THE STATE  
*of* **ALASKA**  
GOVERNOR MIKE DUNLEAVY

Alcohol and Marijuana Control Office

550 West 7<sup>th</sup> Avenue, Suite 1600  
Anchorage, AK 99501  
Main: 907.269.0350

## MEMORANDUM

TO: Alcoholic Beverage Control Board      DATE: May 26, 2020  
FROM: Jane P. Sawyer, Regulations Specialist      RE: Regulations Project – Combined  
Tasting Rooms

The board opened this regulations project at the September 2019 meeting to clarify the limits on quantity sold of an alcoholic beverage when there are combined manufacturing tasting rooms at the same licensed premises. At the January 2020 meeting, the board sent the draft out for public comment. The draft was out for public comment for about 45 days closing on March 13, 2020, and received several comments which are attached.

This project would create a new section under Article 4. General Provisions Regarding Licensees and Licensed Premises in 3 AAC 304. The intent of the new section is to make it clear that when a licensee holds two or more manufacturing licenses at the same licensed premises, not more than three drinks total may be sold each day to a person for consumption on the licensed premises. Furthermore, it defines what a drink is for the purpose of the regulation.

Options for the board:

- Vote to adopt
- Amend and put out for public comment
- Send back to staff for revisions
- Close the project without action

3 AAC 304 is amended by adding a new section to read:

**3 AAC 304.475. Overlapping On-Premises Consumption for Manufacturing**

**Licenses.** Unless prohibited under AS 04.16.030, when a licensee holds two or more manufacturing licenses at the same licensed premises, the licensee or employee or agent of the licensee may sell each day to a person for consumption on the licensed premises not more than three drinks total. For the purpose of this section, one drink is

- (1) six ounces of the winery's wine, mead, or cider or 12 ounces of any of the winery's cider that contain less than 8.5 percent alcohol by volume;
- (2) 12 ounces of the brewery's product; or
- (3) one ounce of the distillery's product. (Eff. \_\_\_/\_\_\_/\_\_\_\_\_, Register \_\_\_)

**Authority:** AS 04.06.090 AS 04.06.100 AS 04.11.395

## Comments on: NOTICE OF PROPOSED CHANGES ON COMBINED TASTING ROOMS IN THE REGULATIONS OF THE ALCOHOLIC BEVERAGE CONTROL BOARD

Submitted By	Comment
1/23/2020 7:53:12 PM	Hello,
Galen Jones <a href="mailto:galen.jones@doubleshovelcider.com">galen.jones@doubleshovelcider.com</a>	Please add "mead" to the list of beverages in (1), which includes drinks below 8.5% abv where 12 oz are counted as one drink. Meads are starting to be fermented at lower volumes, carbonated, and serves like a cider. This drink is called "melome!" and is becoming very popular. See proposed language below between asterisks.
San Francisco, CA, US <b>Anonymous User</b>	It would be a financial hardship, illogical, and unreasonable to not allow this drink to be in the 12oz per drink category.
	(1) six ounces of the winery's wine, mead, or cider or 12 ounces of any of the winery's cider <b>**or mead**</b> that contain less than 8.5 percent alcohol by volume;
	Thank you for your consideration,
	Galen Jones (co-owner) Double Shovel Cider Co. 907-227-9849

**Subject:** Proposed regulation change  
**Date:** Thursday, January 30, 2020 12:27:46 PM

---

The proposed regulation change limiting the number of drinks that can be served by breweries needs to be defeated.

Could a proposed change be any more obvious as to who is behind it than this one? This change is not in the best interest of the public and only serves those that view breweries as competitors. Bar owners have, for years now, been trying to shut out their competition by heaping on more and more regulations and squeeze out competition. There is a reason people go directly to the breweries and not the bars, the atmosphere, the fresh and innovative products and the overall experience.

Alaska used to be known as a place where hard work and innovation was rewarded, this proposed regulation change simply puts another hurdle in front of new business owners making it difficult to grow a business, employ Alaskans and support local communities. The board should be looking for ways to relax regulations, encourage growth and help the overall economic situation in Alaska. Please do not allow special interest groups to influence you in a way that creates monopolistic job killing regulations.

Russ Krafft  
Consumer of innovative Alaska beverages.

Thanks for taking the time to read my email about the proposal to limit the amount of beverages consumed in a multi manufacturing premise.

I am NOT in support of regulating how many drinks a business can serve to customers. Is this not America the land of the free? Why would anyone think it is a good idea for a governing body to tell a private business how to operate or how much of what they make they can sell.

Was the language of this regulatory proposal not proposed by the former director of AMCO who was fired from her position for putting forth unnecessary regulatory projects? THIS IS ONE OF THOSE UNNECESSARY PROPOSALS.

