Alaska Marijuana Control Board

Operating Plan Supplemental

Form MJ-05: Marijuana Product Manufacturing Facility

What is this form?

This operating plan supplemental form is required for all applicants seeking a marijuana product manufacturing facility license and must accompany **Form MJ-01: Marijuana Establishment Operating Plan**, per 3 AAC 306.020(b)(11). Applicants should review **Chapter 306: Article 5** of the **Alaska Administrative Code.** This form will be used to document how an applicant intends to meet the requirements of the statutes and regulations.

If your business has a formal operating plan, you may include a copy of that operating plan with your application, but all fields of this form must still be completed per 3 AAC 306.020 and 3 AAC 306.520(3).

What additional information is required for cultivation facilities?

Applicants must identify how the proposed establishment will comply with applicable regulations regarding the following:

- Equipment, compounds, and processes to be used
- Waste disposal
- Testing procedure and protocols
- Proposed marijuana concentrates and marijuana products
- Proposed product packaging and sample labels
- Prohibitions

This form must be completed and submitted to AMCO's main office before any new or transfer application for a marijuana product manufacturing facility or marijuana concentrate manufacturing facility license will be considered complete.

Section 1 – Establishment Information

Enter information for the business seeking to be licensed, as identified on the license application.

Licensee:	CC Enterprises, Inc.	**MJ License #:**	20532		
License Type:	Marijuana Product manufacturing Facility				
Doing Business As:	CULTIVATED CONFECTIONS				
Premises Address:	7731 Schoon Street, Unit A				
City:	Anchorage	**State:**	Alaska	**ZIP:**	99518

Received by AMCO 4.2.19

Section 2 – Overview of Operations

2.1. Provide an overview of your proposed facility's operations. Include information regarding the intake, flow, and transfer of marijuana, marijuana concentrate, and marijuana product at and from your premises:

All shipments of marijuana and marijuana product that arrives at the facility will be first inspected by a member of the Cultivated Confections management team before it is accepted and added to the facility's inventory. The shipment will be reconciled with the transport manifest, shipment labels and packaging labels to ensure consistency. All product will be weighed by Cultivated Confections and reconciled with the weight listed on the manifest and labels. Any shipments with discrepancies will be rejected. Shipments that pass initial inspection will be accepted into the facility, entered into METRC and the point of sale software and added to the store's inventory. All marijuana and marijuana products will be tracked from the time it is received, to it's use in a manufactured product or disposal to it's transfer to another licensed facility. Cultivated Confections management team will perform daily internal audits by reconciling each transaction to another licensed facility with METRC and the inventory on hand to ensure consistency and to resolve discrepancies immediately. A random sample of each product manufactured at the facility will be sent to a licensed testing lab before being transferred to another licensed facility and the remainder of the production lot will be segregated from all other product until the testing results are received. Once passing testing results are received from the testing lab, marijuana products will be packaged and labeled in compliance with 3 AAC 306.565 and 306.570. The packaged products will then be transported by an agent of Cultivated Confections who holds a valid marijuana handler permit or by a third party transport company with valid marijuana handler permits. All transfers will be entered into METRC and a trip manifest will be sent with each shipment as well as stored on site as a business record.

Section 3 – Equipment and Compounds to be Used

Review the requirements under 3 AAC 306.555.

3.1. Describe the equipment and solvents, gases, chemicals, and other compounds the marijuana product manufacturing facility will use to create marijuana concentrates:

The following equipment will be used to create concentrates:
- Chest freezer
- Small clothes washer (used as water bath for Bubble Hash)
- Small micro filter bags
- Freeze Dryer
- Rosin Press
- Wipe-film molecular still

No chemicals, solvents, or gases will be used at the marijuana product manufacturing facility to create concentrates.

Received by AMCO 4.2.19

Section 4 – Waste Disposal

Review the requirements under 3 AAC 306.740.

You must be able to certify the statement below. Read the following and then sign your initials in the box to the right: Initials

4.1. The marijuana product manufacturing facility shall give the board at least three days written notice required under 3 AAC 306.740(c) before making marijuana waste unusable and disposing of it.

