Alaska Marijuana Control Board

Form MJ-16: Proposed New Marijuana Product

What is this form?

This proposed new marijuana product form is required for a marijuana product manufacturing facility licensee who is seeking Marijuana Control Board (MCB) approval of a new marijuana product or marijuana concentrate for production at its licensed premises, as required under 3 AAC 306.100 and 3 AAC 306.525. **The required $250 proposed new marijuana product fee may be made by check, cashier's check, or money order.**

This form must be completed and submitted to AMCO's main office prior to production of any new marijuana product or marijuana concentrate. **The proposed new marijuana product may not be produced unless and until the MCB has approved of the product.**

Please note that licensees seeking approval of more than one proposed new marijuana product or marijuana concentrate must submit a separate completed copy of this form and pay a separate fee for each proposed new marijuana product or marijuana concentrate.

Section 3 – Proposed Product Details

Enter information for the marijuana product for which you are seeking MCB approval.

Product Description: Details must include the color, shape, and texture.	The Live Resin CO2 concentrate oil within the vape cartridges varies in color from a bright yellow to an amber color and is a thick viscous liquid.
Ingredients:	
Standard Production Procedure and Detailed Manufacturing Process:	Cannabis will be frozen within 24 hours of harvesting and then freeze dried, allowing the cannabis to be extracted fresh and uncured using CO2 as a solvent in a closed loop system. The CO2 saturates the cannabis and extracts the desired cannabinoids, terpenes, or flavonoids using different temperatures and pressures. The oil from the CO2 extraction process may undergo further refining to remove the plant waxes thru a process called winterization, which involves combining the oil to be mixed with food grade ethanol and charcoal to remove the waxes and impurities. The ethanol will get removed using a rotary evaporator, and the cannabis terpenes will be added back in.
Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.

Section 4 – Proposed Product Packaging and Sample Label

Enter information for the packaging and labeling of the marijuana product for which you are seeking MCB approval.

Packaging Description:
Details must include the color(s), size, packaging materials used, total amount of THC, individual serving sizes (if multiple), and other specifics showing compliance with 3 AAC 306.565. Please include photos, drawings, or graphic representations.

0.3 to 1 gram of Live Resin CO2 concentrate oil will be packaged in plastic or glass 59mm cartridges. The total THC will range from 20-99% with the actual THC content listed on the label per the testing results. The filled cartridge will be placed into a child-resistant, clear, plastic tube and then inserted into a paperboard box. The box is approximately 4"H x 2"W x 1" D and will have a tamper-evident seal.

Sample Labels:
Provide sample labels showing how the labeling requirements set forth in 3 AAC 306.570 will be met.

As a marijuana establishment licensee, I declare under penalty of unsworn falsification that this form, including all accompanying schedules and statements, is true, correct, and complete.
