 5mg thc. Package options: 1 cookie = 1 serving = 5mg, 5 servings = 25mg.

Sample Labels: Provide sample labels showing how the labeling information required in 3 AAC 306.570 will be set out.	See next page. Sample package shows 5 servings.

Product Name:	Chocolate Peanut Butter Cup
Type:	Edible

Product Description: Details must include the color, shape, and texture.	Approximately 1.25"x 1.25" x .75" round muffin shape, dark brown with light orange brown interior, soft, chewy texture.

Ingredients: This box is not applicable to marijuana concentrates	Peanut butter, salt, confectioners' sugar, milk chocolate, salt, cannabis extract (cannabutter). Contains milk.

Standard Production Procedure and Detailed Manufacturing Process:	The chocolate peanut butter cups will be produced using the cannabutter once all testing reports have been received. Melt chocolate. Spoon melted chocolate into muffin cups, filling half way. With a spoon, draw the chocolate up the sides until evenly coated. Cool in refrigerator until firm. Mix together peanut butter, sugar and cannabutter. Divide into the chocolate cups. Pour melted chocolate over peanut butter mixture and spread to edges. Let cool. A sample from this batch will be sent to a marijuana testing facility with a travel manifesto. This batch will be packaged, labeled with a METRC label, and stored in locked, secure storage room. Once the sample is cleared through the testing facility, labels will be made and placed on the packaged chocolate peanut butter cups and stored in locked, secured storage room until sent to retail stores.

Product Name:	Salted Caramel Chews
Type:	Edible

Product Description: Details must include the color, shape, and texture.	Approximately 1.5" x .5", rectangle shape, golden orange caramel color, chewy texture.

Ingredients: This box is not applicable to marijuana concentrates	Sugar, corn syrup, heavy cream, sea salt, vanilla extract, cannabutter.

Standard Production Procedure and Detailed Manufacturing Process:	The salted caramel chews will be produced using the cannabutter once all testing reports have been received. In a medium size pot, combine sugar, corn syrup, heavy cream and cannabutter. Stir until it reaches a temperature of 250 degrees F. Remove pot from heat. Stir in vanilla. Transfer mixture to a parchment lined pan, sprinkle with salt and let cool completely. When cooled, cut into 1.5" long rectangles and wrap. A sample from this batch will be sent to a marijuana testing facility with a travel manifesto. This batch will be packaged, labeled with a METRC label, and stored in locked, secure storage room. Once the sample is cleared through the testing facility, labels will be made and placed on the packaged salted caramels and stored in locked, secured storage room until sent to retail stores.

NET WEIGHT
4.75 oz.

EDIBLES 101

GO LOW & SLOW
If you are new to edibles, one serving is enough to feel the effects of marijuana—it may take 30 to 90 minutes. Be patient and don't eat more before you feel the full effect.

GET COMFORTABLE
Enjoy edibles in a safe environment.
Effects tend to last between 4 & 6+ hours.

BE SMART
Avoid mixing edibles with alcohol.
Don't consume on an empty stomach and DON'T drive.

LOCK IT UP
Keep out of reach of children & pets.

Salted Caramel Chews

INGREDIENTS: sugar, corn syrup, heavy cream, sea salt, vanilla extract, cannabis-infused butter.

Contains milk.

WARNING: Marijuana has intoxicating effects and may be habit forming and addictive. Marijuana impairs concentration, coordination, and judgement. Do not operate a vehicle or machinery under its influence. There are health risks associated with consumption of marijuana. For use only by adults twenty-one and older. Keep out of the reach of children. Marijuana should not be used by women who are pregnant or breast feeding.

Section 6 – Proposed Marijuana Concentrates and Marijuana Products

Review the requirements under 3 AAC 306.520, 3 AAC 306.525, and 3 AAC 306.560.

Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.

Product Name:	Rosemary & Sea Salt Cracker		
Product Type:	Edible		
Perishable: Yes/No	Yes	**Shelf Life:** If perishable.	6 months
Product Description: Details must include the color, shape, and texture.	Approximately 2" x 2" square shape, golden and light tan in color with green specks, soft, chewy texture.		
Ingredients: This box is not applicable to marijuana concentrates.	All-purpose flour, Parmesan cheese, butter, rosemary, sea salt, black pepper, heavy cream, cannabis extract (cannabutter).		
Standard Production Procedure and Detailed Manufacturing Process:	Combine the flour, Parmesan, rosemary, pepper and salt in a food processor; pulse to combine. Add the butter and cannabutter and pulse until incorporated. Add the heavy cream and process until the dough forms a ball. On a lightly floured work surface, the dough will be rolled out into a flat rectangle. The dough will be cut into appoximaley 2" x 2" squares (1/8 to 1/4" thick), pierced with small holes and transferred to a baking sheet. Then sprinkled with sea salt. They will be baked in a 400 F oven until light golden brown. A sample from this batch will be sent to a marijuana testing facility with a travel manifesto. This batch will be packaged, labeled with a METRIC label, and stored in a locked, secure storage room. Once the sample is cleared through the testing facility, lables will be made and placed on the packaged crackers and stored in a locked and secure storage room until sent to retail stores.		
Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.

Product Name:	Healing Body Balm		
Product Type:	Topical		
Perishable: Yes/No	no	**Shelf Life:** If perishable.	

Product Description: Details must include the color, shape, and texture.	Light green in color, glossy, wax-like texture. The shape will be round because it will be packaged in a round tin.
Ingredients: This box is not applicable to marijuana concentrates.	Our body balm is made with essential oils of copaiba, lemongrass, cinnamon, peppermint, lavender, vanilla & clove blended with cocoa butter, shea butter, emu oil, bee's wax, and coconut oil infused with THC and CBD.
Standard Production Procedure and Detailed Manufacturing Process:	Place shaved beeswax in a pan over low heat until melted. Add essential oils, cocoa butter, shea butter, emu oil, and cannoil (coconut oil infused with THC and CBD) and combine by gently stirring. Pour mixure into tins and let solidify at room temperature. A sample from this batch will be sent to a marijuana testing facility with a travel manifesto. This batch will be packaged, labeled with a METRIC label, and stored in a locked, secure storage room. Once the sample is cleared through the testing facility, lables will be made and placed on the packaged body balm and stored in a locked and secure storage room until sent to retail stores.
Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.

Operating Plan Supplemental

Form MJ-05: Marijuana Product Manufacturing Facility

Section 6 – Waste Disposal Plan

Review the requirements under 3 AAC 306.520, and identify how the proposed premises will meet the listed requirements.

Describe the marijuana product manufacturing facility's plan for disposal of any expired or outdated marijuana or marijuana product that is not sold or transferred to another licensed marijuana establishment:

Expired or outdated marijuana or marijuana product will be considered waste and kept in a separate locked container inside the facility and will be rendered unusable by grinding it with equal amounts of other non-marijuana waste (food waste, paper, plastic) before being transported to the FNSB landfill.
