Alaska Marijuana Control Board

Form MJ-16: Proposed New Marijuana Product

What is this form?

This proposed new marijuana product form is required for a marijuana product manufacturing facility licensee who is seeking Marijuana Control Board (MCB) approval of a new marijuana product or marijuana concentrate for production at its licensed premises, as required under 3 AAC 306.100 and 3 AAC 306.525. **The required $250 proposed new marijuana product fee may be made by check, cashier's check, or money order.**

This form must be completed and submitted to AMCO's main office prior to production of any new marijuana product or marijuana concentrate. **The proposed new marijuana product may not be produced unless and until the MCB has approved of the product.**

Please note that licensees seeking approval of more than one proposed new marijuana product or marijuana concentrate must submit a separate completed copy of this form and pay a separate fee for each proposed new marijuana product or marijuana concentrate.

Section 3 – Proposed Product Details

Enter information for the marijuana product for which you are seeking MCB approval.

Product Description: Details must include the color, shape, and texture.	An infused joint is a paper cone or cylinder filled with ground cannabis. Infused Joints outside color can range from white to brown to green to yellow depending on paper, concentrate, and kief or bubblehash used for infusion.
Ingredients:	N/A
Standard Production Procedure and Detailed Manufacturing Process:	Two methods are used to create infused joint. Either the joint is rolled/packed into the papers and then painted with a measured amount of heated cannabis extract (such as: Distillate, Heavy Hitter Oil, HTE, Sauce, Tincture, Winterized Oil, CO2 Oil, Live Resin or Rosin), and then rolled in a measured amount of kief or bubble hash. Or the cannabis, kief or bubblehash, and extract are incorporated together in measured amounts and then rolled/packed into the joint papers. The type of concentrate and whether kief or bubble hash is used will be clearly indicated on the label.
Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.

Section 4 – Proposed Product Packaging and Sample Label

Enter information for the packaging and labeling of the marijuana product for which you are seeking MCB approval.

Packaging Description:
Details must include the color(s), size, packaging materials used, total amount of THC, individual serving sizes (if multiple), and other specifics showing compliance with 3 AAC 306.565. Please include photos, drawings, or graphic representations.

Infused Joints will be packaged in either .5 gram or 1 gram infused joint options. Labels will state that the Infused Joints contains marijuana concentrate and list the concentrate used in production. Infused Joints may come in 1, 4 or 5 joint packages, never exceeding the THC limit amounts as outlined in AMCO regulations. Infused Joints will be packaged in glass, plastic, or cardboard tubes or in cardboard, metal, or wood boxes. All final packaging will be re-sealable and child-resistant. Retail stores will ensure purchases are in opaque exit bags.
THC percentage will be clearly indicated on the final product label per test results.

Sample Labels:
Provide sample labels showing how the labeling requirements set forth in 3 AAC 306.570 will be met.