You want to regulate multi manufacturing businesses but not any other license types. What is the goal here? I live in a community where a business like this exists and it is the biggest employer in our community. Being the biggest employer makes the jobs for this company highly desirable which in turn reduces the amount of employee turnover which in turn leads to well trained, responsible employees that are likely to follow the responsible serving techniques adopted by responsible businesses. Many of my friends and family would not be able to live in this town if it weren't for the business operating successfully. Operating a business like that has many costs associated with it and asking them to limit the amount of product they sell will limit their income and have negative affects on many people.

What is the goal here? Is it to prevent people from driving intoxicated? It is not the governments job to force private businesses to sell less product to prevent drunk driving. Every bartender and server in the state is trained on how to recognize intoxication and asked to not serve to intoxicated people. Furthermore if patrons can only have three drinks at one location I believe they will move around from establishment to establishment over the period of a few hours and this will make it harder for a trained server or bartender to keep track and serve responsibly and will increase the amount of intoxicated driving that takes place.

Again, what is the goal here? Is it to prevent people from drinking too much? Its not the governments job to say how much of something someone can consume. If you guys really want to go that route then you should make it illegal for people to buy a 48 ounce soda pop and three cheeseburgers at mcdonalds because the cost of healthcare related to obesity and hypertension in our state is a far bigger problem than people having four beers at a tasting room.

I am in staunch disagreement with the proposal to reduce the amount of product sold to a customer in a business with multi manufacturing licenses.

Thanks for your time

**Subject:** Public Comment: AAC 304.475  
**Date:** Thursday, January 30, 2020 4:49:08 PM

---

Good afternoon,

I'm writing regarding the public comment associated with AAC 304.475.

I am opposed to this change for the following reasons:

Responsible service of alcohol is responsible service of alcohol, regardless of the limits or types of manufacturing licenses held. If the proposed change is due to the fear that customers will be overserved, that is not the case. I have spoken to my coworkers, and rarely do they serve more than 3 drinks to a patron, if anything another beverage from a different license type. What is the harm in that? Servers have gone through the state required TAPs course, it's there for a reason.

Businesses who have invested in the additional licensing have banked on a reliable government body to enforce the existing laws, not increase overreach and limits. A lot of time and money has been spent, both in infrastructure and hiring employees.

With the ability to serve drinks from multiple license types, we have been able to create jobs, and options have been increased for guests to enjoy at tasting rooms.

As I said, I have not seen irresponsible service of alcohol or anyone put in danger due to being offered a wide array of beverages. Tasting rooms already have the most restrictions out of any type of alcohol license holder in the state, is there responsible service of alcohol at all bars?

The language "overlapping on-premise consumption" indicates that restricting the drink limits would not apply to multi-beverage manufacturers who had separate tasting room locations based on license type. To avoid this proposed regulation, manufacturers would have to separate tasting locations which would create an unsafe environment, increasing the likelihood of consumption. How is one server supposed to know how much the patron consumed at the other location? In an "overlapping" licensed tasting room, consumption of alcohol can be responsibly monitored and served.

Thank you for your time and consideration,

**Jackie Willmott**

Board:

I oppose the regulation to limit the number of beers served to patrons at breweries. I see this as "Big Brother" overstepping boundaries in so many ways.

If you are going to burden them with these limitations, then you will also have to set a 3 drink limit for all bars and restaurants....otherwise you are discriminating..

I don't like or drink beer, so I am not opposing this for personal consumption reasons.

Government agencies/boards need to be very careful about discriminating against businesses.

To whom it may concern,

The proposal to cut the amount that can be consumed at craft brewery's, winery's and /or distillery's down 66% is an unfair idea. Bar and restaurant owners are allowed to serve as much as they feel necessary to anyone over the age of 21 with little to no repercussions. Craft breweries in specific already have a limit of 36 oz per person. This is way below the amount that bars serve people on the daily. I stand with our local breweries and strongly oppose your proposal to further restrict there serving quantities.

**To:** [CED AMCO REGS \(CED sponsored\)](#)  
**Subject:** Opposition to new proposed 3 drink limit  
**Date:** Wednesday, February 05, 2020 9:46:53 AM

---

Dear AMCO staff,

My name is Brad Wakefield and I worked for Twister Creek LLC who operate under three overlapping manufacturing licenses, Brewery, Winery, and Distillery. I am writing to state my opposition on the new restrictions proposed by AMCO. They are an infringement on multiple license holders in the state of Alaska. These licenses are not cheap or easy to obtain and they employ a lot of extra people when a manufacturer holds multiples. To restrict the amount of drinks a customer can purchase directly affects the amount of money the business can generate to afford the extra workers associated with multiple licenses. To expect a tasting room to only be allowed to sell the amount that one license can normally have but to staff for three separate divisions is unreasonable. To be allowed to operate 3 separate licenses but only capable of generating the income from the amount that equates to 1 license is unreasonable. Not only is paying the staff an issue, but to maintain 3 licenses means 3 times of the raw materials, 3 times the packaging materials, 3 times the amount of utilities and the list goes on.

