Alaska Marijuana Control Board

Operating Plan Supplemental

Form MJ-05: Marijuana Product Manufacturing Facility

What is this form?

This operating plan supplemental form is required for all applicants seeking a marijuana product manufacturing facility license and must accompany **Form MJ-01: Marijuana Establishment Operating Plan**, per 3 AAC 306.020(b)(11). Applicants should review **Chapter 306: Article 5** of the **Alaska Administrative Code.** This form will be used to document how an applicant intends to meet the requirements of the statutes and regulations.

If your business has a formal operating plan, you may include a copy of that operating plan with your application, but all fields of this form must still be completed per 3 AAC 306.020 and 3 AAC 306.520(3).

What additional information is required for cultivation facilities?

Applicants must identify how the proposed establishment will comply with applicable regulations regarding the following:

- Equipment, compounds, and processes to be used
- Waste disposal
- Testing procedure and protocols
- Proposed marijuana concentrates and marijuana products
- Proposed product packaging and sample labels
- Prohibitions

This form must be completed and submitted to AMCO's main office before any new or transfer application for a marijuana product manufacturing facility or marijuana concentrate manufacturing facility license will be considered complete.

Section 1 – Establishment Information

Enter information for the business seeking to be licensed, as identified on the license application.

Licensee:	Sweet Matanuska Gold Extrations, LLC	**MJ License #:**	32497		
License Type:	Marijuana Concentrate Manufacturing Facility				
Doing Business As:	Sweet Matanuska Gold				
Premises Address:	972 N Satisfied Drive, Suite B				
City:	Wasilla	**State:**	Alaska	**ZIP:**	99654

AMCO received 5/24/2022

Section 2 – Overview of Operations

2.1. Provide an overview of your proposed facility's operations. Include information regarding the intake, flow, and transfer of marijuana, marijuana concentrate, and marijuana product at and from your premises:

All marijuana and marijuana products will be tracked in Metrc from their intake at the facility, to their use in a manufactured product or disposal, to the transfer to another licensed facility. All shipments of marijuana or marijuana product that arrive at the facility will be first inspected by the licensee or designated employee before being accepted or rejected. For consistency, the shipment contents will be weighed with inspected scales and reconciled with the transport manifest, shipment labels and packaging labels. Any shipments with discrepancies will be rejected. Shipments that pass facility inspection will be accepted, immediately entered into Metrc and added to the inventory log. At the end of each business day, the licensee, a designated employee or a manager will reconcile each transfer, to or from another licensed facility, with Metrc and the inventory on hand to ensure accurate counts and to resolve discrepancies immediately. Random sample(s) of each concentrate manufactured at Sweet Matanuska Gold will be sent to a licensed testing lab and the remainder of the production lot will be segregated from all other products and currency until the testing results are received. Once the passing testing results are received, marijuana products will be packaged and labeled in compliance with all AMCO regulations. The packaged products will then be transported by the licensee, a designated employee or manager, or by a third-party transport company. All transporters will have valid marijuana handler permits. All transfers will be entered into Metrc, which will generate a trip manifest that will be sent with each shipment as well as stored as an official business record.

Section 3 – Equipment and Compounds to be Used

Review the requirements under 3 AAC 306.555.

3.1. Describe the equipment and solvents, gases, chemicals, and other compounds the marijuana product manufacturing facility will use to create marijuana concentrates:

Sweet Matanuska Gold will not be using chemicals in the facility. All concentrates will be solvent-less.

Equipment:

Harvest Right - Commercial Scientific Freeze Dryer
Washing Vessels
Low Temperature Heat Press
Hoshizaki - Ice Machine 500lb Version
Joint Roller
Boldt Bags - 44 Gallon Filtration Bag Set (8 Bag)
PurePressure - Longs Peak Rosin Press & Accessories
PurePressure - Axis Trichome Separator Package (1 Vessel)
PurePressure - Commercial Hash Washing Filtration Package

AMCO received 5/24/2022

Form MJ-05: Marijuana Product Manufacturing Facility Operating Plan Supplemental

Section 4 – Waste Disposal

Review the requirements under 3 AAC 306.740.

You must be able to certify the statement below. Read the following and then sign your initials in the box to the right: Initials

4.1. The marijuana product manufacturing facility shall give the board at least three days written notice required under 3 AAC 306.740(c) before making marijuana waste unusable and disposing of it.

