Section 6 – Proposed Marijuana Concentrates and Marijuana Products

Review the requirements under 3 AAC 306.520, 3 AAC 306.525, and 3 AAC 306.560.

Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.

Product Name:	Gems and Juice		
Product Type: Choose one.	Marijuana Concentrate		
Perishable: Yes/No	No	**Shelf Life:** If perishable.	
Intended Use: Smokable/ edible/topical/wholesale/etc.	Smokable		

Product Description: Details must include the color, shape, and texture.	Ranging from yellow, gold, and clear. Diamond like form and shape. Amorphous solid, usually larger in size. Coarse and granular texture.
Ingredients:	N/A
Standard Production Procedure and Detailed Manufacturing Process:	End material (Oil mixture mixed with solvents) that was processed from the Butane/Propane extraction unit will be placed into air tight jars and placed into a low heated oven. A small amount of pressure will build up in the jars creating different fractions of cannabinoids. From the bottom up you'll have THCA Diamonds, HTFSE, Terpenes and finally any residual solvent. After an allotted amount of time has passed (between 2-10 weeks), the jar is opened and the residual solvents are allowed to evaporate with the help of the oven and a low vacuum. The HTFSE will be mixed with the Diamonds to create "Gems and Juice".
Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.
