Alaska Marijuana Control Board

Operating Plan Supplemental

Form MJ-05: Marijuana Product Manufacturing Facility

Why is this form needed?

This operating plan supplemental form is required for all applicants seeking a marijuana product manufacturing facility license and must accompany **Form MJ-01: Marijuana Establishment Operating Plan**, per 3 AAC 306.020(b)(11). Applicants should review **Chapter 306: Article 5** of the **Alaska Administrative Code.** This form will be used to document how an applicant intends to meet the requirements of the statutes and regulations.

If your business has a formal operating plan, you may include a copy of that operating plan with your application, but all fields of this form must still be completed per 3 AAC 306.020 and 3 AAC 306.520(3).

What additional information is required for cultivation facilities?

Applicants must identify how the proposed establishment will comply with applicable regulations regarding the following:

- Equipment, compounds, and processes to be used
- Waste disposal
- Testing procedure and protocols
- Proposed marijuana concentrates and marijuana products
- Proposed product packaging and sample labels
- Prohibitions

This form must be completed and submitted to AMCO's Anchorage office before any new or transfer application for a marijuana product manufacturing facility or marijuana concentrate manufacturing facility license will be considered complete.

Section 1 – Establishment Information

Enter information for the business seeking to be licensed, as identified on the license application.

Licensee:	No Limit, LLC	**MJ License #:**	25205		
License Type:	Marijuana Concentrate Manufacturing Facility				
Doing Business As:	Cannabaska Concentrates				
Premises Address:	521 W. Tudor Road, Suite 203				
City:	Anchorage	**State:**	Alaska	**ZIP:**	99503

Section 2 – Overview of Operations

2.1. Provide an overview of your proposed facility's operations. Include information regarding the intake, flow, and transfer of marijuana, marijuana concentrate, and marijuana product at and from your premises:

All Shipments of marijuana and marijuana product that arrives at the facility will be first inspected by Smadar, the manager or a designated employee before being accepted and entered as inventory. The shipment contents will be reconciled with the transport manifest, shipment labels and packaging labels to ensure consistency. All product will be weighed by Cannabaska Concentrates and reconciled with the weight listed on the manifest and labels. Any shipments with discrepancies will be rejected. Shipments that pass initial inspection will be accepted into the facility, immediately entered into METRC and added to the inventory log. All marijuana and marijuana products will be tracked in METRC from intake into the facility, to its use in a manufactured product or disposal to its transfer to another licensed facility. At the end of each business day, Smadar or the manager will reconcile each transfer to or from another licensed facility with METRC and the inventory on hand to ensure consistency and to resolve discrepancies immediately. A random sample of each product manufactured at the facility will be sent to a licensed testing lab before being transferred to another licensed facility and the remainder of the production lot will be segregated from all other product until the testing results are received. Once passing testing results are received from the testing lab, marijuana products will be packaged and labeled in compliance with AMCO Regulations. The packaged products will then be transported by an employee of Cannabaska Concentrates who holds a valid marijuana handler permit or by a third party transport company with valid marijuana handler permits. All transfers will be entered into METRC and a trip manifest will be set with each shipment as well as stored on site as a business record.

Section 3 – Equipment and Compounds to be Used

Review the requirements under 3 AAC 306.555.

3.1. Describe the equipment and solvents, gases, chemicals, and other compounds the marijuana product manufacturing facility will use to create marijuana concentrates:

Equipment: Apeks Supercritical CO2 machine, freezer/chiller
Solvents: CO2, Ethanol
Gases: CO2
Chemicals: alcohol to clean and sterilize machines
Other Compounds: food grade propylene glycol, food grade vegetable glycerin

DocuSign Envelope ID: FC90FD9C-1B2D-4D1F-A7A0-6007B4BE5C57

Section 4 – Waste Disposal

Review the requirements under 3 AAC 306.740.

