ACP LLC, AMCO, CITY OF PORT ALEXANDER
CONCERNS OF COMMUNITY MEMBMBER

Dear ACP LLC, AMCO, CITY OF PORT ALEXANDER:

I am a long-time resident of our charming small community of under 100 residents. Historically our community in Southeast Alaska has been a fishing village. Change does not typically happen fast. Recently our small community has had a big commercial development due to a potential marijuana cultivation facility.

I believe a marijuana business is a welcome industry in Port Alexander. However, I do have my own personal concerns. ACP LLC is located a said twenty-eight feet from my year-round residential residence. The extreme proximity of ACP LLC, an off grid commercial business who would be operating 24/7 365 days of the year, gives me lots of concerns of how ACP LLC will operate without infringing on my privacy and small-town character for myself, my family and my fellow residents.

One of my biggest concerns is privacy. I request my property and the walk way to my property not be in any surveillance footage and the exterior security lights not shine on to our residence.

Another concern of mine is noise. Port Alexander is a community off the gird. It is my understanding that an indoor marijuana cultivation facility requires a small power plant due to high power demand. Is there going to be any noise barrier to reduce the constant noise from the operation both inside and out?

In such a small community it's not always pleasant to be so formal in addressing our concerns as to what a person does on their private property. Port Alexander is a very unique place in Alaska. I enjoy my life and home in Port Alexander. ACP LLC has made drastic changes to our community without even operating. Again, I believe a marijuana business is a welcome industry in Port Alexander.

Sincerely,

KARINA BROWNING
