Alaska Safety Warning: *Marijuana has intoxicating effects and may be habit forming and addictive. Marijuana impairs concentration, coordination and judgment. Do not operate a vehicle or machinery under its influence. There are health risks associated with consumption of marijuana. For use only by adults twenty-one and older. Keep out of the reach of children. Marijuana should not be used by women who are pregnant or breast feeding.*

Standard Production Procedure and detailed Manufacturing Process:

Dank Star Diamonds will be extracted from flower or trim using a BHO, EHO or water extraction with the use of permitted solvents, butane, propane, water and/or ethanol. Actual solvent used will be indicated on the final product label. The solution is purged with the use of a rotor-evaporator and/or vacuum oven under specified conditions to achieve desired consistency. Dank Star Rosin will be used to make the water extraction diamonds. The cannabis concentrate will undergo further purification/distillation/winterization/ pressure which will result in Dank Star Diamonds. The Diamonds will then be packed into jars for sale or in-house jars for storage until testing and sale. CBD from an Approved Alaska Industrial Hemp Source may be added during the final production procedure.
