Section 6 – Proposed Marijuana Concentrates and Marijuana Products

Review the requirements under 3 AAC 306.520, 3 AAC 306.525, and 3 AAC 306.560.

Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.

Product Name:	Wax		
Product Type: Choose one.	Marijuana Concentrate		
Perishable: Yes/No	No	**Shelf Life:** If perishable.	
Intended Use: Smokable/ edible/topical/wholesale/etc.	Smokable		

Product Description: Details must include the color, shape, and texture.	Cannabis wax has the same consistency as warm candle wax. It is pliable and soft to the touch. The color ranges from a dark orange to a light amber color.
Ingredients:	N/A
Standard Production Procedure and Detailed Manufacturing Process:	Oil extracted from the C02 extractor or the BHO extractor with the use of C02 or Butane (Iso-Butane, N-Butane, Butane) and/or Ethanol will be placed in a vacuum oven to remove any residual solvents and then whipped. After a set period of time in the oven, the material will appear brittle and will crumble. Materials will be placed in a large silicone container to await packaging. Actual solvent used will be clearly indicated on the final product label.
Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.

Product Name:	Crumble		
Product Type: Choose one.	Marijuana Concentrate		
Perishable: Yes/No	No	**Shelf Life:** If perishable.	
Intended Use: Smokable/ edible/topical/wholesale/etc.	Smokable		

Product Description: Details must include the color, shape, and texture.	Crumble has a light golden appearance and has the consistency of wet sticky sand.
Ingredients:	N/A
Standard Production Procedure and Detailed Manufacturing Process:	Cannabis Oil extracted from the C02 or BHO extractor with the use of CO2 or Butane(Iso-Butane, N-Butance, Butane) and/or Ethanol will be placed in a vacuum oven to remove any residual solvents and then occasionally agitated. After a set period of time in the oven, the material will appear brittle and will crumble. Materials will be placed in large silicone containers to await packaging. Actual Solvent used will be clearly indicated on the final product label.
Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.

Product Name:	Shatter		
Product Type: Choose one.	Marijuana Concentrate		
Perishable: Yes/No	No	**Shelf Life:** If perishable.	
Intended Use: Smokable/ edible/topical/wholesale/etc.	Smokable		

Product Description: Details must include the color, shape, and texture.	Shatter has the appearance and consistency of glass. The color will vary from a light gold to a dark amber. Smooth and a little bit sticky to the touch.
Ingredients:	N/A
Standard Production Procedure and Detailed Manufacturing Process:	Shatter is created using either a closed loop C02 Extractor or a BHO extractor with specific parameters set for Shatter. Ground material is loaded into the stainless steel vessel which is then pressurized. C02 or Butane (Iso-butane, N-Butane or Butane) and/or Ethanol passes through the material and carries out the cannabinoids, terpenes, plant waxes and other volatile compounds. The vessel is then depressurized, and the concentrate is removed and stored in a freezer until it is properly tested and packaged. Actual solvent used will be indicated on the final product label.
Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.

Product Name:	Mint Chocolate Squares		
Product Type: Choose one.	Other Marijuana Product		
Perishable: Yes/No	Yes	**Shelf Life:** If perishable.	3-6 Months
Intended Use: Smokable/ edible/topical/wholesale/etc.	Edible		

Product Description: Details must include the color, shape, and texture.	Mint Chocolate Squares will be rectangular shaped with a chewy consistency, with an outside color ranging from brown to dark brown depending on the marijuana strain used and cocoa. The inside (mint filling) will be smooth consistency and a light green/teal color.
Ingredients:	Chocolate, sweetened condensed milk, powdered sugar, coconut oil, mint extract, peppermint pieces for garnish on top of candy, and Cannabis Concentrate (Cannabis Concentrate will consist of either; crumble, shatter, rosin, kief, or BHO oil) Actual Cannabis Concentrate used in production will be clearly indicated on the final product label.
Standard Production Procedure and Detailed Manufacturing Process:	Temper chocolate in heated bath. Inject 1st layer of chocolate into mold and let cool completely. Infuse sweetened condensed milk with powdered sugar and mint extract with coconut oil and cannabis concentrate and add to chilled layer of chocolate. Inject 2nd layer of chocolate into mold and let cool completely before removing from molds. Test batch and then package.
Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.

Alaska Marijuana Control Board

Form MJ-16: Proposed New Marijuana Product

What is this form?

This proposed new marijuana product form is required for a marijuana product manufacturing facility licensee who is seeking Marijuana Control Board (MCB) approval of a new marijuana product or marijuana concentrate for production at its licensed premises, as required under 3 AAC 306.100 and 3 AAC 306.525. **The required $250 proposed new marijuana product fee may be made by check, cashier's check, or money order.**

This form must be completed and submitted to AMCO's main office prior to production of any new marijuana product or marijuana concentrate. **The proposed new marijuana product may not be produced unless and until the MCB has approved of the product.**

Please note that licensees seeking approval of more than one proposed new marijuana product or marijuana concentrate must submit a separate completed copy of this form and pay a separate fee for each proposed new marijuana product or marijuana concentrate.

