Form MJ-05: Marijuana Product Manufacturing Facility

Section 4 – Proposed Marijuana Concentrates and Marijuana Products

Review the requirements under 3 AAC 306.520 - 3 AAC 306.525 and 3 AAC 306.560, and identify how the proposed establishment will meet the listed requirements. **Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.**

Product Name:	Canna Caps
Type:	Edible

Product Description: Details must include the color, shape, and texture.	Product will be in a clear capsule containing a oil that will appear light gold-dark amber, or light green.

Ingredients: This box is not applicable to marijuana concentrates	MCT oil (medium chain triglyceride oil, derived from coconut oil) full extract ethanol hash oil or distillate, naturally-derived terpenes.

Standard Production Procedure and Detailed Manufacturing Process:	A portion (depending on batch size and potency) of full extract hash oil or distillate will be measured out to achieve 5 mg of THC per capsule. The extract will be added to a warm beaker of MCT oil, and the mixture will be emulsified and homogenized via an ultrasonic emulsifier.

Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.	Example Product, actual product images will be provided to AMCO prior to first sale.

Received by AMCO 5/18/18

Continued from previous page.

Once homogenized sufficiently, the mixture will then be dispersed into size "00" capsules containing 0.9 ml of mixture. A random sample of the final
packaged CannaCaps will be selected and sent to the testing lab per 3 AAC 306.560.
