Alaska Marijuana Control Board

Operating Plan Supplemental

Form MJ-05: Marijuana Product Manufacturing Facility

What is this form?

This operating plan supplemental form is required for all applicants seeking a marijuana product manufacturing facility license and must accompany **Form MJ-01: Marijuana Establishment Operating Plan**, per 3 AAC 306.020(b)(11). Applicants should review **Chapter 306: Article 5** of the **Alaska Administrative Code.** This form will be used to document how an applicant intends to meet the requirements of the statutes and regulations.

If your business has a formal operating plan, you may include a copy of that operating plan with your application, but all fields of this form must still be completed per 3 AAC 306.020 and 3 AAC 306.520(3).

What additional information is required for cultivation facilities?

Applicants must identify how the proposed establishment will comply with applicable regulations regarding the following:

- Equipment, compounds, and processes to be used
- Waste disposal
- Testing procedure and protocols
- Proposed marijuana concentrates and marijuana products
- Proposed product packaging and sample labels
- Prohibitions

This form must be completed and submitted to AMCO's main office before any new or transfer application for a marijuana product manufacturing facility or marijuana concentrate manufacturing facility license will be considered complete.

Section 1 – Establishment Information

Enter information for the business seeking to be licensed, as identified on the license application.

Licensee:	Kimberly Peters	**MJ License #:**	29770		
License Type:	Marijuana Product Manufacturing Facility				
Doing Business As:	Higher Dimensions Extracts				
Premises Address:	9737 Mud Bay Rd, Unit 101				
City:	Ketchikan	**State:**	Alaska	**ZIP:**	99901

AMCO received 4/25/2022

Section 2 – Overview of Operations

2.1. Provide an overview of your proposed facility's operations. Include information regarding the intake, flow, and transfer of marijuana, marijuana concentrate, and marijuana product at and from your premises:

Marijuana will be received and/or shipped through the restricted access shipping/receiving entrance/exit located on the first floor at the back of the building which is under 24hr video surveillance and will be non observable by the public. It will only be received and shipped by an individual that has their handlers card and are in compliance with section 3 AAC 306.700.
All product will be stored in the 2nd floor of manufacturing in the Secure Area/Storage product. We will provide & transport samples of each lot of products to a licensed marijuana testing facility for testing, after test results are back the product will be labeled and stored back in the manufacturing room Secure Area/Storage product on the second floor as provided in 3 AAC 306.535
Marijuana will only be transported to a licensed establishment by a licensee or agent/employee of licensee.
the Marijuana establishment will prepare, package and secure the product for shipment, for recording the transfer in the marijuana inventory tracking system and for preparing the transport manifest. which will include recording the type, amount and weight of marijuana or marijuana product being transported, name of transporter, time of departure and expected delivery, make, model and license plate number of transporting vehicle. A complete printed transport manifest on a form prescribed by the board must be kept with the marijuana/product at all times. Marijuana will be in a sealed package or container and in a locked safe and secure storage compartment in the vehicle transporting said product. Transporter must not open package and must not make any unnecessary stops in between except to deliver or pick up marijuana/product. Must refuse to accept any shipment of marijuana/product that is not accompanied by the transport manifest.

Section 3 – Equipment and Compounds to be Used

Review the requirements under 3 AAC 306.555.

3.1. Describe the equipment and solvents, gases, chemicals, and other compounds the marijuana product manufacturing facility will use to create marijuana concentrates:

Heat Press, Ice Water, Screens

There are no solvents/gases or chemicals being used in this facility.
No edibles are being manufactured.

AMCO received 4/25/2022

Form MJ-05: Marijuana Product Manufacturing Facility Operating Plan Supplemental

Section 4 – Waste Disposal

Review the requirements under 3 AAC 306.740.

You must be able to certify the statement below. Read the following and then sign your initials in the box to the right: Initials

4.1. The marijuana product manufacturing facility shall give the board at least three days written notice required under 3 AAC 306.740(c) before making marijuana waste unusable and disposing of it. KP

4.2. Describe how you will store, manage, and dispose of any solid or liquid marijuana waste, including expired or outdated marijuana or marijuana product, in compliance with any applicable laws. Include details about the material(s) you will mix with ground marijuana waste and the processes that you will use to make the marijuana waste unusable for any purpose for which it was grown or produced:

Cannabis waste or cannabis material that needs to be disposed of or deemed unusable will be weighed put into tracking system, stored in the marijuana waste restricted access area in view of security cameras and held for 3 days before disposal & then will be ground & mixed in a 50/50 ratio material/soil to be used as compost.

AMCO received 4/25/2022

Form MJ-05: Marijuana Product Manufacturing Facility Operating Plan Supplemental

Section 5 – Testing Procedure and Protocols

Review the requirements under 3 AAC 306.520 and 3 AAC 306.550.

