Operating Plan Supplemental

Form MJ-05: Marijuana Product Manufacturing Facility

Section 4 – Proposed Marijuana Concentrates and Marijuana Products

Review the requirements under 3 AAC 306.520 - 3 AAC 306.525 and 3 AAC 306.560, and identify how the proposed establishment will meet the listed requirements. **Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.**

Product Name:	Refine Alaska Distillate
Type:	Concentrate

Product Description: Details must include the color, shape, and texture.	Refine Alaska Distillate is a THC/CBD concentrate. It is transparent and ranges from crystal clear to a golden clear color, similar to honey. Refine Alaska Distillate possesses a gooey, smooth consistency and is sticky and oily in nature. Comes in a variety of flavors with varying THC and CBD levels.

Ingredients: This box is not applicable to marijuana concentrates	N/A

Standard Production Procedure and Detailed Manufacturing Process:	Marijuana concentrate is extracted in a closed loop machine using flower or trim with the use of the following solvents; Butane, N-Butane, Iso-Butane, Propane (or a combination of), or Ethanol. The solution is strained and purged to remove all plant matter, lipids, fats, and residual solvents below the regulated ranges (3 AAC 306.645) from the product. That concentrate is then distilled to create a cleaner, clearer product. Flavoring will be used as needed. The concentrated oil is then properly packaged until testing and sale.

Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.

Section 5 – Proposed Product Packaging and Sample Labels

Review the requirements under 3 AAC 306.520 and 3 AAC 306.565 – 3 AAC 306.570, and identify how the proposed establishment will meet the listed requirements. **Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.**

Product Name:	Refine Alaska Distillate
Type:	Concentrate

Packaging Description: Details must include the color(s), size, packaging materials used, total amount of THC, individual serving sizes (if multiple), and other specifics showing compliance with 3 AAC 306.565. Attached photos, drawings, or graphic representations are preferred.	Packaging consists of non-toxic, sealed, glass applicators that will hold no more than 1000mg of Refine Alaska Distillate. The containers will be placed in tamper evident cardboard wallets with clear PET blisters to display the product container. Cardboard will be roughly 3"x4.5". Not to be repackaged. Total cannabinoid content per product will range from 40-99%

Sample Labels: Provide sample labels showing how the labeling information required in 3 AAC 306.570 will be set out.	

Received by AMCO 2/1/19

Approved at February 2019 MCB Meeting

x·tracted
LABORATORIES

License: 13249

Produced using light hydrocarbons (butane and/or propane) in a closed loop system. Manufactured in a facility that also processes nut products.

WARNING: Marijuana has intoxicating effects and may be habit forming and addictive. Marijuana impairs concentration, coordination, and judgment. Do not operate a vehicle or machinery under its influence. There are health risks associated with consumption of marijuana. For use only by adults twenty-one and older. Keep out of the reach of children. Marijuana should not be used by women who are pregnant or breast feeding.

Alaska Marijuana Control Board

Form MJ-16: Proposed New Marijuana Product

What is this form?

This proposed new marijuana product form is required for a marijuana product manufacturing facility licensee who is seeking Marijuana Control Board (MCB) approval of a new marijuana product or marijuana concentrate for production at its licensed premises, as required under 3 AAC 306.100 and 3 AAC 306.525. **The required $250 proposed new marijuana product fee may be made by check, cashier's check, or money order.**

This form must be completed and submitted to AMCO's main office prior to production of any new marijuana product or marijuana concentrate. **The proposed new marijuana product may not be produced unless and until the MCB has approved of the product.**

Please note that licensees seeking approval of more than one proposed new marijuana product or marijuana concentrate must submit a separate completed copy of this form and pay a separate fee for each proposed new marijuana product or marijuana concentrate.

Section 1 – Establishment Information

Enter information for the business seeking to be licensed, as identified on the license application.

Licensee:	Royal Mountain Extracts LLC	**MJ License #:**	13249		
License Type:	Marijuana Product Manufacturing Facility				
Doing Business As:	X-tracted Laboratories				
Premises Address:	38957 South Commercial Drive				
City:	Talkeetna	**State:**	Alaska	**ZIP:**	99676

Section 2 – Proposed Marijuana Concentrate or Marijuana Product

Enter information for the marijuana concentrate or the marijuana product for which you are seeking MCB approval.

Product Name:	Refine Loud Jars		
Product Type: Choose one.	Marijuana Concentrate		
Perishable: Yes/No	Yes	**Shelf Life:** If perishable.	2 years
Intended Use: Smokable/ edible/topical/wholesale/etc.	Smokeable/Vaporization		

Received by AMCO 5.7.19

Section 3 – Proposed Product Details

Enter information for the marijuana product for which you are seeking MCB approval.

Product Description: Details must include the color, shape, and texture.	Refine is a brand as well as an indicator of quality. For an extraction to fall under the Refine brand, certain standards must be met. Extractions are judged and need to live up to certain aroma and appearance criteria. Consistencies, textures, and colors will vary by strain and starting material, but generally Refine Alaska Loud Resin™ will posses a golden yellow to dark amber color; amorphous shape, and a waxy texture. Refine Loud Jars will contain 7 grams of Refine Alaska Loud Resin.
Ingredients:	N/A
Standard Production Procedure and Detailed Manufacturing Process:	Marijuana concentrate is extracted in a closed-loop machine using flower or trim with the use of the following solvents; Butane, N-Butane, Iso-Butane, Propane, (or a combination of). The solution is properly purged to remove all residual solvents below the regulated ranges (3 AAC 306.645) from the product. The concentrated oil is then properly packaged until testing and sale.
Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.	

