Alaska Marijuana Control Board

Operating Plan Supplemental
Form MJ-04: Marijuana Cultivation Facility

What is this form?

This operating plan supplemental form is required for all applicants seeking a marijuana cultivation facility license and must accompany **Form MJ-01: Marijuana Establishment Operating Plan**, per 3 AAC 306.020(b)(11). Applicants should review **Chapter 306: Article 4** of the **Alaska Administrative Code.** This form will be used to document how an applicant intends to meet the requirements of the statutes and regulations.

If your business has a formal operating plan, you may include a copy of that operating plan with your application, but all fields of this form must still be completed per 3 AAC 306.020 and 3 AAC 306.420(2).

What additional information is required for cultivation facilities?

Applicants must identify how the proposed establishment will comply with applicable regulations regarding the following:

- Prohibitions
- Cultivation plan
- Waste disposal
- Odor control
- Testing procedure and protocols
- Packaging and labeling

This form must be completed and submitted to AMCO's main office before any new or transfer application for a standard marijuana cultivation facility or limited marijuana cultivation facility license will be considered complete.

Section 1 – Establishment Information

Enter information for the business seeking to be licensed, as identified on the license application.

Licensee:	HIGH VIBES, LLC	**MJ License #:**	19485		
License Type:	STANDARD MARIJUANA CULTIVATION FACILITY				
Doing Business As:	HIGH VIBES,LLC				
Premises Address:	2145 Richardson Highway				
City:	North Pole	**State:**	Alaska	**ZIP:**	99705

Received by AMCO 12.10.19

Form MJ-04: Marijuana Cultivation Facility Operating Plan Supplemental

Section 2 – Overview of Operations

2.1. Provide an overview of your proposed facility's operations. Include information regarding the flow of marijuana from seed or clone to harvest and transfer from your premises:

Our seeds will be organized into strain specific packages, grouped and packaged in METRC, and will be tracked by and through their assigned package tag, until unpackaged and planted. Seeds or clones will be entered into METRC under immature plants. Once the reach 8 inches tall they will be assigned a tag number which will be entered into METRC.
Each new growing phase will be logged into METRC, IE: Vegetative phase, flowering phase, harvest.
All waste from pruning, destroyed or harvested plants, or plants waste by rooms will be recorded into METRC.
3- Day waste notice will be sent to AMCO enforcement prior to removal.
Each plant will be harvested with its perspective batch and given a batch number. Each individual plant will be weighed and recorded before being manicured, and waste for that batch will be logged into METRC.
All batches of marijuana will receive required testing . Once the sample passes required testing it will be packaged into bud, trim and given a package tag number and logged into METRC.
Packages sold will be accompanied by a METRC manifest and test results during transport to a retailer, cultivator, or testing facility.

Section 3 – Prohibitions

Review the requirements under 3 AAC 306.405 and 3 AAC 306.410.

3.1. I certify that the marijuana cultivation facility will not: Initials

a. **sell, distribute, or transfer any marijuana or marijuana product to a consumer, with or without compensation;**

b. **allow any person, including a licensee, employee, or agent, to consume marijuana or marijuana product on the licensed premises or within 20 feet of the exterior of any building or outdoor cultivation facility; or**

c. **treat or otherwise adulterate marijuana with any organic or nonorganic chemical or compound to alter the color, appearance, weight, or odor of the marijuana.**

Section 4 – Cultivation Plan

Review the requirements under 3 AAC 306.420 and 3 AAC 306.430.

