Section 6 – Proposed Marijuana Concentrates and Marijuana Products

Review the requirements under 3 AAC 306.520, 3 AAC 306.525, and 3 AAC 306.560.

Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.

Product Name:	Dank Star Distillate		
Product Type: Choose one.	Marijuana Concentrate		
Perishable: Yes/No	No	**Shelf Life:** If perishable.	
Intended Use: Smokable/ edible/topical/wholesale/etc.	Smokable		

Product Description: Details must include the color, shape, and texture.	Dank Star Distillate will range in color from a slightly translucent yellow to a dark amber red. The distillate will be a thick, sticky and viscous liquid.
Ingredients:	N/A
Standard Production Procedure and Detailed Manufacturing Process:	Dank Star Rosin is placed into a wiped-film short-path molecular sill which uses low controlled heat to produce distillate. The liquid residues are then removed and distillate THC is collected. Additional Production Procedure: Raw ground up cannabis material will be soaked in pre-chilled ethanol and frequently agitated until the plant's trichomes are separated from the plant matter. Once complete, the mixture will be run through a filter system to remove the solid plant matter. The filtered product will then be put through a winterization process by being placed in a freezer until the residual solvent rises to the top of the oil for easy removal or placed in a rotary evaporator until the desired results are achieved and then placed in a vacuum oven to remove any residual solvent. Solvent used in the production of Dank Star Distillate will be clearly indicated on the final product label. Additional production procedure attached.
Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.

Section 7 – Proposed Product Packaging and Sample Labels

Review the requirements under 3 AAC 306.520, 3 AAC 306.565, and 3 AAC 306.570.
Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.

Product Name:	Dank Star Distillate
Product Type:	Concentrate
Packaging Description: Details must include the color(s), size, packaging materials used, total amount of THC, individual serving sizes (if multiple), and other specifics showing compliance with 3 AAC 306.565. Please include photos, drawings, or graphic representations.	Half gram and 1 gram portions of distillate will be packaged in round, clear, plastic or glass containers with a screw top lid - approximately 1 ML in size and then into opaque, child-resistant and resealable mylar bags. Dank Star Distillate may also be packaged in .5 gram or 1 gram Vape Cartridges or Syringes and then packaged in either child resistant blister packs or opaque re-sealable mylar bags. If Dank Star Distillate is packaged in blister packs, The retail store will ensure that the product is placed in an opaque exit package prior to the customer exiting the retail store. The total THC content will range from 20-99% with the actual THC content listed on the label per the testing results. Up to 5 pounds of Dank Star Distillate will also be packaged in sterilized mason jars for use in-house to produce Cultivated Confections products.
Sample Labels: Provide sample labels showing how the labeling requirements set forth in 3 AAC 306.570 will be met.	**Produced By:** Cultivated Confections **License Number:** 17272 **Product Name:** Dank Star Distillate **Strain:** **Batch/Lot Number:** **Gross Weight:** **Net MJ Weight:** **Best By Date:** **Packaging Date:** **Tested By:** **License Number:** **Total THC:** **THCA:** **CBD:** **CBDA:** **CBN:** **Microbial Test:** **Pesticides:** **Fungicides:** **Residual Solvent Test:** **Contaminants Test Result:** Retailer: License Number: **Alaska Safety Warning**: *Marijuana has intoxicating effects and may be habit forming and addictive. Marijuana impairs concentration, coordination and judgment. Do not operate a vehicle or machinery under its influence. There are health risks associated with consumption of marijuana. For use only by adults twenty-one and older. Keep out of the reach of children. Marijuana should not be used by women who are pregnant or breast feeding.* ***Keep Refrigerated***

Dank Star Distillate additional Production procedure

Dank Star Distillate Oil will be extracted from flower or trim using a BHO extractor with the use of permitted solvents, butane, Iso-butane, N-butane, propane, hydrocarbons and/or ethanol. Actual solvent used will be indicated on the final product label. The solution is purged with the use of a roto-evaporator or vacuum oven under specified conditions to achieve desired consistency. The cannabis concentrate will undergo further purification/distillation/winterization which will result in Dank Star Distillate Oil. The Dank Star Distillate Oil will then be packaged in cartridges, syringes, or in-house jars and stored until testing and sale.
