  - Diagram 4:
    - A portion of the legend was cut off. What does the red color represent?

- Diagram 5:
  - Please also highlight and label the other premises within the building.

- **MJ-04 Cultivation Supplemental**
  - Page 2, Section 4.1:
    - Please include more detail in your description of the space(s) under cultivation, such as whether tables or racks will be used (and if so, if multiple levels on each rack will be utilized, for example).
  - Page 3, Section 4.6:
    - Include in your response whether any pesticides, herbicides, or fungicides will be used. If no, please say so in this section.
  - Page 4, Section 5.2:
    - Include in your response specific examples of materials that will be mixed with marijuana waste to render it unusable.
  - Page 7, 8.1 Continued Response:
    - Your response includes information about packaging marijuana in bulk, which is not requested information in this section and should be removed.
  - Page 7, 8.1 and 8.2 Continued Response:

Good morning,

I have finished reviewing the revised documents and see that most of the corrections have been addressed, but I do have additional questions about your cultivation plan in Section 4.1 of Form MJ-04: Cultivation Supplemental. In the revised response you mention that both grow rooms will be utilizing a three-tiered rack system for all growth. What are the dimensions of the racks used as growing spaces?

Under 3 AAC 306.990(37), the square feet under cultivation is defined as an area of the licensed premises of a standard or limited cultivation facility that is used for growing marijuana, measured from the perimeter of the floor **or growing space** for marijuana, so some additional information will be required in this section to show that the area under cultivation is under 500 square feet.

Hello Lance,

If any of the racks are being used as growing spaces, their dimensions will need to be accounted for in the calculations for the square feet under cultivation.