4.1. Describe the size of the space(s) the marijuana cultivation facility intends to be under cultivation, including dimensions and overall square footage. Provide your calculations below:

Total square footage of facility is: 40x80 = 3200 sq ft. on the main floor and a space upstairs that contains 800 sq ft.
Veg/Mother room: 22'x32' = 704 sq ft. This room will contain 3x6 or 4x8 growing racks and will have 3-4 shelves per rack.
Flower room #1: 22'x32' = 704 sq ft. This room will contain 3x6 or 4x8 growing racks and will have 2-3 shelves per rack.
Flower room #2: 20'x32'= 640 sq ft. This room will contain 3x6 or 4x8 growing racks and 2-3 shelves per rack.
Flower room#3/Storage 16'x25.5' = 408 sq ft. This room will contain growing tables and extra space for storage

AMCO Received 2/25/2019

Alaska Marijuana Control Board

Form MJ-04: Marijuana Cultivation Facility Operating Plan Supplemental

You must be able to certify the statement below. Read the following and then sign your initials in the box to the right: Initials

4.2. The proposed area(s) for cultivation are clearly identified on the Form MJ-02: Premises Diagram that is submitted with this application.

Answer "Yes" or "No" to the following question: Yes No

4.3. Will the marijuana cultivation facility include outdoor production? ☐ ☑

If "Yes", describe the outdoor structure(s) or the expanse of open or clear ground and how it is fully-enclosed by a physical barrier:

4.4. Describe the method(s) used to ensure that any marijuana at the marijuana cultivation facility, whether indoors or outdoors, cannot be observed by the public from outside the facility:

This is a completely indoor standard cultivation facility. All marijuana is blocked from the public viewing. There will be no no windows on the main floor. The windows upstairs will be covered or blocked by blinds or other view obstructing material.. The doors will have no windows. No marijuana will be viewable by the public.

4.5. Describe the marijuana cultivation facility's growing medium(s) to be used:

We will be using Rockwool blocks, gro slabs, plugs and granulate and coco. We will be also using Deep water culture with a clay pebble as the substrate.

4.6. Provide the complete product name and EPA registration # (if applicable) for each of the cultivation facility's pesticides and pest control products to be used. All proposed products must be on DEC's list of approved pesticides in the state of Alaska:

See Page 7 of 7 for list. Benificial insects and EPA list.

4.7. Describe all other fertilizers, chemicals, gases, and delivery systems, including carbon dioxide management, to be used at the marijuana cultivation facility:

HIGH VIBES, LLC will use various nutrients to include: Advanced Nutrient Products: Big Bud, Bud candy, Bud factor X, Bud Ignitor, Flawless finish, Grandma Enggy's F1 and H2, Nirvana, pH perfect Base Nutrients, pH Perfect Connoisseur Bloom and Grow A&B, pH perfect sensi bloom and grow A&B, Piranha, Rhino skin, Sensi Cal-Mag Xtra, Sensizym, Trantula, Wet betty, pH up Concentrate. General Hydroponics Flora Series(Or similar products): Flora Micro, Flora Bloom, FloraGro, Cali Magic, pH Up and pH Down. SM-90, UC Roots(or similar), The Zone,Great White, Mycorrhizae, Super Thrive. General Cleaning Purposes(Not for plant application):Bleach, Alcohol, Dawn dish soap, Hydrogen Peroxide. We will not be using any carbon dioxide/system.

AMCO Received 3/18/2019

Dalotia coriaria

Common prey: Fungus gnats, pupating thrips, and root aphids
Better known as a rove beetle, *Dalotia coriaria* are released in your garden by opening the container in multiple locations. Rove beetles fly and independently make their way around your garden looking for their food source. *Dalotia coriaria* feed primarily on fungus gnats, pupating thrips, and root aphids. Their lifespan tends to be around 21 days, and they are commonly paired with *Stratiolaelaps*.

Stratiolaelaps

Common prey: Fungus gnats, Western flower thrips, root aphids, mites
Stratiolaelaps make a great companion to *Dalotia coriaria* as they attack the larvae of fungus gnats, pupating thrips, and immature root aphids. They are applied by dispersing the vermiculite/*Stratiolaelaps* mixture in individual pots and go to work immediately. Their lifespan is 18 days, and can survive without direct food sources by consuming algae and plant debris.

