Alaska Marijuana Control Board

Operating Plan Supplemental

Form MJ-05: Marijuana Product Manufacturing Facility

What is this form?

This operating plan supplemental form is required for all applicants seeking a marijuana product manufacturing facility license and must accompany **Form MJ-01: Marijuana Establishment Operating Plan**, per 3 AAC 306.020(b)(11). Applicants should review **Chapter 306: Article 5** of the **Alaska Administrative Code.** This form will be used to document how an applicant intends to meet the requirements of the statutes and regulations.

If your business has a formal operating plan, you may include a copy of that operating plan with your application, but all fields of this form must still be completed per 3 AAC 306.020 and 3 AAC 306.520(3).

What additional information is required for cultivation facilities?

Applicants must identify how the proposed establishment will comply with applicable regulations regarding the following:

- Equipment, compounds, and processes to be used
- Waste disposal
- Testing procedure and protocols
- Proposed marijuana concentrates and marijuana products
- Proposed product packaging and sample labels
- Prohibitions

This form must be completed and submitted to AMCO's main office before any new or transfer application for a marijuana product manufacturing facility or marijuana concentrate manufacturing facility license will be considered complete.

Section 1 – Establishment Information

Enter information for the business seeking to be licensed, as identified on the license application.

Licensee:	Alaskan Blooms, LLC	**MJ License #:**		27122	
License Type:	Marijuana Product Manufacturing Facility				
Doing Business As:	Alaskan Blooms, LLC				
Premises Address:	2448 Arvilla St., Bldg B				
City:	Fairbanks	**State:**	Alaska	**ZIP:**	99709

Section 2 – Overview of Operations

2.1. Provide an overview of your proposed facility's operations. Include information regarding the intake, flow, and transfer of marijuana, marijuana concentrate, and marijuana product at and from your premises:

Once all incoming paperwork and transportation information has been verified, cannabis material will be inspected, accepted, sorted, and stored until it is scheduled for extraction. Untested products will remain in storage quarantine. As soon as test results are confirmed, products will be packaged, labeled, and stored until they are prepared for transfer out of the facility.

Section 3 – Equipment and Compounds to be Used

Review the requirements under 3 AAC 306.555.

3.1. Describe the equipment and solvents, gases, chemicals, and other compounds the marijuana product manufacturing facility will use to create marijuana concentrates:

Hydrocarbon extraction will be performed using a professional closed loop extraction/recovery system. The hydrocarbons used will be butane, n-butane, isobutane, propane, hexane, heptane, pentane, or any combination thereof.

Ethanol extraction will be performed using a professional ethanol extraction/recovery system with ethanol as the solvent.

Co2/Dry Ice will be used to maintain temperature integrity in some parts of the extraction process.

A professional grade press with a pneumatic or hydraulic pump will be used to make rosin.

Distillate will be processed with professional lab grade distillation equipment.

Sifting screens will be used to separate trichomes without a solvent.

Section 4 – Waste Disposal

Review the requirements under 3 AAC 306.740.

You must be able to certify the statement below. Read the following and then sign your initials in the box to the right: Initials

4.1. The marijuana product manufacturing facility shall give the board at least three days written notice required under 3 AAC 306.740(c) before making marijuana waste unusable and disposing of it.

4.2. Describe how you will store, manage, and dispose of any solid or liquid marijuana waste, including expired or outdated marijuana or marijuana product, in compliance with any applicable laws. Include details about the material(s) you will mix with ground marijuana waste and the processes that you will use to make the marijuana waste unusable for any purpose for which it was grown or produced:

After the required 72 hours of notice all cannabis waste will be mixed at a ratio of at least 1:1 with recyclable and/or organic material and rendered unusable for the intended purpose it was produced for. Then waste will be transferred off site.

Solid marijuana waste will be made unusable by removing all cannabinoids and terpenes via extraction leaving only inert plant material behind. Dry waste will be stored in trash receptacles and held for the required 72 hours of notice. Plant material will then be ground up and mixed 50/50 with organic compost able material such as dirt and recycled into growing medium or processed into burnable pellets.
Liquid waste will be made unusable by removing all cannabinoids and terpenes via extraction if possible and evaporating remaining liquid to reduce volume. Any waste left after evaporation will be mixed into growing medium or mixed 50/50 with organic, inert material and placed in the regular waste receptacle. There will be little to no liquid waste.

Section 5 – Testing Procedure and Protocols

Review the requirements under 3 AAC 306.520 and 3 AAC 306.550.