Section 1 – Establishment Information

Enter information for the business seeking to be licensed, as identified on the license application.

Licensee:	YNY Investment, LLC	**MJ License #:**	11304		
License Type:	Marijuana Product Manufacturing Facility				
Doing Business As:	Higher Altitude Manufacturing				
Premises Address:	2429 E. 88th Ave				
City:	Anchorage	**State:**	Alaska	**ZIP:**	99507

Section 2 – Proposed Marijuana Concentrate or Marijuana Product

Enter information for the marijuana concentrate or the marijuana product for which you are seeking MCB approval.

Product Name:	Peanut Butter Chocolate Squares		
Product Type: Choose one.	Other Marijuana Product		
Perishable: Yes/No	Yes	**Shelf Life:** If perishable.	3-6 months frozen
Intended Use: Smokable/ edible/topical/wholesale/etc.	Edible		

Received by AMCO 12/12/18

Form MJ-16: Proposed New Marijuana Product

Section 3 – Proposed Product Details

Enter information for the marijuana product for which you are seeking MCB approval.

Product Description: Details must include the color, shape, and texture.	Peanut Butter chocolate squares will be square shaped and 1.25 x 1.25 inches in size, with a chewy consistency, with an outside color ranging from brown to dark brown depending on marijuana strain used and cocoa. The inside (peanut butter filling) will be smooth consistency and a light brown color
Ingredients: This box is not applicable to marijuana concentrates.	Chocolate, peanut butter, coconut oil, Cannabis concentrate (Cannabis Concentrate will consist of either; crumble, shatter, rosin, kief, or BHO oil). Actual Cannabis concentrate used in production will be clearly indicated on the final product label.
Standard Production Procedure and Detailed Manufacturing Process:	Temper chocolate in heated bath. Inject 1st layer of chocolate into mold and let cool completely. Infused peanut butter with coconut oil and marijuana concentrate and add to chilled layer of chocolate. Inject 2nd layer of chocolate into mold and let cool completely before removing from molds. Test batch and then package.
Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.

Alaska Marijuana Control Board

Approved at February 2019 MCB Meeting

Form MJ-16: Proposed New Marijuana Product

Section 4 – Proposed Product Packaging and Sample Label

Enter information for the packaging and labeling of the marijuana product for which you are seeking MCB approval.

Packaging Description: Details must include the color(s), size, packaging materials used, total amount of THC, individual serving sizes (if multiple), and other specifics showing compliance with 3 AAC 306.565. Please include photos, drawings, or graphic representations.

Peanut Butter Chocolate Squares will come in either 2 servings - 10 mg of THC, 5 servings - 25 mg of THC, or 10 servings - 50 mg of THC and will be packaged in heat sealed, opaque mylar bags, or plastic child resistant clam shells with a tamper-evident seal. Each serving of Peanut Butter Chocolate Squares may be wrapped in a cellophane bag with a twist tie and placed in a mylar bag.

1 serving = 5 mg or 10 mg of THC or 1 Peanut Butter Chocolate Square. Peanut Butter Chocolate Squares will come in either 5 mg or 10 mg THC options.
Packages will contain either 2 servings - (5 mg = 10 mg of THC) (10 mg = 20 mg of THC), 5 servings - (5 mg = 25 mg of THC)(10 mg = 50 mg of THC) or 10 servings - (5 mg = 50 mg of THC) (10 mg = 100 mg of THC) per package. Clam shells will be packaged in an opaque exit bag by the retailer prior to customer exiting the retail store.

Sample Labels: Provide sample labels showing how the labeling requirements set forth in 3 AAC 306.570 will be met.

Product Name:	Natural Fat Extract - Butter
Type:	Marijuana Concentrate

Product Description: Details must include the color, shape, and texture.	Natural Fat Extracts come in a variety of colors and viscosity; everything from a dark green to a light yellow. In some cases the extract will be stable at room temperature and be soft to touch, other wise it will be a viscus liquid at room temperature.

Ingredients: This box is not applicable to marijuana concentrates	NA.

Standard Production Procedure and Detailed Manufacturing Process:	*Natural Fat Extraction (Butter, Olive Oil, Vegetable Oil etc): Using a natural fat along with water we plan on using heat to breakdown and bind THC with the oil to later be filtered and formed into bricks to be used in our manufacturing of edibles.

Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.

Product Name:	Alcohol/ Vegetable Glycerin Tincture
Type:	Marijuana Concentrate

Product Description: Details must include the color, shape, and texture.	Alcohol tincture is a dark green liquid that share the same consistency as water at room temperature. Vegetable Glycerin tincture is a viscus liquid at room temperature. It's color varies from a golden brown to a dark green.

Ingredients: This box is not applicable to marijuana concentrates	NA

Standard Production Procedure and Detailed Manufacturing Process:	Alcohol/ Vegetable Glycerin Extraction: Combining either high proof alcohol or vegetable glycerin and plant matter in a sealed container while being stored in a cold environment (under 0o C) the THC will bind with the liquid. Agitating it while under these conditions will help ensure maximum yield. After the process is complete the mixture will then be strained and bottled and kept in the same cold