Secondly, If the concern is about over serving a customer it shouldn't be, the responsible sale of alcohol is the responsible sale of alcohol. That is the only way to serve and sale alcohol, responsibly. In our tasting room no one ever would be served the maximum amount of alcohol allowed under 3 different licenses, that would be extremely irresponsible, and actually illegal since the customer would most likely be heavily intoxicated. Our staff as well as all staff in the alcohol industry are trained to not over serve. Just like bars and restaurants that have no drink limit it is the job of the server and bartender to serve responsibly.

Thirdly, the fact that these licenses are overlapping and exist in one tasting room is actually a good thing. The alternative would be to separate each license into it's own separate tasting room on our property, this would not be a good solution. If a customer was to want to go to each tasting room the bartenders would not know how much alcohol the customer consumed at the previous tasting room. In this scenario a customer could have the potential to drink the maximum amount of drink allowed per license. In the overlapping multi-manufacturing license model we have the ability to monitor exactly what and how much an individual has consumed, and that is how we serve alcohol responsibly.

Lastly, the implications of restricting the limit is a slippery slope. If you restrict overlapping multi-manufacturing licensed businesses then what is next? Putting restrictions on Brown Jugs because they have multiple duplicate licenses to have multiple store locations? Restricting bars and restaurants because they duplicate their licenses so they can have a bar down stairs and have one up stairs? Restricting wholesalers who duplicate their licenses to open another

operation?

This restriction is bad for local business' that already have to compete with establishments that are not already heavily restricted like tasting rooms are. Competition aside, the overlapping licenses are actually good for the sake of fully monitoring an individual's alcohol consumption. This proposal is just rhetoric left over from Erika McConnel who was voted off the AMCO board for this exact behavior of adding unnecessary restrictions to an already heavily restricted industry.

Thank you for your time,

Brad Wakefield

---

AMCO Board,

I am writing regarding the open public comment for AAC 304 amendment: AAC 304.475, Overlapping On-Premise Consumption for Manufacturing Licenses.

I oppose this re-write. I am a member of the Talkeetna community and am a big supporter of Denali Brewing, Alaska Cider and Meadery, and Denali Spirits and Distillery. What they have created is a business that centers around responsible service of alcohol, regardless of the number of licenses held.

Any business should not be punished for expanding its repertoire of beverages offered, it creates a slippery slope for other industry types that hold multiple licenses.

We should be supporting and promoting entrepreneurship and the expansion of job opportunities in the State of Alaska. Investments made in expanding license types means the need for additional labor.

Thank you for your time and consideration,  
Andrew Esola

Alcoholic Beverage Control Board  
550 West 7<sup>th</sup> Ave Suite 1600  
Anchorage, AK 99501

Dear Board Members,

I am writing you on behalf of Devil's Club Brewing Company voicing opposition to the proposed regulation packet AAC 304.475. It is our belief that this proposal represents an unnecessary and burdensome restriction on responsible businesses in Alaska. If the proposal was adopted it would reflect an inconsistent enforcement of long-standing business models while creating an unstable marketplace and discouraging business growth in Alaska.

The proposed reduction in privileges due to multiple licenses is not reflected by other license types in Title IV. There are no privileges revoked from multiple Beverage Dispensary License holders, Package Store Licenses, Restaurant Eating Place Licenses or Distributor license types. The revocation of privileges to multiple manufacturing licenses is outside the norm for Title IV.

The mission of AMCO and its regulatory agency, the Alcoholic Beverage Control Board, is to "Enforce alcohol and marijuana commerce laws and provide clear, consistent standards for licensure to protect the public from harm." If the Board is determined to inconsistently enforce laws by adopting regulation that has no comparable statute in Title IV, we would ask that the Board demonstrates proof of the harm that is being caused to the public by the current operation of businesses with multiple manufacturing licenses like Devil's Club Brewing Company.

Sincerely,

Evan Wood

**Subject:** AAC 304 amendment: AAC 304.475  
**Date:** Thursday, February 13, 2020 4:34:28 PM

---

Respected members of the Alcohol & Marijuana Control Office,  
I am writing regarding the proposed amendment AAC 304.475. I respectfully ask that you reject this amendment.

