Operating Plan Supplemental

Form MJ-05: Marijuana Product Manufacturing Facility

Section 4 – Proposed Marijuana Concentrates and Marijuana Products

Review the requirements under 3 AAC 306.520 - 3 AAC 306.525 and 3 AAC 306.560, and identify how the proposed establishment will meet the listed requirements. Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.

Product Name:	Capsule (RSO or THC/CBD)
Type:	Concentrate, Edible

Product Description: Details must include the color, shape, and texture.	Capsule oil appear as a golden amber to yellow liquid that is transparent by nature. The liquid takes on the shape of the capsule it is placed in and has a thick, oily consistency when opened. Capsules will come in a variety of strains and flavors with differing THC, CBN, THCa, CBDa, 8 THC, CBGa, THCV, CBDV and CBC levels. Used for inhalation.
--	---

Ingredients: This box is not applicable to marijuana concentrates	Cannabis oil (created using a closed loop extraction or distillation method using plant material (flower, leaves, stems, stalks, roots and seeds), glycerin (optional).
---	---

Standard Production Procedure and Detailed Manufacturing Process:	Heat and combine cannabis oil and glycerin (optional) using a homogenizer until fully blended. Load into capsules (food grade, vegetable capsules or comparable), each with a 5mg serving capacity, totaling ten (10) serving, not to exceed 50mg per bottle. Capsules are stored at room temperature and have an estimated expiration date of one (1) year.
--	--

Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.