4.1. Describe how you will store, manage, and dispose of any solid or liquid marijuana waste, including expired or outdated marijuana or marijuana product, in compliance with any applicable laws. Include details about the material(s) you will mix with ground marijuana waste and the processes that you will use to make the marijuana waste unusable for any purpose for which it was grown or produced:

Cannabaska Concentrates anticipates the following marijuana plant and product waste at the manufacturing facility; (1) contaminated or infected marijuana or marijuana products (2) marijuana or marijuana products deemed by the licensee or a manager as unfit for sale or consumption for any reason (3) marijuana product that fails testing (4) marijuana plant waste created during the extraction process (5) marijuana or marijuana product that becomes expired (6) other marijuana or marijuana product waste as determined by the MCB or director. Once marijuana or marijuana product is deemed as waste, it will be separated from all other marijuana and marijuana products and securely stored in locked bins on the licensed premises and rendered unusable and recorded in METRC. All solid marijuana plant waste (plant matter waste from the extraction process such as plant matter that is pressed/squeezed to extract oil) and marijuana product waste will be ground in a grinder and then mixed with other solid compostable waste such as; food waste, yard waste, vegetable based grease/oils, or non-compostable waste such as paper waste, plastic waste, cardboard waste, and soil until the mixture is no more than 50% marijuana waste. Liquid marijuana waste such as concentrates will be mixed with at least equal parts of non-marijuana waste and then stored away from all other marijuana and marijuana products in locked containers on the premises, inside the facility in the locked waste container then transferred to the outdoors locked container once rendered unusable. The waste will then be picked up by the local waste truck and taken to the landfill. The logged information will be kept as an official business record an will be made available to AMCO at any time upon request.

Section 5 – Testing Procedure and Protocols

Review the requirements under 3 AAC 306.520 and 3 AAC 306.550.

You must be able to certify the statement below. Read the following and then sign your initials in the box to the right: Initials

5.1. I will ensure that any individual responsible for collecting random samples for required laboratory testing under 3 AAC 306.550 will prepare the necessary accompanying signed statement, provide the signed statement to the marijuana testing facility, and maintain a copy as a business record under 3 AAC 306.755.

DS

Answer "Yes" or "No" to the following question: Yes No

5.2. Will the marijuana product manufacturing facility be performing in-house testing (as defined under 3 AAC 306.990(b)(20)? ☐ ☑

If "Yes" to 5.2, you must be able to certify the statement below. Read the following and then sign your initials in the box: Initials

5.3. The area where in-house testing will occur is clearly identified on the Form MJ-02: Premises Diagram that is submitted with this application.

DS

5.4. Describe the testing procedures and protocols the marijuana product manufacturing facility will follow:

Smadar, the manager or an employee will be responsible for collecting a random sample from each production lot to be sent to a licensed testing facility. The licensee, manager or designated employee will sign a statement certifying that the sample was randomly selected. A copy of the signed statement will accompany the sample to the testing facility and another copy will be filed on-site as a business record. The sample will be transported to the testing facility by a Cannabaska Concentrates employee who holds a valid marijuana handler permit or by a third party transport company who has valid marijuana handler permits. The remainder of the production lot will be segregated from all other marijuana and marijuana products in secure containers until the testing results are received. During the quarantine period, all product will be securely stored on-site and then, Cannabaska Concentrates will ensure the products are kept cool and dry to prevent contamination or loss of efficacy. A copy of the testing facility results will be stored in the office on-site as an official business record and will be made available to AMCO upon request.

Section 6 – Proposed Marijuana Concentrates and Marijuana Products

Review the requirements under 3 AAC 306.520, 3 AAC 306.525, and 3 AAC 306.560.

Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.

Product Name:	No Limit Oil		
Product Type: Choose one.	Marijuana Concentrate		
Perishable: Yes/No	No	**Shelf Life:** If perishable.	
Intended Use: Smokable/ edible/topical/wholesale/etc.	Smokable/Wholesale		

Product Description: Details must include the color, shape, and texture.	The color of the No Limit oil will range from light yellow to a dark, golden brownish yellow depending on the marijuana strain used. The texture of the oil is a thick, sticky, viscous liquid.
Ingredients:	
Standard Production Procedure and Detailed Manufacturing Process:	No Limit oil will be produced in a closed-loop extraction machine with permitted solvents such as C02 or Ethanol. The machine uses temperature and pressure to create a phase change in the carbon dioxide to extract components in the plant materials which can be separated and collected. Pressures and temperatures are varied in order to target specific compounds and create oil. After the oil concentrate is collected from the vessel, it can be stored in a freezer.
Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.	

