Alaska Marijuana Control Board

Form MJ-16: Proposed New Marijuana Product

What is this form?

This proposed new marijuana product form is required for a marijuana product manufacturing facility licensee who is seeking Marijuana Control Board (MCB) approval of a new marijuana product or marijuana concentrate for production at its licensed premises, as required under 3 AAC 306.100 and 3 AAC 306.525. **The required $250 proposed new marijuana product fee may be made by check, cashier's check, or money order.**

This form must be completed and submitted to AMCO's main office prior to production of any new marijuana product or marijuana concentrate. **The proposed new marijuana product may not be produced unless and until the MCB has approved of the product.**

Please note that licensees seeking approval of more than one proposed new marijuana product or marijuana concentrate must submit a separate completed copy of this form and pay a separate fee for each proposed new marijuana product or marijuana concentrate.

Section 1 – Establishment Information

Enter information for the business seeking to be licensed, as identified on the license application.

Licensee:	Midnight Sun Manufacturing, LLC	**MJ License #:**	13424		
License Type:	Marijuana Concentrate Manufacturing Facility				
Doing Business As:	MIDNIGHT SUN MANUFACTURING, LLC				
Premises Address:	28011 Old Parks Highway				
City:	Willow	**State:**	Alaska	**ZIP:**	99688

Section 2 – Proposed Marijuana Concentrate or Marijuana Product

Enter information for the marijuana concentrate or the marijuana product for which you are seeking MCB approval.

Product Name:	Cannabis Concentrate Pre-Rolls		
Product Type:	Concentrate		
Perishable: Yes/No	No	**Shelf Life:** If perishable.	

Received by AMCO 9/28/18

Form MJ-16: Proposed New Marijuana Product

Section 3 – Proposed Product Details

Enter information for the marijuana product for which you are seeking MCB approval.

Product Description: Details must include the color, shape, and texture.	Pre-rolls will be cone shaped and off-white in color. The outer papers will be smooth.
Ingredients: This box is not applicable to marijuana concentrates.	N/A
Standard Production Procedure and Detailed Manufacturing Process:	Cannabis flower will be rolled or filled into a rolling paper, cone paper, or natural palm wrap and then injected with CO2 extracted cannabis concentrate. The pre-rolled product will be held upright, and the extract injected by hand with a syringe or by a mechanized process. Ratios of flower to oil may vary depending on THC concentrations per batch. Example 1: One Gram of Flower tested at 16% THC results in 160 MG of THC ¼ Gram of CO2 Extracted Cannabis Concentrate tested at 65% THC results in 162.5 MG of THC For a total product THC of 322.5 MG to be reported on the label as such. Example 2: .5 grams Gram of Flower tested at 16% THC results in 80 MG of THC 1/10 of a Gram of CO2 Extracted Cannabis Concentrate tested at 65% THC results in 65 MG of THC For a total product THC of 145 MG to be reported on the label as such.
Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.	

Alaska Marijuana Control Board

Form MJ-16: Proposed New Marijuana Product

Section 4 – Proposed Product Packaging and Sample Label

Enter information for the packaging and labeling of the marijuana product for which you are seeking MCB approval.

Packaging Description:
Details must include the color(s), size, packaging materials used, total amount of THC, individual serving sizes (if multiple), and other specifics showing compliance with 3 AAC 306.565. Please include photos, drawings, or graphic representations.

Product will be placed in a plastic tube, glass vial, bag or tin and packaged in resealable opaque Mylar bag with an impulse or continuous band heat sealer or child resistant equivalent box or blister pack that meets the board's standards. The information presented on the prototype shall remain the same, but differing sizes, shapes, and colors shall be used. The term "Not Intended for Single Serving Use" shall be used on the 1.25-gram version because this is a high THC dose product meant for multiple servings or uses. Because this product line looks like many other pre-rolls the product line label will always clearly state that Cannabis Concentrate is a product component. The individual weight of the cannabis flower and the cannabis concentrate within the pre-roll will be distinguished independently. See the label prototype below.

Sample Labels:
Provide sample labels showing how the labeling requirements set forth in 3 AAC 306.570 will be met.

The large 1.25 gram version in a palm leaf will be called a "Boom Blunt". The .5 and one gram versions in the cone papers will be "Boom Joints".

JOSEPH DONOVAN
NOTARY PUBLIC • STATE of UTAH
COMMISSION NO. 685560
COMM. EXP. 09/28/2019

As a marijuana establishment licensee, I declare under penalty of unsworn falsification that this form, including all accompanying schedules and statements, is true, correct, and complete.
