Section 6 – Proposed Marijuana Concentrates and Marijuana Products

Review the requirements under 3 AAC 306.520, 3 AAC 306.525, and 3 AAC 306.560.

Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.

Product Name:	Live Resin		
Product Type: Choose one.	Marijuana Concentrate		
Perishable: Yes/No	No	**Shelf Life:** If perishable.	
Intended Use: Smokable/ edible/topical/wholesale/etc.	Smokable		

Product Description: Details must include the color, shape, and texture.	Ranging from clear, yellow, gold, and brown. Free form shape. Gooey, liquidy, shiny, creamy or smooth in texture. Crystalline structures commonly form giving a chunkier consistency.
Ingredients:	N/A
Standard Production Procedure and Detailed Manufacturing Process:	Cannabis concentrate will be extracted from fresh or frozen flower or trim using a closed-loop machine with the use of permitted solvents (Butane, Propane) Frozen or fresh plant material will be loaded into an extraction column that will be jacketed with a C02 line to keep the column cold. C02 lines will be attached to the jacketed column to provide cooling throughout the process. A mixture of butane/propane will be released into the extraction column where it will be recollected into a collection canister. A majority of the solvents will be recaptured . The end resulting cannabis concentrate goes into a jar that is sealed and placed under heat until the desired texture and form is reached.
Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.
