Section 6 – Proposed Marijuana Concentrates and Marijuana Products

Review the requirements under 3 AAC 306.520, 3 AAC 306.525, and 3 AAC 306.560.

Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.

Product Name:	FC8 A		
Product Type: Choose one.	Other Marijuana Product		
Perishable: Yes/No	No	**Shelf Life:** If perishable.	
Intended Use: Smokable/ edible/topical/wholesale/etc.	TOPICAL		

Product Description: Details must include the color, shape, and texture.	Light brown/green smooth texture topical Liquid
Ingredients:	Ingredients: Coconut oil, Vitamin E Oil, Eggplant, Arnica, Frankincense, Ginger, St. John's wort, Cannabis
Standard Production Procedure and Detailed Manufacturing Process:	Dry Herbs and oils are placed in a Magic Butter machine, processed 8 hours, strained, (this is oil#1). Marijuana that has been through the decarboxylation process and oil #1, are placed into a Magic Butter machine and reprocessed with the essential oils added. When this process is complete this oil is strained again and the strained marijuana which is now in a mesh bag is placed in a baggie and that baggie is marked with date/batch information is placed in the tub marked waiting for notification to AMCO. The ledger, which sits on tub, then needs to be completed. A random sample will be taken, for testing at this time. The statement prepared and those procedures as established will also be followed. After a sample has been taken, the rest of the oil is placed in a glass jar and stored in refrigerator until the test results are returned.
Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.

Section 6 – Proposed Marijuana Concentrates and Marijuana Products

Review the requirements under 3 AAC 306.520, 3 AAC 306.525, and 3 AAC 306.560.

Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.

Product Name:	4S C		
Product Type: Choose one.	Other Marijuana Product		
Perishable: Yes/No	No	**Shelf Life:** If perishable.	
Intended Use: Smokable/ edible/topical/wholesale/etc.	TOPICAL		

Product Description: Details must include the color, shape, and texture.	Light brown smooth texture liquid
Ingredients:	Ingredients: Coconut oil, Avocado oil, Sesame oil, Vitamin E oil, Oplopanax horridus, Harpagophytum procumbens, Arnica Montana, Frankincense Boswellia sacra, Zingiber Officinales rhizome, Cannabis
Standard Production Procedure and Detailed Manufacturing Process:	Dry Herbs and oils are placed in a Magic Butter machine, processed 8 hours, strained, (this is oil#1). Marijuana that has been through the decarboxylation process and oil #1, are placed into a Magic Butter machine and reprocessed with the essential oils added. When this process is complete this oil is strained again and the strained marijuana which is now in a mesh bag is placed in a baggie and that baggie is marked with date/batch information is placed in the tub marked waiting for notification to AMCO. The ledger, which sits on tub, then needs to be completed. A random sample will be taken, for testing at this time. The statement prepared and those procedures as established will also be followed. After a sample has been taken, the rest of the oil is placed in a glass jar and stored in refrigerator until the test results are returned.
Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.

Section 6 – Proposed Marijuana Concentrates and Marijuana Products

Review the requirements under 3 AAC 306.520, 3 AAC 306.525, and 3 AAC 306.560.

Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.

Product Name:	AHS9 E		
Product Type: Choose one.	Other Marijuana Product		
Perishable: Yes/No	No	**Shelf Life:** If perishable.	
Intended Use: Smokable/ edible/topical/wholesale/etc.	TOPICAL		

Product Description: Details must include the color, shape, and texture.	Light brown/green smooth texture topical Liquid
Ingredients:	Ingredients: Witch Hazel, St. John Wort, Calendula Flowers, Cannabis **This product contains a combination of Witch Hazel and alcohol purchased over the counter which contains Witch Hazel 86% and alcohol 14% by volume**
Standard Production Procedure and Detailed Manufacturing Process:	Dry Herbs and oils are placed in a Magic Butter machine, processed 8 hours, strained, (this is oil#1). Marijuana that has been through the decarboxylation process and oil #1, are placed into a Magic Butter machine and reprocessed with the essential oils added. When this process is complete this oil is strained again and the strained marijuana which is now in a mesh bag is placed in a baggie and that baggie is marked with date/batch information is placed in the tub marked waiting for notification to AMCO. The ledger, which sits on tub, then needs to be completed. A random sample will be taken, for testing at this time. The statement prepared and those procedures as established will also be followed. After a sample has been taken, the rest of the oil is placed in a glass jar and stored in refrigerator until the test results are returned.
Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.

Section 8 – Prohibitions

Review the requirements under 3 AAC 306.510.

8.1. I certify that the marijuana product manufacturing facility will not: Initials

a. **sell, deliver, distribute, or transfer any marijuana, marijuana concentrate, or marijuana product directly to a consumer, with or without compensation;**

b. **allow any person, including a licensee, employee, or agent, to consume marijuana, marijuana concentrate, or marijuana product on the licensed premises; or**

c. **manufacture or sell any product that is an adulterated food or drink, closely resembles a familiar food or drink item including candy, or is packaged to look like candy, or in bright colors or with cartoon characters or other pictures or images that would appeal to children.**

I declare under penalty of unsworn falsification that this form, including all accompanying schedules and statements, is true, correct, and complete.

Section 2- Overview of operations

One person is completely responsible for process start to finish. The process has been broken down into 6 steps. The preceding diagram will show location of these steps.

1. Paperwork, logbook is filled out upon entering the facility. After data entry the marijuana will be taken to the work table (labeled step two and steps 4 B and 6)

2. The marijuana is then divided into 24 jars and labeled with required information on label. These jars are placed in a tub with a pink colored lid. These tubs are placed on the 2nd shelf which is clearly labeled.

3. The tubs on the 2nd shelf are now going to be decarboxylated. Each jar is emptied into a Nova decarboxylation unit where it will be heated to temp and when done, the unit indicates in a green light. The Marijuana now is poured back into the jar it came out of and 2 tbsp of Sunflower lecithin is added to jar and shaken coating the marijuana in a yellow powder. This makes the marijuana undesirable. These processed jars are now placed on the first shelf which is clearly marked. You can tell the difference because of the yellow powder coating.

Previously at the work table/oil station a dry herbal blend and oil mixture has had a first run through the Magic Butter machine. This oil and Herb blend is referred to as oil#1 there is no marijuana in this oil and herb blend.

4. Marijuana and lecithin blend(on shelf one) is placed in a magic butter machine with the #1 oil. It is processed again for 8 hrs, strained through a nylon strainer. This removes the marijuana that has been blended with oils. This residue is retained as 4a ,and in step 4b the process continues on.

4a.The nylon strainer holding the marijuana remains, is placed in a baggie and labeled with product id, and placed in container marked AMCO not notified. on shelf #3. (Shelf 3# has 2 containers, one for marijuana that AMCO has been notified on, and one that AMCO has not but will be notified.

4b. Is where all 4 of the magic butter machines strained product is placed in a large stainless steel pot and blended so all the products are the same. A sample of each of these lots is gathered for testing.

5. Bottle the product, label and Place in secure refrigerator or in locked cabinet next to refrigerator in batch lots. 80 1/2 oz bottles per lot, each lot will have a separate Tupperware container. When test results come back the required information is printed on labels the product is sealed in mylar. All product is Locked up with only Licensee having the key.

6. Order comes in, each item will be placed in a tupperware with a inventory control document and label and will be transported to the retail store as previously discussed.
