DRY SIFT HASH

Marijuana Concentrate
Not Perishable
Intended Use: Smokeable

Product Description: In powder form, dry sift hash will be a green/gold to gold/brown dust. When pressed and aged, the hash will appear a rich chocolate brown on the outside and lighter brown/yellow or greenish/brown inside. Variation in color, shape and texture will occur based on season, variety, age & grade.

Ingredients: Cannabis flower trichomes

Standard Production Procedure: Dry sift hash starts by agitating dry plant material above fine mesh screens to separate and collect the trichomes of the plant. Dried cannabis will be placed into a nylon mesh cylinder suspended in a food grade plastic container which will be sifted and refined by hand in nylon screens that will have increasingly smaller mesh sizes. With each pass across the screens more plant material will be removed and the hash will become purer. Trichomes will then be collected and either stored in a loose, powdery state or pressed into cakes by hand or with a hydraulic press.

Packaging Description: .5 gram,1 gram, 3.5gram, 7gram portions will be packaged in small silicone/glass containers, then into resealable, opaque and child resistant mylar bags for licensed retailers. Up to 5 pounds of hash may be packaged in glass jars with screw top lids for wholesale to other licensed product manufacturers. THC range will be approximately 20%-90%.