I have worked in the service industry for over 30 years. In that time, I worked my way from dishwasher up to general manager while working for several businesses in several states. I have been a restaurant manager for over 13 years in Alaska and I have had the opportunity to work on the retail, wholesale and production sides of the alcohol industry in this state.

Being a young state, I recognize the challenges we face regulating an ever-changing alcohol industry. In some cases, increased regulation may have a positive effect. For several reasons, I believe AAC 304.475 would be detrimental:

1. In my community, the local production facility has 3 separate licenses and the tasting room provides year-round employment in a place where work can be hard to find. Restricting the ability to sell product will have a direct impact on sales and therefore employment opportunities for local residents.
2. In an industry where businesses are constantly evolving and innovating it is important for regulatory agencies to provide clear and consistent guidelines for operation. If the statutes are open to interpretation and change at whim, it can make it very difficult for business to make plans and strive to grow and flourish. It can even be financially catastrophic for a business to commit to a plan, only to have the regulations changed.
3. It seems unfair to target certain existing license holder privileges and not others. Why should holders of multiple production facility licenses be targeted with more strict regulation, but not holders of multiple package store or beverage dispensary licenses?
4. I have worked with countless highly trained alcohol service professionals in Alaska. I have visited several tasting rooms across the state. It is my heartfelt belief the vast majority of owners and operators in the state strive to do a good job and follow laws and regulations. I do not believe statutes should be used as an attempt to enforce responsible service and/or consumption of controlled substances. Responsible service comes down to the trained professional. Restrictive legislation will only serve to hurt commerce.
5. Restricting the amount holders of multiple licenses can serve will encourage operators to open multiple tasting rooms. If consumers must visit multiple locations to sample product, it will make it impossible to provide responsible service and monitor consumption. If guests remain in one location, trained service professionals can do their job to ensure responsible consumption.
6. One of the most troubling aspects of the proposed legislation is that a current, legally granted privilege given to holders of multiple licenses may be taken away/restricted. It is impossible to know the future or guess all the possibilities of what might happen in any given industry. It is important to change and adapt and make sure industry grows in a healthy, responsible way. It has not been demonstrated that the existing privileges are having negative impacts. So, why restrict them?

I sincerely appreciate you taking the time to hear my concerns. I have complete respect for the difficult job you all have. Thank you again for your time and consideration.

Sincerely,  
Shawn B Standley

Casey Jacobs

PO Box 1229

Willow, AK 99688

.

Dear AMCO,

I am writing in reference to the AAC 304 amendment: AAC304.475 Overlapping On-Premises Consumption for Manufacturing Licenses.

I currently work in a tasting room. As a bartender it is a difficult task to keep track of consumption of our patrons within the current rules and regulations. If we designate a tasting room for each license it will make it even more difficult. It would be easier to get overserved if this does happen. Having one bar for all the licensing is most effective way to keep track of consumption.

Limiting overlapping license holders to three drinks a day is rather unfair. If you reduced consumption statewide across the board for all license holders that would be fine. It might even help solve some social problems as well.

The Brewer's Guild of Alaska is in favor of maintaining the current interpretation of the law, in which manufacturers have been operating under.

I take my responsibilities serving alcohol very seriously. Peoples lives are at stake. Responsible service of alcohol is the same regardless of limits.

Sincerely,

Casey Jacobs

Alaska Alcohol Board Members,

I am an Alaskan resident of North Pole. I find myself yet again writing to you in complete disbelief of your proposed regulation. I look at our state and its money problems and wonder why you would continue to attack this industry? Is the DUI rate sky rocketing? Is there a legitimate reason for the new proposal? What I know is that at least two of the board members own businesses that hold licenses of these types. So first, how does the proposed regulation affect these board members directly? How can a board propose regulations on something when they have a vested interest in it? Does this help their personal business? What do they gain from this new regulation? Do they recuse themselves from votes that would give them personal gain? I have lived in this state for well over 15 years, and I never go to bars. Why? Because bars are the issue! There is no incentive for them to provide an atmosphere that I would want to go to because of your regulations. I have never seen a fight or even an argument in a brewery. I have visited many states, some with very restrictive ideals on alcohol like the state of Utah. And what's funny is that even on my recent visit to Salt Lake City I stopped into a brewery and had a beer. No restriction on the amount I wanted, there were TV's and entertainment there. And people were enjoying themselves, without harming one another. On the same trip I visited breweries in Albuquerque New Mexico, I saw entertainment, TV's and families enjoying themselves. I can go to any bar in Fairbanks and I am almost guaranteed to see idiots doing idiotic things. Except according to you and your rules I can go to these bars and drink myself full and without restriction. What is the fascination of this board and strangling a market that provides jobs and brings revenue into these areas? I vehemently oppose your proposed AAC 304.475 and your continued attempt further harass these small businesses. At a time when our state is in dire need of small business and jobs, our unemployment rate is the highest in the nation FYI, you seek to further cut their ability to thrive. With that, I implore you to stop moving forward with this proposed regulation! Thank you, Chris Miller

To whom it may concern,

I write to you to make my opposition to the proposed AAC 304 amendment - AAC 304.475 known.