4.2. Describe how you will store, manage, and dispose of any solid or liquid marijuana waste, including expired or outdated marijuana or marijuana product, in compliance with any applicable laws. Include details about the material(s) you will mix with ground marijuana waste and the processes that you will use to make the marijuana waste unusable for any purpose for which it was grown or produced:

Sweet Matanuska Gold anticipates producing the following marijuana plant and product waste: (1) contaminated or infected marijuana or marijuana products (concentrates), (2) marijuana or marijuana products (concentrates) deemed by the licensee or a manager as unfit for sale or consumption for any reason, (3) marijuana product that fails lab testing, (4) marijuana plant waste created during the extraction process, (5) marijuana or marijuana concentrates that become expired (if applicable), (6) other marijuana or marijuana concentrate waste as determined by AMCO. Once marijuana or marijuana concentrates are deemed as waste, the waste will be separated from all other marijuana and marijuana concentrates and securely stored in locked bins on the licensed premises. AMCO will be electronically notified of the intent to render the marijuana unusable, at least three days before doing so, on a form prescribed by the board. All waste will be logged in Metrc and noted in the facility Waste Log. All solid marijuana plant waste and marijuana concentrate waste will be ground and mixed with other solid compostable or non-compostable waste such as paper waste, plastic waste, cardboard waste, food waste, yard waste, vegetable grease, oil or soil until the mixture is no more than 50% marijuana waste by volume. Liquid marijuana waste, such as concentrates, will be mixed with at least equal parts of non-marijuana waste, and stored away from all other marijuana and marijuana products inside the facility in a locked waste container. The unusable waste will be placed in a secured waste storage container, until it is transported to a landfill via a designated employee or a third-party contracted waste transporter. The Waste Log information will be securely stored as an official business record and will be made available upon request to AMCO.

AMCO received 5/24/2022

Form MJ-05: Marijuana Product Manufacturing Facility Operating Plan Supplemental

Section 5 – Testing Procedure and Protocols

Review the requirements under 3 AAC 306.520 and 3 AAC 306.550.

You must be able to certify the statement below. Read the following and then sign your initials in the box to the right: Initials

5.1. I will ensure that any individual responsible for collecting random samples for required laboratory testing under 3 AAC 306.550 will prepare the necessary accompanying signed statement, provide the signed statement to the marijuana testing facility, and maintain a copy as a business record under 3 AAC 306.755.

Answer "Yes" or "No" to the following question: Yes No

5.2. Will the marijuana product manufacturing facility be performing in-house testing (as defined under 3 AAC 306.990(b)(20)? ☐ ☑

If "Yes" to 5.2, you must be able to certify the statement below. Read the following and then sign your initials in the box: Initials

5.3. The area where in-house testing will occur is clearly identified on the Form MJ-02: Premises Diagram that is submitted with this application.

5.4. Describe the testing procedures and protocols the marijuana product manufacturing facility will follow:

The licensee, designated employee or manager will be responsible for collecting a random sample(s) from each production lot to be sent to a licensed testing facility. The responsible party will sign a statement certifying that the sample was randomly selected. A copy of the signed statement will accompany the sample to the testing facility and another copy will be maintained on-site as an official business record. The sample will be transported to the testing facility by the licensee, manager, employee, or third-party transport company. All transporters will have valid marijuana handler permits. The remainder of the production lot will be quarantined in secure containers, separate from all other marijuana and marijuana concentrates, until the passing testing results are received. During the quarantine period, all products will be securely stored on-site and kept cool and dry to prevent contamination or loss of efficacy. Testing facility results will be stored as an official business record and will be made available to AMCO upon request. All products that fail to pass testing will be rendered unusable, in compliance with all regulations.

Section 6 – Proposed Marijuana Concentrates and Marijuana Products

Review the requirements under 3 AAC 306.520, 3 AAC 306.525, and 3 AAC 306.560.

Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.

Product Name:	Sweet Gold Dust (Dry Sift)		
Product Type: Choose one.	Marijuana Concentrate		
Perishable: Yes/No	No	**Shelf Life:** If perishable.	
Intended Use: Smokable/ edible/topical/wholesale/etc.	Smokable/Wholesale/In-house		

Product Description: Details must include the color, shape, and texture.	Sweet Gold Dust (Dry Sift) has a grainy, sand-like consistency, with a free-form shape. Sweet Gold Dust ranges in color from white to yellow, brown, and gold.
Ingredients:	
Standard Production Procedure and Detailed Manufacturing Process:	Sweet Gold Dust (Dry Sift) is created naturally when it falls off from plant matter. Loose, dry buds and trim will be sifted on a fine mesh screen and the siftings will be collected in a bowl, pan, or trim tray underneath. Sweet Gold Dust (Dry Sift) will be properly packaged and stored until testing and sale or use in Sweet Matanuska Gold's concentrate products.
Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.

