Subject: Food Establishment Permit Not Required for Products Intended to be Smoked

Dear Mr. Schlosberg,

Thank you for your recent application for a permit from the Department of Environmental Conservation's Food Safety and Sanitation program. You stated in your application that you will only be manufacturing rosin that is all intended to be smoked. This letter is to inform you that the marijuana establishment you have described in your application does not require a permit under the Alaska Food Code (18 AAC 31). You are able to sell products intended to be smoked (18 AAC 31.012(c)(1)) without obtaining a permit.

Please be aware that if you change the type of product that you manufacture at your establishment to include edibles, including concentrates that can be used as an ingredient in edibles, you will be required to submit a plan of your operations and apply for a food establishment permit.

Sincerely,

Noelani Thompson
