Alaska Marijuana Control Board

Form MJ-16: Proposed New Marijuana Product

What is this form?

This proposed new marijuana product form is required for a marijuana product manufacturing facility licensee who is seeking Marijuana Control Board (MCB) approval of a new marijuana product or marijuana concentrate for production at its licensed premises, as required under 3 AAC 306.100 and 3 AAC 306.525. **The required $250 proposed new marijuana product fee may be made by check, cashier's check, or money order.**

This form must be completed and submitted to AMCO's main office prior to production of any new marijuana product or marijuana concentrate. **The proposed new marijuana product may not be produced unless and until the MCB has approved of the product.**

Please note that licensees seeking approval of more than one proposed new marijuana product or marijuana concentrate must submit a separate completed copy of this form and pay a separate fee for each proposed new marijuana product or marijuana concentrate.

Section 1 – Establishment Information

Enter information for the business seeking to be licensed, as identified on the license application.

Intended Use: Smokable/ edible/topical/wholesale/etc.	Smokable		

Received by AMCO 5.13.22

Form MJ-16: Proposed New Marijuana Product

Section 3 – Proposed Product Details

Enter information for the marijuana product for which you are seeking MCB approval.

Product Description: Details must include the color, shape, and texture.	Product will be light yellow, to light gold in color. Product will be an oil, with a viscosity similar to molasses.
Ingredients:	Marijuana extract, Alaska Hemp Program-approved hemp concentrate (for CBD/CBG:THC version only)
Standard Production Procedure and Detailed Manufacturing Process:	The crude extract will be sent through fractional short path distillation, where high heat is applied. As set temperature is achieved, the more volatile cannabinoids evaporate up into the packed fractionating column where the vapor is purified by condensing and re-evaporating several times so only the most volatile compounds move forward in the system to be condensed back into liquid and collected. Leaving a high-purity cannabinoid extract. Alaska Hemp Program-approved hemp concentrate (if applicable) will then be mixed with the cannabinoid extract
Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.	Example product. actual product images will be provided to AMCO prior to first sale.