You must be able to certify the statement below. Read the following and then sign your initials in the box to the right:	Initials
5.1. I will ensure that any individual responsible for collecting random samples for required laboratory testing under 3 AAC 306.550 will prepare the necessary accompanying signed statement, provide the signed statement to the marijuana testing facility, and maintain a copy as a business record under 3 AAC 306.755.	[signature]

Answer "Yes" or "No" to the following question:	Yes	No
5.2. Will the marijuana product manufacturing facility be performing in-house testing (as defined under 3 AAC 306.990(b)(20)?	☐	☑

If "Yes" to 5.2, you must be able to certify the statement below. Read the following and then sign your initials in the box:	Initials
5.3. The area where in-house testing will occur is clearly identified on the Form MJ-02: Premises Diagram that is submitted with this application.	

5.4. Describe the testing procedures and protocols the marijuana product manufacturing facility will follow:

Section 8 – Prohibitions

Review the requirements under 3 AAC 306.510.

8.1. I certify that the marijuana product manufacturing facility will not: Initials

a. **sell, deliver, distribute, or transfer any marijuana, marijuana concentrate, or marijuana product directly to a consumer, with or without compensation;** [illegible]

b. **allow any person, including a licensee, employee, or agent, to consume marijuana, marijuana concentrate, or marijuana product on the licensed premises; or** [illegible]

c. **manufacture or sell any product that is an adulterated food or drink, closely resembles a familiar food or drink item including candy, or is packaged to look like candy, or in bright colors or with cartoon characters or other pictures or images that would appeal to children.** [illegible]

I declare under penalty of unsworn falsification that this form, including all accompanying schedules and statements, is true, correct, and complete.

Section 6 – Proposed Marijuana Concentrates and Marijuana Products

Review the requirements under 3 AAC 306.520, 3 AAC 306.525, and 3 AAC 306.560.

Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.

Product Name:	Shatter		
Product Type: Choose one.	Marijuana Concentrate		
Perishable: Yes/No	No	**Shelf Life:** If perishable.	
Intended Use: Smokable/ edible/topical/wholesale/etc.	Vaporization		

Product Description: Details must include the color, shape, and texture.	Color will range from opaque to gold and orange. Shape will be approximately one square inch that is 3mm thickness. Texture will range from pliable to hard and firm.
Ingredients:	Cannabis
Standard Production Procedure and Detailed Manufacturing Process:	Cannabis material will be processed and extracted via hydrocarbon, then the oil will be cured to the desired texture. After a batch sample has passed testing, the oil will be packaged for sale.
Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.	

Section 7 – Proposed Product Packaging and Sample Labels

Review the requirements under 3 AAC 306.520, 3 AAC 306.565, and 3 AAC 306.570.
Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.

Product Name:	Shatter
Product Type:	Marijuana Concentrate
Packaging Description: Details must include the color(s), size, packaging materials used, total amount of THC, individual serving sizes (if multiple), and other specifics showing compliance with 3 AAC 306.565. Please include photos, drawings, or graphic representations.	Shatter will be packaged in parchment paper that is enclosed and sealed in either a 1 gram(3"x5.5") or 1/8 ounce size mylar(4"x6.75"). It will be packaged in increments of .1g up to 7 grams per package.
Sample Labels: Provide sample labels showing how the labeling requirements set forth in 3 AAC 306.570 will be met.	
Section 6 – Proposed Marijuana Concentrates and Marijuana Products

Review the requirements under 3 AAC 306.520, 3 AAC 306.525, and 3 AAC 306.560.

Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.

Product Name:	Rosin		
Product Type: Choose one.	Marijuana Concentrate		
Perishable: Yes/No	No	**Shelf Life:** If perishable.	
Intended Use: Smokable/ edible/topical/wholesale/etc.	Vaporization		

Product Description: Details must include the color, shape, and texture.	Color will range from light cream to golden brown. Shape will take the form of its container. Texture range from dry and crumbly to viscous and sticky.
Ingredients:	Cannabis
Standard Production Procedure and Detailed Manufacturing Process:	Cannabis material(Flower, trim, or kief.) will be placed in a pneumatic or hydraulic press with heated plates. After a determined amount of time and pressure is achieved, the oil will be collected and stored. After a batch sample has passed testing, the oil will be packaged for sale.
Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.	
Section 7 – Proposed Product Packaging and Sample Labels

Review the requirements under 3 AAC 306.520, 3 AAC 306.565, and 3 AAC 306.570.
Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.

Product Name:	Rosin
Product Type:	Marijuana Concentrate

Packaging Description:
Details must include the color(s), size, packaging materials used, total amount of THC, individual serving sizes (if multiple), and other specifics showing compliance with 3 AAC 306.565. Please include photos, drawings, or graphic representations.

Rosin will be packaged in either a small glass jar with lid(6ml) or a larger glass jar with lid (15ml). It will be packaged in increments of .1g up to 7 grams per package.

Small jars will be placed in either a labeled cardboard box or 1 gram mylar bag.

Large jars will be labeled in accordance with 3 AAC 306.565 and shrink banded.