Form MJ-16: Proposed New Marijuana Product

Section 4 – Proposed Product Packaging and Sample Label

Enter information for the packaging and labeling of the marijuana product for which you are seeking MCB approval.

Packaging Description:
Details must include the color(s), size, packaging materials used, total amount of THC, individual serving sizes (if multiple), and other specifics showing compliance with 3 AAC 306.565. Please include photos, drawings, or graphic representations.

Packaging will consist of leak-proof, airtight, FDA compliant, straight-sided 1oz glass jars with a white metal, screw-on lid. Jars will be sealed with child-proof, tamper-evident, perforated shrink bands. Informational and warning labels will be placed on the top and bottom of each jar. Each jar will contain seven (7) grams of Refine Alaska Loud Resin. Total cannabinoid content per jar will range from 40-99%.

Sample Labels:
Provide sample labels showing how the labeling requirements set forth in 3 AAC 306.570 will be met.

As a marijuana establishment licensee, I declare under penalty of unsworn falsification that this form, including all accompanying schedules and statements, is true, correct, and complete.

Product Name:	Refine Alaska Double Dipper™
Type:	Concentrate

Product Description: Details must include the color, shape, and texture.	This product is a combination of two other products. Refine Alaska Double Dippers includes equal parts Refine Alaska Loud Resin™ and Refine Alaska Distillate. Consistencies, textures, and colors will vary by strain and starting material, but generally Refine Alaska Double Dipper™ will posses a golden yellow to dark amber color; amorphous shape, and a waxy texture.

Ingredients: This box is not applicable to marijuana concentrates	N/A

Standard Production Procedure and Detailed Manufacturing Process:	Marijuana concentrate is extracted in a closed loop machine using flower or trim with the use of the following solvents; Butane, N-Butane, Iso-Butane, Propane, (or a combination of) or Ethanol. The solution is strained and purged to remove all plant matter, lipids, fats, and residual solvents below the regulated ranges (3 AAC 306.645) from the product. That concentrate is then distilled to create a cleaner, clearer product. The distilled product is then added in equal parts to Refine Alaska Loud Resin™ during packaging. The concentrated oil is then properly packaged until testing and sale.

Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.

Product Name:	Ganja Grindz Pomegranate Matcha Green Tea
Type:	Edible

Product Description: Details must include the color, shape, and texture.	An amazingly balanced blend of sweet and tangy pomegranates and rich and earthy ceremonial matcha powder. Each 8oz bottle will consist of ten (10) servings, each containing 5mg of THC, totaling 50mg for the entire bottle. 4oz bottles will be available in multiple dosage levels of 5mg, 10mg, and 25mg per bottle, each with 5mg of THC per serving. Each bottle contains a dark red colored liquid, similar to pomegranate juice.

Ingredients: This box is not applicable to marijuana concentrates	Purified water, cane juice, green tea, pomegranate juice concentrate, ceremonial matcha powder, citric acid, ascorbic acid, natural flavor, Refine Alaska Distillate, coconut oil, polysorbate 60, Refine Alaska Cannabinoid Isolate, sorbitan, stearate.

Standard Production Procedure and Detailed Manufacturing Process:	Heat water, green tea, and other ingredients according to manufacturer's instructions, pour into plastic dispensing bucket and dispense back into cleaned stock pot. Set up trays of sanitized bottles of appropriate size. Fill each bottle according to bottle filling instructions. Pump coconut oil, Refine Alaska Cannabinoid Isolate, Refine Alaska Distillate, polysorbate 60, sorbitan, & stearate blended into each bottle according to dosing instructions. Then close with recloseable child resistant cap and tamper evident seal. Place accurate product identifying label on front of bottle and place information label on back. Place in storage until transported for sale.

Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.

Form MJ-05: Marijuana Product Manufacturing Facility

Section 4 – Proposed Marijuana Concentrates and Marijuana Products

Review the requirements under 3 AAC 306.520 - 3 AAC 306.525 and 3 AAC 306.560, and identify how the proposed establishment will meet the listed requirements. **Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.**

Product Name:	Ganja Grindz Spiced Apple Cider
Type:	Edible

Product Description: Details must include the color, shape, and texture.	Ganja Grindz 100% natural Apple Cider uses freshly pressed locally harvested apples infused with the perfect blend of mulling spices. For that warm and cozy feeling all year long, enjoy this award winning cider hot or over ice. Each 8oz bottle will consist of ten (10) servings, each containing 5mg of THC, totaling 50mg for the entire bottle. 4oz bottles will be available in multiple dosage levels of 5mg, 10mg, and 25mg per bottle, each with 5mg of THC per serving. Each bottle contains a dark golden colored liquid, similar to apple juice.

Ingredients: This box is not applicable to marijuana concentrates	Fresh apple cider, orange peel, allspice, cloves, Refine Alaska Distillate, coconut oil, polysorbate 60, Refine Alaska Cannabinoid Isolate, sorbitan, stearate.

Standard Production Procedure and Detailed Manufacturing Process:	Heat Cider with spices, Skim off apple fiber, pour into plastic dispensing bucket and dispense back into cleaned stock pot. Set up trays of sanitized bottles of appropriate size. Fill each bottle according to bottle filling instructions. Pump coconut oil, Refine Alaska Cannabinoid Isolate, Refine Alaska Distillate, polysorbate 60, sorbitan, & stearate blended into each bottle according to dosing instructions. Then close with recloseable child resistant cap and tamper evident seal. Place accurate product identifying label on front of bottle and place information label on back. Place in storage until transported for sale.

Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.
