Alaska Marijuana Control Board

Form MJ-16: Proposed New Marijuana Product

What is this form?

This proposed new marijuana product form is required for a marijuana product manufacturing facility licensee who is seeking Marijuana Control Board (MCB) approval of a new marijuana product or marijuana concentrate for production at its licensed premises, as required under 3 AAC 306.100 and 3 AAC 306.525. **The required $250 proposed new marijuana product fee may be made by check, cashier's check, or money order.**

This form must be completed and submitted to AMCO's main office prior to production of any new marijuana product or marijuana concentrate. **The proposed new marijuana product may not be produced unless and until the MCB has approved of the product.**

Please note that licensees seeking approval of more than one proposed new marijuana product or marijuana concentrate must submit a separate completed copy of this form and pay a separate fee for each proposed new marijuana product or marijuana concentrate.

Section 1 – Establishment Information

Enter information for the business seeking to be licensed, as identified on the license application.

Licensee:	SHFT LLC	**MJ License #:**		SHFT LLC

Form MJ-16: Proposed New Marijuana Product

Section 3 – Proposed Product Details

Enter information for the marijuana product for which you are seeking MCB approval.

Product Description: Details must include the color, shape, and texture.	CannaRub Hybrid is intended for topical use and not for ingestion. CannaRub Hybrid will appear yellow-ish to dark green in color and be aromatic. It will be smooth and oily to the touch and vary in firmness depending on the temperature at which it is stored.
Ingredients:	Cannabis Extract, Shea Butter, Cocoa Butter, Coconut Oil, Grapeseed Oil, Hempseed Oil, Emu Oil, Propylene Glycol, Plantaserve E, Beeswax, Vitamin C Oil, Vitamin E Oil, Lemon Oil, Eucalyptus Extract, Peppermint Extract, Lavender Extract, Rosemary Extract, Frankincense
Standard Production Procedure and Detailed Manufacturing Process:	Marijuana flower/trim is mixed/soaked in liquid Coconut oil (or any of the various vegetable oils) and heated to decarboxylate the THC, remove water and kill pathogens. The mixture is then filtered to remove the Marijuana Flower/Trim while leaving an Oil infused with THC and a wide array of cannabinoids.
Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.

Form MJ-16: Proposed New Marijuana Product

Section 4 – Proposed Product Packaging and Sample Label

Enter information for the packaging and labeling of the marijuana product for which you are seeking MCB approval.

Packaging Description: Details must include the color(s), size, packaging materials used, total amount of THC, individual serving sizes (if multiple), and other specifics showing compliance with 3 AAC 306.565. Please include photos, drawings, or graphic representations.

CannaRub Hybrid will be packaged in 1 oz round, Child-resistant (CR) metal tins or CR glass jars. Each container will hold on the low end approximately 100 - 300 mg of THC depending on test results or on the high end approximately 300-600 mg of THC depending on test results. Tins will be packaged into resealable, opaque and child-resistant mylar bags or CR box.

Sample Labels: Provide sample labels showing how the labeling requirements set forth in 3 AAC 306.570 will be met.

As a marijuana establishment licensee, I declare under penalty of unsworn falsification that this form, including all accompanying schedules and statements, is true, correct, and complete.