Amblyseius andersoni

Common prey: Broad, cyclamen, russet, and spider mites
Used to combat an array of mites, the *Amblyseius andersoni* goes after broad, cyclamen, russet, and spider mites. Best dispersed with hanging sachets, *Amblyseius andersoni* will continually breed for 4 to 6 weeks from the sachets.

Received by AMCO 12.10.18

4.8. Describe the marijuana cultivation facility's irrigation and waste water systems to be used:

Irrigation system will be via drip irrigation, flood and drain and/or hand watered and pumped from a 300 gallon mixing tank and storage tanks. Irrigation systems will be on timers. Water will be reused in a recirculate system, or used until gone, same with the deep water culture system. Any remaining waste will be disposed of per DEC regulation. Normal evaporation will also occur. Any additional waste water that may exist will be collected and disposed of in accordance through a state licensed waste facility.

Section 5 – Waste Disposal

Review the requirements under 3 AAC 306.740.

You must be able to certify the statement below. Read the following and then sign your initials in the box to the right: Initials

5.1. The marijuana cultivation facility shall give the board at least three days written notice required under 3 AAC 306.740(c) before making marijuana waste unusable and disposing of it.

5.2. Describe how you will store, manage, and dispose of any solid or liquid marijuana waste, including wastewater generated during marijuana cultivation, in compliance with any applicable laws. Include details about the material(s) you will mix with ground marijuana waste and the processes that you will use to make the marijuana waste unusable for any purpose for which it was grown:

5.2. Describe how you will store, manage, and dispose of any solid or liquid marijuana waste, including wastewater generated during marijuana cultivation, in compliance with any applicable laws. Include details about the material(s) you will mix with ground marijuana waste and the processes that you will use to make the marijuana waste unusable for any purpose for which it was grown:

We will grind up the plant waste with a mulch machine. We will dispose a majority of our solid or liquid waste through compost process that has been approved by the Marijuana Control Board and the State of Alaska. We will follow all local and state laws regarding composting practices and requirements. Any solid or liquid waste that is non compostable will be housed in the licensed facility on a concrete floor, liquids will be housed in a 300 gallon holding tank. Non compostable waste will be properly disposed of at a state licensed land fill waste facility per regulation. All marijuana plant waste will be managed and recorded through house and METRC. We will mix marijuana waste product with at least an equal amount of non-marijuana product to render it unusable. In order to make marijuana waste unusable we will mix it with equal parts of compostable materials including paper, food waste, yard waste, and vegetable-based grease or oils and/or non-compostable materials including paper, cardboard, plastic, oil or other waste materials approved by the board. We will place the waste in large storage totes or heavy duty mulch, yard waste bags, then later place in a large steel container. composted material will be used as fill soil around the property as needed. Remaining compost will be taken to a state licensed landfill facility and deposed of properly. AMCO will be given a 72 hour notice before rendering the product unusable and waste weights will be logged into METRC.
We will depose of a majority of our liquid waste through compost process that have been approved by the Marijuana Control Board and the state of Alaska. We will follow all local and state laws regarding composting practices and requirements. Any liquid waste that is non-compostable will be housed and secured in a 300 gallon holding tank on the premises and will be properly disposed of per DEC regulation. The holding tank will sit on the concrete floor inside the facility.

AMCO Received 2/25/2019

Section 6 – Odor Control

Review the requirements under 3 AAC 306.430.

Answer "Yes" or "No" to the following question:	Yes	No
6.1. Have you received an exemption from your local government for the odor control requirement set forth in 3 AAC 306.430(c)(2)?	☐	☑

If "Yes", you must be able to certify the statement below. Read the following and then sign your initials in the box: Initials

I am attaching to this form documentation of my odor control exemption from the local government. ☐

If "No" to question 6.1., describe the odor control method(s) to be used and how the marijuana cultivation facility will ensure that any marijuana at the facility does not emit an odor that is detectable by the public from outside the facility:

We will be using carbon filters in each room that have an attached in line fan on each unit to recirculate the air through the filter to clean/scrub the air. There will be no odor of marijuana detected.