Section 7 – Proposed Product Packaging and Sample Labels

Review the requirements under 3 AAC 306.520, 3 AAC 306.565, and 3 AAC 306.570.
Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.

Product Name:	Sweet Gold Dust (Dry Sift)
Product Type:	Marijuana Concentrate

Packaging Description: Details must include the color(s), size, packaging materials used, total amount of THC, individual serving sizes (if multiple), and other specifics showing compliance with 3 AAC 306.565. Please include photos, drawings, or graphic representations.	Sweet Gold Dust (Dry Sift), in amounts of not more than seven (7) grams, will be placed into small glass, plastic or silicone containers and then packaged into resealable mylar bags, blister packs, or opaque cardboard boxes with a tamper seal or child-resistant design. All final packaging will be child resistant. THC will range from 25-99%. The actual amount of total THC will be listed on the label per testing results. Products packaged in windowed mylar bags or blister packs will be placed in opaque exit packaging by the retailer prior to the customer exiting the retail store. Up to five (5) pounds will be stored in food grade jars for wholesale sales and in-house use.
Sample Labels: Provide sample labels showing how the labeling requirements set forth in 3 AAC 306.570 will be met.	Produced By: Sweet Matanuska Gold License Number: 32497 Product Name: Sweet Gold Dust (Dry Sift) Strain: Batch/Lot Number: Gross Weight: Net MJ Weight: OZ(g) Best By Date: Packaging Date: Tested By: License Number: Total THC: THCA: CBD: CBDA: CBN: Microbial Test: Pesticides: Herbicides: Fungicides: Residual Solvent Test: Contaminants Test Result: Retailer: License Number: Alaska Safety Warning: Marijuana has intoxicating effects and may be habit forming and addictive. Marijuana impairs concentration, coordination and judgment. Do not operate a vehicle or machinery under its influence. There are health risks associated with consumption of marijuana. For use only by adults twenty-one and older. Keep out of the reach of children. Marijuana should not be used by women who are pregnant or breast feeding.

Section 6 – Proposed Marijuana Concentrates and Marijuana Products

Review the requirements under 3 AAC 306.520, 3 AAC 306.525, and 3 AAC 306.560.
Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.

Product Name:	Sweet Gold (Full Spectrum Bubble Hash)		
Product Type: Choose one.	Marijuana Concentrate		
Perishable: Yes/No	No	**Shelf Life:** If perishable.	
Intended Use: Smokable/ edible/topical/wholesale/etc.	Smokable/Wholesale/In-house		

Product Description: Details must include the color, shape, and texture.	Sweet Gold (Full Spectrum Bubble Hash) is sandy or gooey in consistency, with a free-form shape. Sweet Gold ranges in color from clear to yellow, brown and gold.
Ingredients:	N/A
Standard Production Procedure and Detailed Manufacturing Process:	To create Sweet Gold (Full Spectrum Bubble Hash) cannabis concentrate, an ice water bath extraction method is used. Cannabis flower/trim is frozen and then agitated, with the use of micron-density bags to separate the components needed for production from the plant matter. Trichomes from all density micron bags are collected. The final product, Sweet Gold (Full Spectrum Bubble Hash), is properly packaged and stored until testing and sale. CBD from an approved Alaska Industrial Hemp Source may be added during Trichomes collection phase.
Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.

Product Name:	Platinum Gold Cannagar		
Product Type: Choose one.	Marijuana Concentrate		
Perishable: Yes/No	No	**Shelf Life:** If perishable.	
Intended Use: Smokable/ edible/topical/wholesale/etc.	Smokable		

Product Description: Details must include the color, shape, and texture.	Platinum Gold Cannagar will be cylindrical in shape, with its exterior wrapped in cannabis leaves, which will give it a dark green or dark brown appearance. The core of the cigar will be made with cannabis flower or trim. The leaves will be adhered to the core with SHO (solventless hash oil or rosin drops, proposed Sweet Matanuska Gold products).
Ingredients:	
Standard Production Procedure and Detailed Manufacturing Process:	Firmly pack cannabis flower or trim into a cigar mold and insert a skewer through the center of the mold. Allow core to cure for several hours. After core is formed, wrap in cannabis leaves, "gluing" the leaves on with a small amount of SHO (solventless hash oil) or rosin drops (proposed Sweet Matanuska Gold products). Set cigars aside to cure for one month. When dry, weigh and package cigars. The final product, Platinum Gold Cannagar, will be placed into proper storage until prepared for testing and shipping. Actual concentrate used in production will be clearly indicated on the final product label.
Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.

