MEMORANDUM

TO: Chair and Members of the Board DATE: December 22, 2020

FROM: Jane P. Sawyer, Regulations Specialist RE: Thirdstate license 12488

Thirdstate, a standard marijuana cultivation facility, is requesting approval of its updated operating plan (they submitted new versions of forms MJ-01 and MJ-04). There were some changes from its original, they are outlined on page 2 of MJ-15 form. The updated operating plan seems to be in accordance with what the board has approved before and in general. Temporary approval was granted.

Licensee will not be using pesticides, but if they do, they will abide by DEC's approved list.

The attached MJ-14 is only in case is needed as some of the changes have to do with the premises. The MJ-14 has already been approved by enforcement.
