# Form MJ-16: Proposed New Marijuana Product

**What is this form?**

This proposed new marijuana product form is required for a marijuana product manufacturing facility licensee who is seeking Marijuana Control Board (MCB) approval of a new marijuana product or marijuana concentrate for production at its licensed premises, as required under 3 AAC 306.100 and 3 AAC 306.525. **The required $250 proposed new marijuana product fee may be made by check, cashier's check, or money order.**

This form must be completed and submitted to AMCO's main office prior to production of any new marijuana product or marijuana concentrate. **The proposed new marijuana product may not be produced unless and until the MCB has approved of the product.**

**Please note that licensees seeking approval of more than one proposed new marijuana product or marijuana concentrate must submit a separate completed copy of this form and pay a separate fee for each proposed new marijuana product or marijuana concentrate.**

## Section 1 – Establishment Information

Enter information for the business seeking to be licensed, as identified on the license application.

## Section 3 – Proposed Product Details

Enter information for the marijuana product for which you are seeking MCB approval.

| | |
|---|---|
| **Product Description:** Details must include the color, shape, and texture. | The oil is a dark yellow and will come in different strains. Each syringe will hold between 0.5 to 1 gram of product. |
| **Ingredients:** | BHO OIL- nothing but plant matter |
| **Standard Production Procedure and Detailed Manufacturing Process:** | Distillate is created using a closed loop machine in which flower or trim from cannabis plants are ran through and the following solvents will be by themselves or in a combination used to extract the CBD and THC from the plant material: Butane, N-Butane, Iso-Butance, or Ethanol. Once concentrate has been extracted by terpenator machines it will go to two areas. The first of these two is the winterizing area and the second is vacuum purging area. Concentrate will be vacuum purged until it reaches the proper consistency. Various heat and temp applications will result in marijuana concentrate finished product being labeled wax. The winterizing process removes plant waxes from concentrate and produces a smoother product. Winterization process |
| **Depiction:** Provide a photograph, drawing, or graphic representation of the expected appearance of the final product. | |
