Alaska Marijuana Control Board

Form MJ-16: Proposed New Marijuana Product

What is this form?

This proposed new marijuana product form is required for a marijuana product manufacturing facility licensee who is seeking Marijuana Control Board (MCB) approval of a new marijuana product or marijuana concentrate for production at its licensed premises, as required under 3 AAC 306.100 and 3 AAC 306.525. **The required $250 proposed new marijuana product fee may be made by check, cashier's check, or money order.**

This form must be completed and submitted to AMCO's main office prior to production of any new marijuana product or marijuana concentrate. **The proposed new marijuana product may not be produced unless and until the MCB has approved of the product.**

Please note that licensees seeking approval of more than one proposed new marijuana product or marijuana concentrate must submit a separate completed copy of this form and pay a separate fee for each proposed new marijuana product or marijuana concentrate.

Section 1 – Establishment Information

Enter information for the business seeking to be licensed, as identified on the license application.

Licensee:	Kreative Konfections LLC	**MJ License #:**		17389	
License Type:	Marijuana Product Manufacturing Facility

Form MJ-16: Proposed New Marijuana Product

Section 3 – Proposed Product Details

Enter information for the marijuana product for which you are seeking MCB approval.

Product Description: Details must include the color, shape, and texture.	Fireweed Extracts Old School Hash can range from light to dark green or from light to dark brown in color. Shape is a pressed block or coin. May have a logo or words pressed into one or both sides. Texture is firm with a gritty surface.
Ingredients:	
Standard Production Procedure and Detailed Manufacturing Process:	Kief will either be obtained from a cultivator and then dry-sifted with a set of screens to remove other plant matter, or will be separated from purchased flower or trim using dry-ice separation. A hydraulic press will be used to press into disks or blocks. At this point the product will be sent for testing. The resulting hash will either be separated for sale and packaged, or transferred as large blocks/disks to stores that have deli-style sales. Pre-packaged hash will vary in size from 0.5 grams to 7 grams.
Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.

Section 4 – Proposed Product Packaging and Sample Label

Enter information for the packaging and labeling of the marijuana product for which you are seeking MCB approval.

Packaging Description:
Details must include the color(s), size, packaging materials used, total amount of THC, individual serving sizes (if multiple), and other specifics showing compliance with 3 AAC 306.565. Please include photos, drawings, or graphic representations.

For pre-packaged Old School Hash, it will be placed in parchment or ptfe paper folds or silicone tubs. Colors of paper may vary from clear to white to natural brown. Silicone jars may be round or in variety shapes and may be in clear, solid, or multi-colors, depending on availability. Size will vary with the amount of hash to be held, from 0.5" to 3" in diameter. The tops of the silicone jars may be pre-printed with a logo. The paper-wrapping or silicone jars will then go into outer mylar bags, clear front with white or black back, approximately 3" x 4" up to 6" x 9". Old School Hash may come in 0.5 gram, 1 gram, 3.5 gram, or 7 gram packages. Total THC will vary from 25% to 80% of total weight, depending on original kief used.

Sample Labels:
Provide sample labels showing how the labeling requirements set forth in 3 AAC 306.570 will be met.