Product Name:	Platinum Gold Joints		
Product Type: Choose one.	Marijuana Concentrate		
Perishable: Yes/No	No	**Shelf Life:** If perishable.	
Intended Use: Smokable/ edible/topical/wholesale/etc.			

Product Description: Details must include the color, shape, and texture.	Platinum Gold Joints will have the appearance and shape of a cannabis joint, but with 3/4 of the joint dipped in Solventless Hash Oil, Full Spectrum Bubble Hash or Rosin Drops (proposed Sweet Matanuska Gold products), may or may not contain bubble hash inside the joint, and coated with keif (another proposed Sweet Matanuska Gold product). The interior of the joint will be filled with cannabis flower or trim. The joint will be tan or brown in color.
Ingredients:	
Standard Production Procedure and Detailed Manufacturing Process:	Platinum Gold Joints will be either rolled by hand or with the use of a pre-roll machine to produce cannabis joints. Bubble hash may be combined with flower/trim. Cannabis flower or trim is placed in the machine and rolled, removed, then 3/4 of the pre-roll is dipped in Solventless Hash Oil, Full Spectrum Bubble hash or Rosin Drops. Next, the dipped portion of the pre-roll is rolled in kief, set on racks to dry. When dry, weigh and package joints. The final product, Platinum Gold Joints, will be placed into proper storage until prepared for testing and shipping. Actual concentrates used in production will be clearly indicated on the final product label.
Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.

Product Name:	Sweet Matanuska Gold Brick (pressed Hash)		
Product Type: Choose one.	Marijuana Concentrate		
Perishable: Yes/No	No	**Shelf Life:** If perishable.	
Intended Use: Smokable/ edible/topical/wholesale/etc.	Smokable/In-house/Wholesale		

Product Description: Details must include the color, shape, and texture.	Sweet Matanuska Gold Brick (pressed hash) is pliable and will be pressed into a rectangular shape with a color ranging from light to dark gold or amber.
Ingredients:	
Standard Production Procedure and Detailed Manufacturing Process:	Sweet Matanuska Gold Brick (pressed hash) will be made by pressing kief with the use of a powered press (pollen press). Gold Bricks are then weighed, packaged and stored until test results are received. CBD from an approved Alaska Industrial Hemp source may be added prior to pressing.
Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.

Section 7 – Proposed Product Packaging and Sample Labels

Review the requirements under 3 AAC 306.520, 3 AAC 306.565, and 3 AAC 306.570.
Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.

Product Name:	Sweet Matanuska Gold Brick (pressed Hash)
Product Type:	Marijuana Concentrate

Packaging Description: Details must include the color(s), size, packaging materials used, total amount of THC, individual serving sizes (if multiple), and other specifics showing compliance with 3 AAC 306.565. Please include photos, drawings, or graphic representations.	Up to seven (7) grams of Sweet Matanuska Gold Brick (pressed hash) will be placed into small plastic, glass (with or without silicone lining) or silicone containers and then packaged into resealable mylar bags (windowed or non-windowed) or opaque cardboard boxes with a tamper evident seal or child resistant design or blister package. THC will range between 25-99%. The actual amount of THC and CBD will be listed on the label per testing results. Products packaged in windowed mylar bag or blister package will be placed in an opaque exit bag by the retailer prior to customer exiting the retail store.
Sample Labels: Provide sample labels showing how the labeling requirements set forth in 3 AAC 306.570 will be met.	**Produced By**: Sweet Matanuska Gold **License Number**: 32497 **Product Name**: Sweet Matanuska Gold Bar (Pressed Hash) **Strain**: **Batch/Lot Number**: **Gross Weight**: **Net MJ Weight**: **OZ(g)** **Best By Date**: **Packaging Date**: **Tested By**: **License Number**: **Total THC**: **THCA**: **CBD**: **CBDA**: **CBN**: **Microbial Test**: **Pesticides**: **Herbicides**: **Fungicides**: **Residual Solvent Test**: **Contaminants Test Result**: Retailer: License Number: **Alaska Safety Warning: Marijuana has intoxicating effects and may be habit forming and addictive. Product Name:	Fo'SHO Gold (Solventless Hash Oil)		
Product Type: Choose one.	Marijuana Concentrate		
Perishable: Yes/No	No	**Shelf Life:** If perishable.	
Intended Use: Smokable/ edible/topical/wholesale/etc.	Smokable/Wholesale/In-House		

