Section 6 – Proposed Marijuana Concentrates and Marijuana Products

Review the requirements under 3 AAC 306.520, 3 AAC 306.525, and 3 AAC 306.560.

Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.

Product Name:	Diamonds		
Product Type: Choose one.	Marijuana Concentrate		
Perishable: Yes/No	No	**Shelf Life:** If perishable.	
Intended Use: Smokable/ edible/topical/wholesale/etc.	Smokable		

Product Description: Details must include the color, shape, and texture.	Ranging from yellow, gold, to clear in color. Taking a crystalline structure in shape appearing like diamonds, course to granular in texture. May be purely crystalline or mixed with terpene sauce.
Ingredients:	
Standard Production Procedure and Detailed Manufacturing Process:	Cannabis concentrate is extracted from cannabis biomass with the use of compliant closed-loop equipment and solvent(s), (CO_2, Ethanol, Hydrocarbon). After recovering solvent(s), the concentrate is winterized and filtered to remove fats and lipids. The winterized concentrate is redissolved in heptane and placed into a pressure-rated crystallization vessel. Crystallization vessel temperature, pressure, and solvent level is manipulated to encourage THC-A crystallization over a period of time. Remaining solvent is recovered, and final purge is completed in vacuum oven to ensure residual solvents fall within requirements of 3 AAC 306.645.
Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.
