Green Go LLC (4a-10959)

Under section 4 of MJ-20 I was unable to certify that we have not had a violation in 2018. I have attached the response that was written in response to the NOV on the next page. Green Go has been battling order issues and has been the root cause of the NOV's we have received.

Frankly, the building is older and has not been as "air tight" as we had anticipated or hoped. We are continuously making modifications to the building by adding air scrubbers and replacing/fixing areas where we believe there could be an issue causing the smell to leak from the building. The whole idea is for us to be proactive and not reactive so we will continue to monitor the smell.

Green Go LLC (4a-10959)

We are writing in response to an NOV that was issued to our facility on 11/13/2017 and again on 1/8/2018 in regards to Odor Control.

First off, we want to apologize for not replying to the notice in November until now. Since we received that NOV in November we have added additional air scrubbers and ionizers to the facility. We have also foamed the building to help alleviate the odor from exiting the facility.

We believed we had the smell situation solved until we received the latest NOV on 1/8/18. We were harvesting that day so the odor being released is the strongest it will be during those harvest times and apparently the smell is still being leaked outside the building. We are adding an additional air filter and ionizer to our front room and have identified smell coming from the smoke stack so we will be rerouting the air to eliminate the issue. Again, we apologize for the delayed response and most importantly for the smell.