Product Description: Details must include the color, shape, and texture.	Fo-SHO Gold or Solventless Hash Oil has a thick, watery texture, viscous in nature and takes the shape of its container. Color will range from a pale yellow to a rich amber.
Ingredients:	
Standard Production Procedure and Detailed Manufacturing Process:	Rosin (a Sweet Matanuska Gold's proposed product) is squeezed using a heated press, the rosin will then become a pliable (Solventless Hash Oil), collected, packaged and shipped for testing. All other packages will be segregated until test results are obtained. CBD from an approved Alaska Industrial Hemp source may be added after collection.
Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.

Product Name:	Golden Hash (Hash Rosin Badder, Hash Rosin Wet Badder)		
Product Type: Choose one.	Marijuana Concentrate		
Perishable: Yes/No	No	**Shelf Life:** If perishable.	
Intended Use: Smokable/ edible/topical/wholesale/etc.	Smokable/wholesale/In-house		

Product Description: Details must include the color, shape, and texture.	Golden Hash (Hash Rosin Badder) has a creamy texture, similar to cake frosting, with a free-form shape, while Hash Rosin Wet Badder will appear smooth and glistening. Hash Rosin Badder ranges in color from yellow to brown or gold.) is sandy or gooey in consistency, with a free-form shape.
Ingredients:	N/A
Standard Production Procedure and Detailed Manufacturing Process:	To create Golden Hash (Hash Rosin Badder, Wet Badder) cannabis concentrate, Hash Rosin Badder, will be extracted from Bubble Hash Rosin in a jar and 'whipping it up' using zig-zag patterns while applying low heat until desired consistency is achieved. Product appearance will vary based on the terpene profile of the plant (liquidy consistency - Wet Badder, dryer consistency - Rosin Badder). Once rosin takes on a desirable color, chill in fridge with a loose lid for about 1 hr., then tighten lid for at least 24 hrs. The final product, Hash Rosin Badder, is then properly packaged and stored until testing and sale. For wet badder, leave rosin out at room temp for a few hrs to allow thin terpene layer to rise, smooth, and glisten. Then refrigerate after to maintain "wet" texture.
Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.

Product Name:	Golden Raw Terpenes		
Product Type: Choose one.	Marijuana Concentrate		
Perishable: Yes/No	No	**Shelf Life:** If perishable.	
Intended Use: Smokable/ edible/topical/wholesale/etc.	Smokable/Wholesale/In-house		

Product Description: Details must include the color, shape, and texture.	Golden Raw Terpenes has a translucent amber, tan or gold color, with a sticky, thick liquid consistency.
Ingredients:	N/A
Standard Production Procedure and Detailed Manufacturing Process:	This cannabis concentrate Golden Raw Terpenes, will be extracted from Bubble Hash Rosin (A proposed SMG Press product) by creating Bubble Hash Rosin at a low temperature. Once complete, place and seal in a jar, leaving the concentrate in a warm environment for 3 - 10 days. This causes the terpenes to naturally separate. The final product, Golden Raw Terpenes, is then properly packaged and stored until testing and sale or used in-house for concentrates such as "Gold Sauce and Diamonds"
Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.

Product Name:	Gold Jam (Hash Rosin Jam)		
Product Type: Choose one.	Marijuana Concentrate		
Perishable: Yes/No	No	**Shelf Life:** If perishable.	
Intended Use: Smokable/ edible/topical/wholesale/etc.	Smokable/Wholesale/In-house		

Product Description: Details must include the color, shape, and texture.	Gold Jam (Hash Rosin Jam) has a semi-solid appearance and texture, with small solid portions mixed into a liquid, similar to jam or apple sauce. Hash Rosin Jam ranges in color from yellow to tan, brown, green or gold.
Ingredients:	N/A
Standard Production Procedure and Detailed Manufacturing Process:	This cannabis concentrate, Gold Jam (Hash Rosin Jam), will be extracted from Bubble Hash Rosin (a proposed SMG Press product) by placing Bubble Hash Rosin in a jar and curing it at a moderate temperature. Wait for the Rosin to 'muffin up', which usually takes about 1 hour, then reduce heat for 6 -15 hours until desired consistency is achieved. The final product, Gold Jam (Hash Rosin Jam), is then properly packaged and stored until testing and sale. CBD from an approved Alaska Industrial hemp source may be added.
Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.