Sample Labels:
Provide sample labels showing how the labeling requirements set forth in 3 AAC 306.570 will be met.

Section 6 – Proposed Marijuana Concentrates and Marijuana Products

Review the requirements under 3 AAC 306.520, 3 AAC 306.525, and 3 AAC 306.560.

Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.

Product Name:	HTE (High Terpene Extract)		
Product Type: Choose one.	Marijuana Concentrate		
Perishable: Yes/No	No	**Shelf Life:** If perishable.	
Intended Use: Smokable/ edible/topical/wholesale/etc.	Vaporization		

Product Description: Details must include the color, shape, and texture.	Color will vary from white and opaque to orange or gold. Shape will take the for of its container. Texture will vary from applesauce or sticky sugar to thick viscous liquid.
Ingredients:	Cannabis
Standard Production Procedure and Detailed Manufacturing Process:	Cannabis material will be processed and extracted via hydrocarbon, then the oil will be cured to the desired texture. After a batch sample has passed testing, the oil will be packaged for sale.
Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.	
Section 7 – Proposed Product Packaging and Sample Labels

Review the requirements under 3 AAC 306.520, 3 AAC 306.565, and 3 AAC 306.570.
Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.

Product Name:	HTE (High Terpene Extract)
Product Type:	Marijuana Concentrate
Packaging Description: Details must include the color(s), size, packaging materials used, total amount of THC, individual serving sizes (if multiple), and other specifics showing compliance with 3 AAC 306.565. Please include photos, drawings, or graphic representations.	HTE will be packaged in either a small glass jar with lid(6ml) or a larger glass jar with lid (15ml). It will be packaged in increments of .1g up to 7 grams per package. Small jars will be placed in either a labeled cardboard box or 1 gram mylar bag. Large jars will be labeled in accordance with 3 AAC 306.565 and shrink banded.

Section 6 – Proposed Marijuana Concentrates and Marijuana Products

Review the requirements under 3 AAC 306.520, 3 AAC 306.525, and 3 AAC 306.560.

Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.

Product Name:	HCE (High Cannabinoid Extract)		
Product Type: Choose one.	Marijuana Concentrate		
Perishable: Yes/No	No	**Shelf Life:** If perishable.	
Intended Use: Smokable/ edible/topical/wholesale/etc.	Vaporization		

Product Description: Details must include the color, shape, and texture.	Color will vary from white and opaque to gold. Shape will be crystals and may have a small amount of liquid. Texture will vary from hard and dry to soft and sticky.
Ingredients:	Cannabis
Standard Production Procedure and Detailed Manufacturing Process:	Cannabis material will be processed and extracted via hydrocarbon, then the oil will be cured to the desired texture. After a batch sample has passed testing, the oil will be packaged for sale.
Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.	

Section 7 – Proposed Product Packaging and Sample Labels

Review the requirements under 3 AAC 306.520, 3 AAC 306.565, and 3 AAC 306.570.
Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.

Product Name:	HCE (High Cannabinoid Extract)
Product Type:	Marijuana Concentrate
Packaging Description: Details must include the color(s), size, packaging materials used, total amount of THC, individual serving sizes (if multiple), and other specifics showing compliance with 3 AAC 306.565. Please include photos, drawings, or graphic representations.	HCE will be packaged in either a small glass jar with lid(6ml) or a larger glass jar with lid (15ml). It will be packaged in increments of .1g up to 7 grams per package. Small jars will be placed in either a labeled cardboard box or 1 gram mylar bag. Product Name:	Smokin Token		
Product Type: Choose one.	Marijuana Concentrate		
Perishable: Yes/No	No	**Shelf Life:** If perishable.	
Intended Use: Smokable/ edible/topical/wholesale/etc.	Smokable		

Product Description: Details must include the color, shape, and texture.	Color will range from light cream to golden brown. Shape will be a small round disc ranging in size from 1 to 7 grams. Texture will be hard and dry.
Ingredients:	Cannabis
Standard Production Procedure and Detailed Manufacturing Process:	Tested Dry sift will be pressed together with little or no heat to form the shape of a coin. Coins will be weighed and packaged for sale.
Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.	

Section 7 – Proposed Product Packaging and Sample Labels

Review the requirements under 3 AAC 306.520, 3 AAC 306.565, and 3 AAC 306.570.
Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.

Product Name:	Smokin Token
Product Type:	Marijuana Concentrate

Packaging Description: Details must include the color(s), size, packaging materials used, total amount of THC, individual serving sizes (if multiple), and other specifics showing compliance with 3 AAC 306.565. Please include photos, drawings, or graphic representations.

Smokin Tokens will be placed in a plastic coin holder and then sealed in a 1 gram mylar bag.

Sample Labels: Provide sample labels showing how the labeling requirements set forth in 3 AAC 306.570 will be met.