DocuSign Envelope ID: FC90FD9C-1B2D-4D1F-A7A0-6007B4BE5C57

Section 7 – Proposed Product Packaging and Sample Labels

Review the requirements under 3 AAC 306.520, 3 AAC 306.565, and 3 AAC 306.570.
Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.

Product Name:	No Limit Oil
Product Type:	Marijuana Concentrate
Packaging Description: Details must include the color(s), size, packaging materials used, total amount of THC, individual serving sizes (if multiple), and other specifics showing compliance with 3 AAC 306.565. Please include photos, drawings, or graphic representations.	.5 or one (1) gram of No Limit oil will be packaged in a child resistant glass or plastic one (1) ML vials with screw top lid. The vial will be placed into a black paperboard box with evident tamper seal. The total THC will range from 50-99% with the actual THC content listed on the label per the testing results. Retailer will ensure purchased product will be placed into an opaque exit bag or similar such as customers bag, pocket, etc prior to leaving the retail store. No Limit oil will be packaged in sealed container up to 1 one pound to be sold to other manufacturing facilities or used in house. Labels will clearly note the solvent used in production as indicated below for CO2 Oil.
Sample Labels: Provide sample labels showing how the labeling requirements set forth in 3 AAC 306.570 will be met.	**Produced By**: Cannabaska Concentrates **License Number**: 25205 **Product Name**: C02 Oil (No Limit Oil) **Strain**: **Batch/Lot Number**: **Gross Weight**: **Net MJ Weight**: OZ(g) **Best By Date**: **Packaging Date**: **Tested By**: **License Number**: **Total THC**: **THCA**: **CBD**: **CBDA**: **CBN**: **Microbial Test**: **Pesticides**: **Herbicides**: **Fungicides**: **Residual Solvent Test**: **Contaminants Test Result**: Retailer: License Number: **Alaska Safety Warning**: **Marijuana has intoxicating effects and may be habit forming and addictive. Marijuana impairs concentration, coordination and judgment. Do not operate a vehicle or machinery under its influence. There are health risks associated with consumption of marijuana. For use only by adults twenty-one and older. Keep out of the reach of children. Marijuana should not be used by women who are pregnant or breast feeding.**

Section 6 – Proposed Marijuana Concentrates and Marijuana Products

Review the requirements under 3 AAC 306.520, 3 AAC 306.525, and 3 AAC 306.560.

Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.

Product Name:	Wax		
Product Type: Choose one.	Marijuana Concentrate		
Perishable: Yes/No	No	**Shelf Life:** If perishable.	
Intended Use: Smokable/ edible/topical/wholesale/etc.	Smokable		

Product Description: Details must include the color, shape, and texture.	Wax concentrate is somewhat soft and pliable and can be either smooth or slightly sticky. The color ranges for light yellow to dark golden brown.
Ingredients:	
Standard Production Procedure and Detailed Manufacturing Process:	Wax will be produced in a closed-loop extraction machine using CO2 or Ethanol as a solvent and specifications for producing wax. The machine uses temperature and pressure to create a phase change in the carbon dioxide to extract components in the plant materials which can be separated and collected. Pressures and temperatures are varied in order to target specific compounds and create oil. After the the Wax is collected from the vessel, it can be stored in a freezer. **Actual solvent used in production will be indicated on the final product label.**
Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.

Product Name:	Shatter		
Product Type: Choose one.	Marijuana Concentrate		
Perishable: Yes/No	No	**Shelf Life:** If perishable.	
Intended Use: Smokable/ edible/topical/wholesale/etc.	Smokable		

Product Description: Details must include the color, shape, and texture.	Shatter is smooth and brittle when cool and soft and pliable when warm. The color ranges from light yellow to golden brown depending on the strain used and is generally broken into semi square pieces.
Ingredients:	
Standard Production Procedure and Detailed Manufacturing Process:	Shatter will be produced in a closed-loop extraction machine with specific settings for shatter and using CO2 or Ethanol as a solvent. The machine uses temperature and pressure to create a phase change in the carbon dioxide to extract components in the plant materials which can be separated and collected. Pressures and temperatures are varied in order to target specific compounds and create oil. After the the shatter is collected from the vessel, it can be stored in a freezer. Actual solvent used in production will be indicated on the final product label.
Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.