4.2. Describe how you will store, manage, and dispose of any solid or liquid marijuana waste, including expired or outdated marijuana or marijuana product, in compliance with any applicable laws. Include details about the material(s) you will mix with ground marijuana waste and the processes that you will use to make the marijuana waste unusable for any purpose for which it was grown or produced:

Cultivated Confections anticipates the following marijuana plant and product waste at the manufacturing facility; (1) contaminated or infected marijuana or marijuana products (2) marijuana or marijuana products deemed by the licensee or a manager as unfit for sale or consumption for any reason (3) marijuana product that fails testing (4) marijuana plant waste created during the extraction process (5) marijuana or marijuana product that becomes expired (6) other marijuana or marijuana product waste as determined by the board or director. Once marijuana or marijuana product is deemed as waste, it will be separated from all other marijuana and marijuana products and securely stored in locked bins on the licensed premises and an email notification will be sent to AMCO Enforcement at least 3 days prior to rendering the waste unusable as well as recording the waste in METRC. All solid marijuana plant waste (plant matter waste from the extraction process such as plant matter that is pressed/squeezed to extract oil) and marijuana product waste will be ground in a grinder and then mixed with other solid compostable or non-compostable waste until the mixture is no more than 50% marijuana waste. Liquid marijuana waste such as concentrates, will be mixed with at least equal parts of non-marijuana waste and then stored away from all other marijuana and marijuana products in locked containers on the premises until it can be disposed of. The municipality waste truck will collect the waste mixture and dispose of it at the local waste station. This information will be recorded in the waste log and securely stored as a business record, available to AMCO upon request.

Received by AMCO 4.2.19

Section 5 – Testing Procedure and Protocols

Review the requirements under 3 AAC 306.520 and 3 AAC 306.550.

You must be able to certify the statement below. Read the following and then sign your initials in the box to the right:	Initials
5.1. I will ensure that any individual responsible for collecting random samples for required laboratory testing under 3 AAC 306.550 will prepare the necessary accompanying signed statement, provide the signed statement to the marijuana testing facility, and maintain a copy as a business record under 3 AAC 306.755.	☑

Answer "Yes" or "No" to the following question:	Yes	No
5.2. Will the marijuana product manufacturing facility be performing in-house testing (as defined under 3 AAC 306.990(b)(20)?	☐	☑

If "Yes" to 5.2, you must be able to certify the statement below. Read the following and then sign your initials in the box:	Initials
5.3. The area where in-house testing will occur is clearly identified on the Form MJ-02: Premises Diagram that is submitted with this application.	☐

5.4. Describe the testing procedures and protocols the marijuana product manufacturing facility will follow:

A designated employee of Cultivated Confections will collect a random sample from each production lot to be sent to a licensed testing facility. The designated employee will sign a statement certifying that the sample was taken at random. One copy of the statement will be sent to the testing lab and one will be filed on-site as a business record, available to AMCO upon request. The sample will be transported to the testing facility by a Cultivated Confections agent who holds a valid marijuana handler permit or by a third party transport company holding valid handler permits. The remainder of the production lot will be kept separate from all other marijuana and marijuana products until the testing results are received back from the testing lab. During this quarantine period, the product will be securely stored on-site and the general manager and/or James will ensure the product is kept cool and dry to prevent contamination or loss of efficacy. No product will be sold or transferred to another facility until passing testing results are received back from the testing lab.

A copy of the testing results will be stored on-site as an official business record, available to AMCO upon request.

Received by AMCO 4.2.19

Section 8 – Prohibitions

Review the requirements under 3 AAC 306.510.

8.1. I certify that the marijuana product manufacturing facility will not: Initials

a. **sell, deliver, distribute, or transfer any marijuana, marijuana concentrate, or marijuana product directly to a consumer, with or without compensation;**

b. **allow any person, including a licensee, employee, or agent, to consume marijuana, marijuana concentrate, or marijuana product on the licensed premises; or**

c. **manufacture or sell any product that is an adulterated food or drink, closely resembles a familiar food or drink item including candy, or is packaged to look like candy, or in bright colors or with cartoon characters or other pictures or images that would appeal to children.**

I declare under penalty of unsworn falsification that this form, including all accompanying schedules and statements, is true, correct, and complete.

Section 6 – Proposed Marijuana Concentrates and Marijuana Products

Review the requirements under 3 AAC 306.520, 3 AAC 306.525, and 3 AAC 306.560.

Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.

Product Name:	Alaska Coastal Candies		
Product Type: Choose one.	Other Marijuana Product		
Perishable: Yes/No	Yes	**Shelf Life:** If perishable.	2-3 months
Intended Use: Smokable/ edible/topical/wholesale/etc.	Edible		

Product Description: Details must include the color, shape, and texture.	Hard sugar candies will be green, red, brown, yellow dull colors and round shaped. The candies will be cinnamon, watermelon, coconut or blue berry flavored. The texture will be smooth and slightly sticky. Each hard candy will be approximately 3/8" 1/2" in diameter.
Ingredients:	Sugar, Corn Syrup, Water, Food Coloring, Flavoring and Dank Star Distillate *all flavors and food coloring will not be combined all together. Colors/flavors are per each flavor of candy Cultivated Confections may use a third party concentrate from a licensed marijuana facility in lieu of Dank Star Distillate
Standard Production Procedure and Detailed Manufacturing Process:	Distillate is mixed with 190 proof grain alcohol at a ratio of about 1-gram distillate to 2 oz. alcohol. This is mixed well and then poured into sugar or sugar substitute and mixed again. The mixture is then placed in an oven set to 200 degrees and stirred ever 3 min until the smell of alcohol dissipates. The induced sugar is then mixed with flavor, food coloring, corn syrup and water. The mixture is then heated to 300 degrees and injected into molds for size and weight control.
Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.	 *Colors will be made more dull

Section 7 – Proposed Product Packaging and Sample Labels

Review the requirements under 3 AAC 306.520, 3 AAC 306.565, and 3 AAC 306.570.
Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.