I find this proposed legislation to be potentially detrimental to growing craft brewery/distillery/winery industry in our state. Frankly, this proposal appears to be aimed at limiting successful, job-creating businesses to the benefit of established bars and retailers.

I question what benefit this proposal would provide the public. I see high potential for negative impact to a growing industry that provides jobs directly to residents, to young Alaskan entrepreneurs, and especially to consumer choice. If a multiple manufacturing license holder is following existing state laws to serve its products, why introduce additional restrictions?

Thank you very much for your time and attention,

Joseph Bablonka

To: WHOM IT MAY CONCERN,

I oppose the draft language in AAC 304.475 and do not support the proposed restrictions to holders of multiple manufacturing licenses.

Thank you,

M. Feuze.

It is with extreme disappointment that when visiting our favorite restaurant and brewery in Talkeetna, my husband and I learned about the proposed regulations on limiting alcohol consumption. We are property owners in Talkeetna, and have been avid supporters of Denali Brewing Company since 2009. It has been incredible to watch the success and expansion of what used to be a one room brewery. Visiting the brewery is a highlight for us and anyone visiting Talkeetna. It brings in a vast amount of tourists and people passing through wanting to fill up a growler. It is also fantastic spot for locals to meet up after a day playing in the beautiful Talkeetna Mountains. It would be a huge blow to the community of Talkeetna and South-central Alaska if this regulation passed. This is a thriving business which caters to locals, and has been serving alcohol now for 11 years now. In my experiences they have been diligent about being professional and serving people in a reasonable manner. Through the years as a customer, I have always enjoyed the laid back atmosphere, and had never witnessed someone intoxicated or unruly due to an excess of drinks. I can not say the same thing about being in a bar or walking down Fourth Avenue in Anchorage. Breweries should not be the target of this limitation, as the patrons here are not the inebriates that cause a ruckus. People come to this brewery for the enjoyment of craft beer and alcohol, to be around good company all year round. By limiting the amount of drinks served to one person, one can not fully experience the artisan craft. The owners and workers of this establishment care about their product, and should not be penalized by limiting the amount of drinks a customer can try. By keeping full time employees on their payroll all year long the brewery is able to use them in the brewing process as well as employ them at the bar when brewing is at a lull. By limiting the amount of drinks one customer may have the brewery will lose business. Why should a beloved local gathering place be limited, when another bar in the same vicinity has the ability to serve unlimited drinks of liquor and beer to their patrons all night long? I strongly oppose this proposition and hope you consider the negative impact it will have on the community.

Dear AMCO board,

I have been conducting and owning business interests in Alaska for over 25 years and have been actively involved in commerce and community work for all of the 34 years I have been here. I have a spotless record as both a citizen and a business owner. Over that time period I have seen a lot of regulatory oversight in a variety of industries. This does not seem to be in keeping of good governance and objective regulation on behalf of the public good. Rather, it seems to be an effort to remove liberties that have already been in place and approved for years without negative consequence. This does not foster a business climate that encourages growth and investment. Regulatory bodies that cannot think through and apply a regulatory environment that is consistent and applied towards all participants are discriminatory and ripe for further challenge at the expense of the state and the business community which ultimately affects the consuming public.

The intent of this regulation is not without merit; to regulate and manage potential for overconsumption. However, this regulation will actually reduce the ability to regulate consumption by putting up barriers to its oversight. Servers in one tasting location will not know or be aware of consumption in another tasting room. Given the reasonable constraints on the various types of drinks it only make common sense to serve each to the extent possible in one location in which the server is able to monitor consumption regardless of what is ordered.

This regulation was put forward by the former executive director of AMCO who was fired for putting forward these types of discriminatory, short sighted, and unnecessary oversight burdens. Let's not let a bad regulator that is no longer even a part of the board continue to have a detrimental effect on what has been good and working until now. And let's not derail the efforts of time and expense of others in the industry that are planning to serve the public in similar manner in their own tasting rooms.