Product Name:	Distillate Oil		
Product Type: Choose one.	Marijuana Concentrate		
Perishable: Yes/No	No	**Shelf Life:** If perishable.	
Intended Use: Smokable/ edible/topical/wholesale/etc.	Smokable/Wholesale/In-house		
Product Description: Details must include the color, shape, and texture.	Distillate Oil has a color ranging from a clear light yellow to a dark amber. Distillate Oil is viscous in nature and will take the shape of its container.		
Ingredients: If a hemp derived product/CBD is an ingredient, what is the quantity and you must provide the SOA Department of Agriculture's registration number.	N/A		
Flavors: List all current and potential future flavors:	N/A		
Standard Production Procedure and Detailed Manufacturing Process:	Cannabis Concentrate will be extracted from flower or trim using a closed-loop machine with the use of permitted solvents such as: Co2 or ethanol depending on the selected process. The residual solvent in the solution is then purged below regulated ranges (3 AAC 306.645) under specified pressures and temperatures with the use of pressure vessels and a vacuum oven to achieve the desired consistency and appearance. The cannabis concentrate will then be distilled or winterized which will result in Distillate Oil. The Distillate Oil will then be packaged in cartridges, syringes or storage jars for use in-house and stored until final test results are obtained. The concentrated oil is then packaged into MCB approved packaging and stored until testing is complete, and then for sale. The actual solvent used will be clearly indicated on the final product label.		
Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.			

Section 7 – Proposed Product Packaging and Sample Labels

Review the requirements under 3 AAC 306.520, 3 AAC 306.565, and 3 AAC 306.570.
Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.

Product Name:	Distillate Oil
Product Type:	Marijuana Concentrate

Packaging Description: Details must include the color(s), size, packaging materials used, total amount of THC, individual serving sizes (if multiple), and other specifics showing compliance with 3 AAC 306.565. Please include photos, drawings, or graphic representations.	Distillate Oil will be packaged in vape carts or syringes in between .25 to 1 gram of Distillate Oil. Each cart or syringe will then be placed in a child-resistant blister pack, mylar bag or CR cardboard box. THC will range from 25-99% with the actual THC content will be listed on the label per the testing results. Products packaged in blister packs will be placed in opaque exit packaging by the retailer prior to the customer exiting the retail store. Up to 10 pounds of Distillate Oil will be stored in sanitized jars for use in production of infused joints and infused blunts.
Sample Labels: Provide sample labels showing how the labeling requirements set forth in 3 AAC 306.570 will be met.	**Produced By**: Cannabaska Concentrates **License Number**: 25205 **Product Name**: Distillate Oil **Strain**: **Batch/Lot Number**: **Gross Weight**: **Net MJ Weight**: OZ(g) **Best By Date**: **Packaging Date**: **Tested By**: **License Number**: **Total THC**: **THCA**: **CBD**: **CBDA**: **CBN**: **Microbial Test**: **Pesticides**: **Herbicides**: **Fungicides**: **Residual Solvent Test**: **Contaminants Test Result**: Retailer: License Number: **Alaska Safety Warning: Marijuana has intoxicating effects and may be habit forming and addictive. Marijuana impairs concentration, coordination and judgment. Do not operate a vehicle or machinery under its influence. There are health risks associated with consumption of marijuana. For use only by adults twenty-one and older. Keep out of the reach of children. Marijuana should not be used by women who are pregnant or breast feeding.**

Product Name:	Hash		
Product Type: Choose one.	Marijuana Concentrate		
Perishable: Yes/No	No	**Shelf Life:** If perishable.	
Intended Use: Smokable/ edible/topical/wholesale/etc.	Smokable/In-House/wholesale		