You must be able to certify the statement below. Read the following and then sign your initials in the box to the right: Initials

5.1. I will ensure that any individual responsible for collecting random samples for required laboratory testing under 3 AAC 306.550 will prepare the necessary accompanying signed statement, provide the signed statement to the marijuana testing facility, and maintain a copy as a business record under 3 AAC 306.755. [KV]

Answer "Yes" or "No" to the following question: Yes No

5.2. Will the marijuana product manufacturing facility be performing in-house testing (as defined under 3 AAC 306.990(b)(20)? [ ] [X]

If "Yes" to 5.2, you must be able to certify the statement below. Read the following and then sign your initials in the box: Initials

5.3. The area where in-house testing will occur is clearly identified on the Form MJ-02: Premises Diagram that is submitted with this application. [ ]

5.4. Describe the testing procedures and protocols the marijuana product manufacturing facility will follow:

Provide a random sample of each product manufactured at the facility to a licensed testing facility with a signed statement saying the sample was selected randomly, will maintain copies as a business record under 3 AAC 306.755 Product lots will be stored in the Manufacturing facilities Secure Area/Storage product on the second floor. Nothing will be transported or sold until all lab testing required under 3 AAC 306.645 is approved.

Section 6 – Proposed Marijuana Concentrates and Marijuana Products

Review the requirements under 3 AAC 306.520, 3 AAC 306.525, and 3 AAC 306.560.

Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.

Product Name:	Bubble Hash		
Product Type: Choose one.	Marijuana Concentrate		
Perishable: Yes/No	No	**Shelf Life:** If perishable.	N/A
Intended Use: Smokable/ edible/topical/wholesale/etc.	smokable		

Product Description: Details must include the color, shape, and texture.	Bubble Hash will appear pale-golden to reddish-brown to greenish-grey. Texture will vary from a soft fine powder, to solid and pliable chunks. Most hash will be fully opaque, however, the highest-grade hash may at times suggest a degree of translucence. Bubble hash will be sold in a powdered form, pressed into "cakes", or left in the clumpy state it appears in when first dried. Variation in color, shape and texture will occur based on season, variety, age and grade.
Ingredients:	N/A
Standard Production Procedure and Detailed Manufacturing Process:	Dried or frozen cannabis will be put in synthetic mesh bags and inserted into a ice water bath to be agitated for a period of time. After agitation, liquid will be drained through a series of mesh bags to refine and filter the hash from the water. Bubble hash will then be collected and dried and will then either be left as-is, hand rolled into strips or balls, pressed into cakes/bars by hand or with a hydraulic press.
Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.	
Received by AMCO 7.31.21. Payment 8.12.21

Section 7 – Proposed Product Packaging and Sample Labels

Review the requirements under 3 AAC 306.520, 3 AAC 306.565, and 3 AAC 306.570.
Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.

Product Name:	Bubble Hash
Product Type:	Marijuana Concentrate

Packaging Description: Details must include the color(s), size, packaging materials used, total amount of THC, individual serving sizes (if multiple), and other specifics showing compliance with 3 AAC 306.565. Please include photos, drawings, or graphic representations.	0.5, 1g, 3.5g or 7g portions will be packaged in either a combination of clear, self-sealing adhesive strip cellophane sleeves, parchment paper, cardboard or small silicone or class containers, then into resealable, opaque and child resistant mylar bags for licensed retailers. Up to 5 pounds of hash may be packaged in glass jars with screw top lids for wholesale to other licensed product manufacturers. THC content will listed on label per testing results. Which will range between 20% and 90% THC by weigl
Sample Labels: Provide sample labels showing how the labeling requirements set forth in 3 AAC 306.570 will be met.	Retailer: License Number: Cultivator: License Number: Manufacturing: License Number: Product Name: packaging ID: Serving Size: Harvest Batch: Harvest Date: Weight: THC: CBD: Microbial Test: Pesticides: Herbicides: Fungicides: Risidual Solvent Test: Contaminants Test Result: Marijuana has intoxication effects and may be habit forming and addictive. Marijuana impairs concentration, coordination, and judgement. Do not operate a vehicle or machinery under its influence. There are health risks associated with consumption of marijuana. For use only by adults twenty-one and older. KEEP OUT OF THE REACH OF CHILDREN> Marijuana should not be use by women who are pregnant or breast feeding.

Section 6 – Proposed Marijuana Concentrates and Marijuana Products

Review the requirements under 3 AAC 306.520, 3 AAC 306.525, and 3 AAC 306.560.

Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.

Product Name:	Rosin		
Product Type: Choose one.	Marijuana Concentrate		
Perishable: Yes/No	No	**Shelf Life:** If perishable.	N/A
Intended Use: Smokable/ edible/topical/wholesale/etc.	smokable		

Product Description: Details must include the color, shape, and texture.	Rosin will be honey colored and semi-transparent. The texture is either smooth to the touch or slightly sticky. Rosin consistency will vary somewhat depending on the batch. Rosin will appear in flat, uneven globs.
Ingredients:	Pure rosin
Standard Production Procedure and Detailed Manufacturing Process:	Rosin will be produced using a hydraulic press with heated metal pressing plates. Dried or frozen cannabis plant material or hash will be placed into synthetic, heat resistant, fabric mesh bags. The bags will then be placed between a folded sheet of parchment paper and then onto the press. The combination of heat and pressure will move cannabis oils (rosin) out of the nylon bags and onto the parchment paper where it is then collected. Rosin may be manually pressed flat after collection.
Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.
