Alaska Marijuana Control Board

Form MJ-16: Proposed New Marijuana Product

What is this form?

This proposed new marijuana product form is required for a marijuana product manufacturing facility licensee who is seeking Marijuana Control Board (MCB) approval of a new marijuana product or marijuana concentrate for production at its licensed premises, as required under 3 AAC 306.100 and 3 AAC 306.525. **The required $250 proposed new marijuana product fee may be made by check, cashier's check, or money order.**

This form must be completed and submitted to AMCO's main office prior to production of any new marijuana product or marijuana concentrate. **The proposed new marijuana product may not be produced unless and until the MCB has approved of the product.**

Please note that licensees seeking approval of more than one proposed new marijuana product or marijuana concentrate must submit a separate completed copy of this form and pay a separate fee for each proposed new marijuana product or marijuana concentrate.

Section 1 – Establishment Information

Enter information for the business seeking to be licensed, as identified on the license application.

Licensee:	Einstein Enterprises, Inc.	**MJ License #:**		10082

Section 3 – Proposed Product Details

Enter information for the marijuana product for which you are seeking MCB approval.

Product Description: Details must include the color, shape, and texture.	Sugar Stix are pre roll joints that are coated with cannabis distillate and then rolled in a combination of cannabis Kief and THCa sugar creating an infused preroll. Sugar Stix look like a preroll that is coated in powdery kief and THCa.
Ingredients:	Cannabis flower or trim, paper cone & crutch, Heptane gas, Co2, rosin pressed, water, or ethanol processed flower or trim, and Kief.
Standard Production Procedure and Detailed Manufacturing Process:	Cannabis material is packed into the joint cones to the desired weight to create a PreRoll. Each preroll is evenly coated using cannabis distillate. The joints are then rolled through a combination of kief and thca sugar to achieve desired coating.
Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.