Product Description: Details must include the color, shape, and texture.	Hash will be firm, with a slight crumbly, sandy-like consistency. The hash will be yellow, brown, or gold, depending on the strain(s) used. The hash may be pressed into cylindrical pucks which may have a logo or identifying mark pressed into the top surface or in free form shape called Puck Hash.
Ingredients: If a hemp derived product/CBD is an ingredient, what is the quantity and you must provide the SOA Department of Agriculture's registration number.	N/A
Flavors: List all current and potential future flavors:	N/A
Standard Production Procedure and Detailed Manufacturing Process:	Hash will be created by first creating Kief (a proposed product). The Kief will then be pressed with a commercial pollen press into dense 'pucks', which will be cylindrical in shape. Another production option is to take cannabis trim, leaf, shake, or bud, put it in a bag and chill it overnight, fill bag with 1/3 ice, then flower/bud/trim/shake etc, and top off with ice, agitate in cold ice water bath, repeat with ascending filter sizes, drain and scrape the Hash. Hash may be used in the manufacturing process for in-house products or other MCB approved concentrates. The pressing mold may contain the licensees' approved logo, or another identifying symbol.
Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.

Product Name:	Infused Joint		
Product Type: Choose one.	Marijuana Concentrate		
Perishable: Yes/No	No	**Shelf Life:** If perishable.	
Intended Use: Smokable/ edible/topical/wholesale/etc.	Smokable		

Product Description: Details must include the color, shape, and texture.	Product will be conical in shape, with the appearance of a blunt rolled in an approved concentrate product. It will be brown and green in color, depending on the rolling leaf and strain(s) used.
Ingredients: If a hemp derived product/CBD is an ingredient, what is the quantity and you must provide the SOA Department of Agriculture's registration number.	N/A
Flavors: List all current and potential future flavors:	N/A
Standard Production Procedure and Detailed Manufacturing Process:	Infused Joints will be produced by: placing ground marijuana flower in a rolling paper, then coated with a thin layer of any approved and tested concentrate product(s) and/or a concentrate may be dispensed on the inside of the joint after infusion, the joints may then be rolled in kief, then set out to dry, then properly labeled and packaged for sale. Final concentrates used in production will be clearly indicated on the final product label.
Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.

Product Name:	Rosin		
Product Type: Choose one.	Marijuana Concentrate		
Perishable: Yes/No	No	**Shelf Life:** If perishable.	
Intended Use: Smokable/ edible/topical/wholesale/etc.	Smokable/Wholesale/In House		

Product Description: Details must include the color, shape, and texture.	Rosin is sticky and waxy, somewhat translucent with an amber color. The consistency is similar to sap and is smooth and pliable.
Ingredients: If a hemp derived product/CBD is an ingredient, what is the quantity and you must provide the SOA Department of Agriculture's registration number.	N/A
Flavors: List all current and potential future flavors:	N/A
Standard Production Procedure and Detailed Manufacturing Process:	Rosin will be produced via heat and pressure using a hydraulic press with heated metal pressing plates. Marijuana plant material or hash will be placed into mesh bags then placed between parchment paper and onto the press. The heat and pressure will move the rosin out of the nylon bags and onto the parchment paper. Rosin is collected in a sealed container then packaged and stored until final test results are obtained.
Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.

Section 8 – Prohibitions

Review the requirements under 3 AAC 306.510.

8.1. I certify that the marijuana product manufacturing facility will not: Initials

a. Sell, deliver, distribute, or transfer any marijuana, marijuana concentrate, or marijuana product directly to a consumer, with or without compensation; DS

b. Allow any person, including a licensee, employee, or agent, to consume marijuana, marijuana concentrate, or marijuana product on the licensed premises; or DS

c. Manufacture or sell any product that is an adulterated food or drink, closely resembles a familiar food or drink item including candy, or is packaged to look like candy, or in bright colors or with cartoon characters or other pictures or images that would appeal to children. DS

I hereby certify that I am the person herein named and subscribing to this application and that I have read the complete application, and I know the full content thereof. I declare that all of the information contained herein, and evidence or other documents submitted are true and correct. I understand that any falsification or misrepresentation of any item or response in this application, or any attachment, or documents to support this application, is sufficient grounds for denying or revoking a license/permit. I further understand that it is a Class A misdemeanor under Alaska Statute 11.56.210 to falsify an application and commit the crime of unsworn falsification. DS
