Section 6 – Proposed Marijuana Concentrates and Marijuana Products

Review the requirements under 3 AAC 306.520, 3 AAC 306.525, and 3 AAC 306.560.
Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.

Product Name:	Rosin		
Product Type:	Marijuana Concentrate (Smokable/Wholesale/In-house)		
Perishable: Yes/No	No	**Shelf Life:** If perishable.	

Product Description: Details must include the color, shape, and texture.	Rosin can be smooth or sticky and is soft and pliable. The color can range from light yellow to light brown.
Ingredients: This box is not applicable to marijuana concentrates.	N/A
Standard Production Procedure and Detailed Manufacturing Process:	Rosin is made using a high pressure press and low heat. Cannabis flower, kief, or bubblehash is placed into filtration pouches which are loaded into a hydraulic press along with parchment paper. The press is heated slightly while it squeezes the concentrates out of the marijuana plant material. The pouch and parchment paper are then removed from the press. The rosin is then collected from the parchment paper and heated, agitated, and cooled with specific parameters to achieve desired consistency before storing in a cool place. The pouch full of cannabis matter is washed in ethanol to remove the residual THC concentrate to make winterized oil.
Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.

Section 7 – Proposed Product Packaging and Sample Labels

Review the requirements under 3 AAC 306.520, 3 AAC 306.565, and 3 AAC 306.570.
Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.

Product Name:	Rosin
Product Type:	Marijuana Concentrate (Smokable/Wholesale/In-house)

Packaging Description:
Details must include the color(s), size, packaging materials used, total amount of THC, individual serving sizes (if multiple), and other specifics showing compliance with 3 AAC 306.565. Please include photos, drawings, or graphic representations.

Up to 7 grams of rosin will be packaged into non-stick, silicone, acrylic, plastic or glass containers with a lid. The small container will then be packaged into a mylar bag, box or blister package. The product's complete packaging will be resealable, and child-resistant. Retail stores will ensure purchases are in opaque exit bags. The total THC content will range from 20-99% with the actual THC content listed on the label per the testing results.
Up to five (5) pounds of Rosin will be stored in sanitized food-grade containers for wholesale sales and in-house use with their respective labels and test results.

Sample Labels:
Provide sample labels showing how the labeling requirements set forth in 3 AAC 306.570 will be met.