The Brewers Guild of Alaska (BGA) is in favor of maintaining the current interpretation of the law. CHARR is also in favor of maintaining the current interpretation of the law as long as no more than 20% of a manufacturers product is sold through the tasting rooms. Denali Brewing has already been granted this approval and is on its second renewal as a multi license manufacturer. It has invested considerable time, money, and is committed to a set of rules that have been in place and supported by the board until this regulation. Other manufacturers in the growth industry are planning to do the same. Fickle, arbitrary, regulatory environments do not encourage trust and further investment; as such the public is not served well; no pun intended. If one customer wants to sample beer and another wine why shouldn't both be able to do so within the limits that are already in place?

There are others that are in various stages of implementing multiple license tasting rooms as well. Will you throw away their time and investment as well? Will not the voice of opposition just grow louder?

Respectfully submitted,

Ty Schommer

**MATANUSKA-SUSITNA CONVENTION & VISITORS BUREAU**

February 28, 2020

Alcohol & Marijuana Control Office  
550 West 7<sup>th</sup> Avenue, Suite 1600  
Anchorage, AK 99501

To: AMCO

The Mat-Su Convention & Visitors Bureau board of directors unanimously voted to oppose amendment AAC 304.475. The Mat-Su CVB has over 200 members and advocates for a sustainable, strong visitor industry. Established in 1986 the Mat-Su CVB is also the Destination Marketing Organization (DMO) responsible for promotion and awareness to grow the visitor industry in the Mat-Su Borough.

We believe it would be detrimental to our community by negatively impacting the livelihoods of Mat-Su families and discouraging commerce. There are multiple manufacturers in the Mat-Su Borough that would be impacted by this amendment. These businesses have a healthy, growing relationship with the tourism industry. Placing additional restrictions on tasting rooms would be detrimental to tourism in the region.

Thank you for your time and consideration.  
The Mat-Su Convention & Visitors Bureau board of directors

A handwritten signature in black ink that reads "Bonnie Quill".

MAR - 2 2020

Brewers Guild of Alaska  
PO Box 242411  
Anchorage, AK 99524  
February 28, 2020

To Whom it may Concern,

I am writing today regarding to the regulatory project proposed to address regulations in section 3 AAC 304.475. The Brewer's Guild of Alaska is opposed to the regulatory project limiting the operations and service privileges of multiple manufacturer tasting rooms. The Brewer's Guild has a standing resolution of support for multiple manufacturing tasting rooms and we are opposed to this project for the following reasons:

- At no point in Title IV statute is there any intent, either expressed or implied to limit manufacturer tasting rooms based on the additional manufacturing operations that occur within a manufacturer's premises.
- There is no precedent in regulation or law to prohibit or limit product sale quantities of any individual license type based on the conjoining of two separate licensed facilities.
- At no time has the Brewer's Guild of Alaska been informed of public health or safety incidents related to the multiple manufacturer tasting room.
- Every server, regardless of the retail point license type is required to be certified under an alcohol server training class. Multiple manufacturer tasting room employees are trained to prevent over-consumption and work diligently, just as all employees of the alcohol service industry do, to protect the community from intoxicated persons.
- If a licensee submits the proper documentation, fees, and is in good standing with the community and AMCO, they should be afforded the privileges allowed under their license as stated under regulation and statute. Doing otherwise sets a precedent that AMCO can create regulations that operate outside the laws set forth under Title IV and the mandates of the State of Alaska legislative and executive branches.

Thank you for your consideration in this matter,

Lee Ellis

Board President, Brewer's Guild of Alaska

To whom it may concern,

I disagree with proposal AAC 304.475. I feel it is important for manufactures with single or multiple beverage licenses to be serving their guest responsibly regardless of drink limits.

Sincerely,

Heidi LaFleur

AMCO  
MAR - 3 2020

**1,411 have signed.** Let's get to 1,500!

**Denali Brewing started this petition to State of Alaska Alcoholic Beverage Control Board**

The proposed amendment (AAC 304.475) would restrict the on-premise sale of alcoholic beverages by holders of multiple manufacturing licenses (breweries, wineries, distilleries) to 3 drinks per person per day.

We believe this would adversely affect the livelihoods of Alaskans and negatively impact commerce in our communities.

The State has not and would not reduce privileges for any other license type, such as holders of multiple package store or beverage dispensary licenses.

The Brewer's Guild of Alaska (BGA) is in favor of maintaining the current interpretation of the law.

Why should a regulatory agency take action against responsible operators?

Note: You must be an Alaskan resident to sign.

**Start a petition of your own**

This petition starter stood up and took action. Will you do the same?

**Opposition to AAC 304 amendment: AAC 304.475 Overlapping On-Premises Consumption for Manufacturing Licenses**

We hereby oppose the proposed amendment to AAC 304.475 that would limit the number of drinks served to an individual by multiple manufacturing license holders to 3 per person per day.