Section 7 – Testing Procedure and Protocols

Review the requirements under 3 AAC 306.455 and 3 AAC 306.465.

You must be able to certify each statement below. Read the following and then sign your initials in the corresponding box: Initials

7.1. I understand and agree that the board or director will, from time to time, require the marijuana cultivation facility to provide samples of the growing medium, soil amendments, fertilizers, crop production aids, pesticides, or water for random compliance checks. JMA

7.2. I will ensure that any individual responsible for collecting random, homogenous samples for required laboratory testing under 3 AAC 306.455 will prepare the necessary accompanying signed statement, provide the signed statement to the marijuana testing facility, and maintain a copy as a business record under 3 AAC 306.755. JMA

7.3. Describe the testing procedures and protocols the marijuana cultivation facility will follow:

HIGH VIBES, LLC will provide a sample of each harvest batch of marijuana produced to a licensed marijuana testing facility. Once lab testing is complete and written report is received, we will sell or transport any marijuana batch. Our procedures to be followed as outlined in 3 AAC 306.455 & AAC 306.755 are:
- Designate an employee to collect a random sample.
- He/she will collect a random, homogeneous sample for testing by segregating harvested marijuana into batchesof individual strains of bud and flower, then select a random samplefrom each batch in amount required by licensed marijuana testing facility.
-He/she will prepare a signed statement showing each sample has been randomly selected for testing.
-and provide the signed statement to the licensed marijuana testing facility.
- and retain a copy of signed prepared statement for cultivation facility's records.
A marijuana testing facility employee will pick up our samples, and will show her Marijuana handler card and sign into the visitors log. Manifests and all paperwork will be signed before departure.

Received by AMCO 12.10.18

Section 8 – Packaging and Labeling

Review the requirements under 3 AAC 306.470 and 3 AAC 306.475.

Answer "Yes" or "No" to the following question:	Yes	No
8.1. Will the marijuana cultivation facility be packaging marijuana for a retail marijuana store to sell to a consumer without repackaging?	☑	☐

If "Yes", describe how the marijuana cultivation facility will ensure that the marijuana sold will meet the packaging requirements in 3 AAC 306.470, and provide a sample label that the facility will use to meet the labeling requirements set forth in 3 AAC 306.475:

When we sell marijuana to a retail marijuana store packaged to be sold directly to the consumer without repackaging , we will follow the procedures:
- Only marijuana tested and written results received form licensed lab can be sold or transported.
- No package will exceed one ounce weighed by registered scales in compliance with Alaska Weights and Measure Act.
- Each package will be in an opaque, resealable and child proof bag per 3 AAC 306.345.
- Label on each package will not have any cartoons nor images targeting persons under the age of 21.
- Each package will be affixed with a label(sample label attached) in compliance with 3 AAC 306.475
-Each package will be affixed with METRC inventory tracking label.

Answer "Yes" or "No" to the following question:	Yes	No
8.2. Will the marijuana cultivation facility be packaging marijuana in wholesale packages?	☑	☐

If "Yes", describe how the marijuana cultivation facility will ensure that the marijuana sold will meet the packaging requirements in 3 AAC 306.470, and provide a sample label that the facility will use to meet the labeling requirements set forth in 3 AAC 306.475:

When we sell marijuana in wholesale packages, the following procedures will be followed:
- Only marijuana tested and written results received from licensed lab can be sold or transported.
- No package will exceed 5 pounds weighed by registered scales.
- Each package will be affixed with a label (sample label attached) in compliance with 3 AAC 306.475.
- Each package will be affixed with METRC inventory tracking label.

Continued on page 7 of 7.

I certify that as a marijuana cultivation facility, I will submit monthly reports to the Department of Revenue and pay the excise tax required under AS 43.61.010 and AS 43.61.020 on all marijuana sold or provided as a sample to a marijuana establishment, as required under 3 AAC 306.480.

I declare under penalty of unsworn falsification that this form, including all accompanying schedules and statements, is true, correct, and complete.