Product Name:	Alaska Coastal Candies
Product Type:	Edible Marijuana Product

Packaging Description: Details must include the color(s), size, packaging materials used, total amount of THC, individual serving sizes (if multiple), and other specifics showing compliance with 3 AAC 306.565. Please include photos, drawings, or graphic representations.	Hard candies will be packaged in round, child-resistant, metal LocTins. The tins are approximately 3" x 1.1" and require the use of both hands to press down and turn at the same time to open. The Cultivated Confections logo will appear on the top of the tin, and the required labeling will be affixed to the bottom of the tin as shown below. 1 serving = 1 candy (5mg THC) 10 servings per package = 50 mg THC total per package  *this image shows the tin only, this is not a depiction of the product*
Sample Labels: Provide sample labels showing how the labeling requirements set forth in 3 AAC 306.570 will be met.	**Produced By:** Cultivated Confections **License Number:** 17272 **Product Name:** Alaska Coastal Candies **Strain:** **Batch/Lot Number:** **Gross Weight:** **Net MJ Weight:** **Best By Date:** **Packaging Date:** **Tested By:** **License Number:** **Total THC:** **THCA:** **CBD:** **CBDA:** **CBN:** **Microbial Test:** **Pesticides:** **Fungicides:** **Residual Solvent Test:** **Contaminants Test Result:** Retailer: License Number: **Alaska Safety Warning**: *Marijuana has intoxicating effects and may be habit forming and addictive. Marijuana impairs concentration, coordination and judgment. Do not operate a vehicle or machinery under its influence. There are health risks associated with consumption of marijuana. For use only by adults twenty-one and older. Keep out of the reach of children. Marijuana should not be used by women who are pregnant or breast feeding.* ***Keep Refrigerated***

Section 6 – Proposed Marijuana Concentrates and Marijuana Products

Review the requirements under 3 AAC 306.520, 3 AAC 306.525, and 3 AAC 306.560.

Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.

Product Name:	Anchor Mints		
Product Type: Choose one.	Other Marijuana Product		
Perishable: Yes/No	Yes	**Shelf Life:** If perishable.	3 months
Intended Use: Smokable/ edible/topical/wholesale/etc.	Edible		

Product Description: Details must include the color, shape, and texture.	Anchor Mints will be a soft candy comparable in texture to better mints. Each mint will be approximately 1/2" diameter by 1/2" in height with a circular shape. James will be producing three flavors or Anchor Mints, Peppermint, Wintergreen and Cinnamon. The coloring of these mints will be green, yellow, and blue.
Ingredients:	Sugar (or sugar substitute), Dank Star Distillate, flavor extract (Peppermint, Wintergreen or Cinnamon) and less then 5% mixing agent (Microcrystalline cellulose, magnesium stearate, Silica Di Oxide and Di-calcium Phosphate. *all flavors are not to be combined at once Cultivated Confections may use a third party concentrate from a licensed marijuana facility in lieu of Dank Star Distillate
Standard Production Procedure and Detailed Manufacturing Process:	Dank Star Distillate is mixed with 190 proof grain alcohol at a ratio of about 1-gram Dank Star Distillate to 2 oz. alcohol. Once mixed well, the mixture is poured into sugar or sugar substitute and mixed again. The mixture is then placed into an oven set to 200 degrees and stirred every 3 minutes until the smell of alcohol dissipates. The induced sugar is then mixed with a flavor extract and mixing agent. The final mixture is loaded into a pill machine to press into the final mint product.
Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.

Product Name:	Dank Star Rosin		
Product Type: Choose one.	Marijuana Concentrate		
Perishable: Yes/No	No	**Shelf Life:** If perishable.	
Intended Use: Smokable/ edible/topical/wholesale/etc.	Smokable		

Product Description: Details must include the color, shape, and texture.	The color of the rosin will be a slightly translucent light yellow to dark amber. The texture can range from smooth like pressed glass with holes to sticky and is always soft and pliable.
Ingredients:	N/A
Standard Production Procedure and Detailed Manufacturing Process:	Cultivated Confection's Rosin is made by placing frozen flower and/or trim into an ice water bath. The water is then filtered using fine screens. The resulting ice water hash is put into a freeze dryer and then into rosin press bags and placed into a rosin press. Low heat and pressure is then applied to produce the rosin.
Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.