We believe proposed amendment AAC 304.475 would adversely affect the livelihoods of Alaskans and negatively impact commerce in our communities.

We call on the Alaska Alcohol and Marijuana Control Board (AMCO) to reject this amendment.

Note: you must be an Alaska resident to sign

**Subject:** Opposition to regulatory proposal AAC 304.475  
**Date:** Monday, March 9, 2020 6:36:20 PM

---

Hello,

I am the owner of a brewery manufacturing license and we are applying for our winery manufacturing license. I would like to express my opposition to the regulatory proposal AAC 304.475. The State has not and would not reduce privileges for any other type of license. If 2 Beverage Dispensary License holders had brewpub licenses and both utilized the same brewhouse, the State would not limit their distribution privileges to the license of just 1. They would allow the full distribution privileges for both licensees.

We have already invested time and money into this endeavor with the understanding that a certain set of Statutes were in place. To change them now would be a detriment to our business's ability to responsibly balance our cash flow as our projections were based on certain laws that are currently in place.

We take pride in our servers' abilities to responsibly monitor our patron's level of consumption and would not serve them additional beers (up to 36 oz) if they were not in a safe place to be consuming more alcohol. As such, we do not anticipate serving 36 oz of beer and 36 oz of cider to every patron that comes in. That would most likely result in a situation that is adverse to public health and safety. That being said, it does not make any sense to make special exceptions for manufacturers and place additional limitations that no other license type would ever have to face.

We are looking forward to further engaging with our community and helping other industries grow and thrive including apiaries, farmers, and syrup producers. By arbitrarily introducing limits on the amount of product that we are legally allow to sell to patrons, the State is limiting our ability to help the Alaskan economy grow and limits potential investment in people and equipment.

The Brewer's Guild of Alaska is in favor of maintaining the current interpretation of the law.

Please do not allow language proposed by the former Executive of AMCO, who got fired from her position for putting forth unnecessary regulatory projects, to further hurt Alaskan manufacturers, waste the time of AMCO and the board, and prevent addition investment in the State.

Cheers,

Carey Fristoe

**Subject:** proposed regs for Brew pubs  
**Date:** Wednesday, March 11, 2020 5:41:52 PM

---

Board members of the the AAMCO Board:

I disagree with the proposed new regulations for activities at Brew pubs.

In Kodiak we have one brew pub. The owner is a long time resident and does a lot of positive activities and fundraisers associated with his business that benefits our town, non profits and kids.

Frankly I see no conflict with other dispensers of Alcohol in our town or elsewhere in Alaska.

To me these new regulations are just as onerous as salmon allocation arguments.

I was once a bartender, but have no connection with bars or pubs as I haven't had a drink in over 33 years.

Thanks for doing what you do!

Pat Holmes

**Date:** Thursday, March 12, 2020 4:24:25 PM

---

Dear AMCO Board,

I do not support the regulatory proposal AAC 304.475 to limit multiple manufacturing license holders to limit the number of drinks served to an individual to 3 per day.

You are proposing to limit small businesses who have invested in getting multiple licenses with the understanding of certain rules/limits. If you change these limits you create a very hostile investment climate. An investment in getting multiple licenses should not be associated with a negative outcome. All regulatory agencies should be responsible for maintaining consistent interpretations of the rules. By changing the interpretation of existing statute and regulations you are harming our small businesses of Alaska. There are several manufacturing companies who have been issued and reissued licenses with an understanding of the limits, please do not change this on them.

These tasting rooms create jobs, particularly multiple manufacturers. If you start limiting these businesses, you are stopping the ability for them to have additional year-round positions and benefits.

The proposed changes refer to "overlapping on-premise consumption". If you encourage multiple manufacturer license holders to separate into different tasting rooms, they will no longer be able to accurately identify how much one person has had to drink. With your proposal, a customer can overconsume without servers identifying how much they drank at the other tasting room. A wall separating the tasting rooms will limit the communication between servers. This proposal creates an unsafe environment increasing the likelihood of overconsumption.

It is my understanding there have been no complaints and no violations. Why are you considering a proposal that would be very harmful to Alaskan businesses?

Please listen to all the people that have spoken out against this proposal. Stop this proposal from going any further. AMCO should not be the agency that creates harmful regulations against businesses that they have already issued licenses to and renewed those licenses.

