Alaska Marijuana Control Board

Form MJ-16: Proposed New Marijuana Product

What is this form?

This proposed new marijuana product form is required for a marijuana product manufacturing facility licensee who is seeking Marijuana Control Board (MCB) approval of a new marijuana product or marijuana concentrate for production at its licensed premises, as required under 3 AAC 306.100 and 3 AAC 306.525. **The required $250 proposed new marijuana product fee may be made by check, cashier's check, or money order.**

This form must be completed and submitted to AMCO's main office prior to production of any new marijuana product or marijuana concentrate. **The proposed new marijuana product may not be produced unless and until the MCB has approved of the product.**

Please note that licensees seeking approval of more than one proposed new marijuana product or marijuana concentrate must submit a separate completed copy of this form and pay a separate fee for each proposed new marijuana product or marijuana concentrate.

Section 1 – Establishment Information

Enter information for the business seeking to be licensed, as identified on the license application.

Licensee:	L & J Ventures, Inc.	**MJ License #:**	15790

Section 3 – Proposed Product Details

Enter information for the marijuana product for which you are seeking MCB approval.

Product Description: Details must include the color, shape, and texture.	Tincture is cannabis infused edible oil amber to yellow in color. Oil will a be low viscosity oily liquid that takes the shape of its container.
Ingredients:	Macadamia nut oil, olive oil, sesame oil, or MCT (Medium-Chain Triglyceride) oil, cannabis concentrate, lecithin.
Standard Production Procedure and Detailed Manufacturing Process:	Edible oil is warmed and combined with warmed lecithin and warmed cannabis concentrate (Cannabis concentrate may be: shatter, wax, sugar, sugar wax, kief, crumble, distillate, sauce, C02 oil, rosin, resin, budder, bubble hash). Mixture is then homogenized with a high shear mixer. Homogenized mixture is then dispensed in measured amounts into dropper bottles. Bottles are then sealed before storing in a cool place. Actual cannabis concentrate used in production will be clearly indicated on the final product label.
Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.

Section 4 – Proposed Product Packaging and Sample Label

Enter information for the packaging and labeling of the marijuana product for which you are seeking MCB approval.

Packaging Description:
Details must include the color(s), size, packaging materials used, total amount of THC, individual serving sizes (if multiple), and other specifics showing compliance with 3 AAC 306.565. Please include photos, drawings, or graphic representations.

Tincture will come in a 15ml dropper bottle with a pipette that identifies serving size amounts and then placed into mylar bags, cardboard containers or plastic containers that are child-resistant and resealable. Retail stores will ensure purchases are in opaque exit bags. Tincture will come in 5 mg of THC or 10 mg of THC per single serving and 50 or 100 mg of THC per bottle.
1 single serving of Tincture = 1.5 ml and 5 or 10 mg of THC.
For in-house use and wholesale sales, up to five (5) pounds of Tincture will be stored in sanitized food-safe containers with its respective label containing test results.

Sample Labels:
Provide sample labels showing how the labeling requirements set forth in 3 AAC 306.570 will be met.