Product Name:	Gold Sauce & Diamonds		
Product Type: Choose one.	Marijuana Concentrate		
Perishable: Yes/No	No	**Shelf Life:** If perishable.	
Intended Use: Smokable/ edible/topical/wholesale/etc.	Smokable		

Product Description: Details must include the color, shape, and texture.	Sauce & Diamonds has two consistencies. The "Diamonds" are hard, crystalline structures within the "Sauce" which has a sticky, liquid consistency. Sauce & Diamonds has a translucent yellow, brown or gold color.
Ingredients:	N/A
Standard Production Procedure and Detailed Manufacturing Process:	This cannabis concentrate Gold Sauce & Diamonds, will be extracted from Bubble Hash Rosin (A proposed SMG Press product) by creating Bubble Hash Rosin, and then pressing the hash again at a higher temperature (250°+). This step 'cleans' up the debris in the hash. After waiting, squeeze the resulting THCA crystals from the catch bag, which will harden quickly, forming the diamond portion. Then, add the sauce portion, which will be the proposed SMG product "Golden Raw Terpenes". The final product, Gold Sauce & Diamonds, is then properly packaged and stored until testing and sale.
Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.

Product Name:	THCA Isolate		
Product Type: Choose one.	Marijuana Concentrate		
Perishable: Yes/No	No	**Shelf Life:** If perishable.	
Intended Use: Smokable/ edible/topical/wholesale/etc.	Smokable/Wholesale/In-house		

Product Description: Details must include the color, shape, and texture.	THCA isolate is a white to yellow fine powder, soft to the touch and takes the shape of its container.
Ingredients:	N/A
Standard Production Procedure and Detailed Manufacturing Process:	Ground marijuana material is loaded manually into a micron bag in between a piece of parchment paper inside a heat press to extract some solventless rosin. Then wrap the screen in a piece of parchment that is 4x the size of your original rosin measurements. Next, place everything that is folded into an extra piece of parchment paper that will catch any excess runoff of terpenes and sauce. Then set the heat press to the pressure desired (250 Material PSI), and the temperature desired (110 degrees for 300 seconds). Finally increase the temperature gradually while applying the same pressure to make the solventless THCA Isolate finished product.
Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.

Product Type: Choose one.	Marijuana Concentrate		
Perishable: Yes/No	No	**Shelf Life:** If perishable.	
Intended Use: Smokable/ edible/topical/wholesale/etc.	Smokable/Wholesale/In-house		

Product Description: Details must include the color, shape, and texture.	Sweet Gold Dew (Rosin Drops) has a sticky, thick liquid consistency, with a free-form shape. Sweet Gold Dew ranges in color from yellow to brown and gold.
Ingredients:	
Standard Production Procedure and Detailed Manufacturing Process:	Sweet Gold (Full Spectrum Bubble Hash) is pressed at a low temperature to create a "Bubble Hash Rosin", then heated to decarboxylate, turning the concentrate to the desired oil-like consistency. Medium-chain triglycerides (MTC Oil) is then added and blended together. CBD from an approved Alaska Industrial Hemp Source may be added during final production phase. Once Sweet Gold is ready, a sample will be sent for testing and the remainder of the batch will be packaged and segregated until test results are obtained.
Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.

Section 8 – Prohibitions

Review the requirements under 3 AAC 306.510.

8.1. I certify that the marijuana product manufacturing facility will not: Initials

a. **sell, deliver, distribute, or transfer any marijuana, marijuana concentrate, or marijuana product directly to a consumer, with or without compensation;**

b. **allow any person, including a licensee, employee, or agent, to consume marijuana, marijuana concentrate, or marijuana product on the licensed premises; or**

c. **manufacture or sell any product that is an adulterated food or drink, closely resembles a familiar food or drink item including candy, or is packaged to look like candy, or in bright colors or with cartoon characters or other pictures or images that would appeal to children.**

I declare under penalty of unsworn falsification that this form, including all accompanying schedules and statements, is true, correct, and complete.