Thank you for your time,

Kristy Mossanen  
Talkeetna, AK. 99676

To Whom It May Concern:

I am a brewery Biochemist at Denali Brewing Company in Talkeetna, AK who occasionally works tending bar in our brewery tasting room. I am opposed to the amendment to AAC 304 restricting multiple manufacturing license holders to serving an individual three drinks a day. Firstly, privileges for other license types are not limited in this way; applying this limit is inconsistent and, frankly, unfair. It also impairs our ability to hire additional employees to keep the company running and growing. Furthermore, the Brewer's Guild of Alaska is in favor of maintaining the current interpretation of the law, and CHARR is not opposed so long as the tasting room sales do not exceed 10% of our product. We are well-established and well-regarded within our community; over our 10 years in business, DBC has received no complaints or violations operating under the current interpretation of the law. Lastly, as a bartender, a primary point of the training I received from CHARR and from DBC is to serve responsibly; this amendment is an unnecessary, onerous limitation to our principled operation.

Thank you for your time.

Via e-mail to [amco.regs@alaska.gov](mailto:amco.regs@alaska.gov)

The Great Northern Brewers Club (GNBC) Board of Directors is writing in opposition to the regulatory proposal to limit multiple manufacturing license holders to limit the number of drinks served to an individual to 3 per day.

GNBC is an Alaska non-profit corporation created in 1995 but with roots back to the early 1980s. Our mission is fourfold:

- To educate people about beer, beer tasting, beer judging, and brewing techniques based on shared knowledge and experience
- To engage in enjoyable social activities focused on homebrewing as a common foundation
- To promote the hobby and enjoyment of homebrewing
- To promote the responsible use of alcoholic beverages

Manufacturers of alcoholic beverages—breweries, cideries, wineries, meaderies, and distilleries—have contributed meaningful growth to Alaska’s manufacturing sector. Outside of natural resources, manufacturing and other value-added industries in Alaska are extremely limited. The growth in alcohol manufacturers is a bright spot in our economy and a clear indicator of strong consumer demand for locally produced craft beverages as well as the positive environment offered in tasting rooms. As homebrewers and supporters of craft beverages, we identify with and support these businesses. This is not only local demand; among the many attractions that bring visitors to our great state are our craft beverage producers and the unique beverages they produce.

The Board’s opposition to the proposed regulation is not about drink limits per type of alcohol—we feel that the existing serving limits for each license type are enough for most folks—but rather about preventing lobbying from bars from influencing AMCO in a manner that negatively affects craft beverage producers. Each regulation passed as a result of lobbying is one more step towards further overregulation of craft breweries at the benefit of the bar industry, which we suspect causes more "health problems" in the community than do craft breweries.

The Board asks AMCO to drop this proposed regulation in favor of supporting the existing laws related to alcohol consumption, including relying on tap room servers to enforce responsible service.

Respectfully submitted,

GNBC Board of Directors

Alaska Cabaret, Hotel,  
Restaurant and Retailers Association

1503 W. 31<sup>st</sup> Avenue, Suite 102  
Anchorage, AK 99503

March 12, 2020

Alcoholic Beverage Control Board  
[amco.regs@alaska.gov](mailto:amco.regs@alaska.gov)

Re: Opposition to Proposed Regulatory Changes Regarding Combined Tasting Rooms

Dear members of the Alcoholic Beverage Control (ABC) Board:

The Alaska Cabaret, Hotel, Restaurant, and Retailers Association (CHARR) – as a representative of Alaska’s alcohol industry as a whole – opposes the regulation project which would add a new section 3 AAC 304.475 regarding overlapping on-premises consumption areas for manufacturing licenses.

As you are aware, there have been substantial efforts to pass an omnibus Title 04 bill through the Alaska Legislature with the intention of clarifying, modernizing, and streamlining existing alcohol laws. The current effort is largely dependent upon the compromise that has been reached between the retail and manufacturing tiers of the industry, which would be uprooted by this current project. I respectfully request that the Board take no action except to close or table this regulation project until after this legislative session, when we will know whether Senate Bill 52 will be adopted.

Thank you for your consideration and interest in continuing to responsibly regulate the industry.

Respectfully,

A handwritten signature in green ink, appearing to read 'Sarah D. Oates', is written over a faint circular watermark or stamp.

Sarah D. Oates  
President & CEO  
Alaska CHARR

**Subject:** AAC 304.475 Comment - Brandon Hill  
**Date:** Tuesday, January 28, 2020 6:48:22 PM

---

My wife and I strongly disagree with the notice AAC 304.475 for limiting tasting room drinks. My wife likes to consume mead and doesn't drink beer or liquor whereas I personally enjoy to have a few beers, and I know more than a few people who only drink spirits. Just because different types of alcohol are served in one location, shouldn't cut back the amount of drinks allowed because different people like different things and all the customers shouldn't lose out because they are served under one roof.

I would strongly ask the board to consider dismissing this notice.

Thanks for your time,

Brandon & Suzi Hill
