Subject: Changing statutes on delivery

My name is Alicia Fifth one and I have been trying to think of a good buisness model to incorporated doing home deliveries with marajuana. I know currently it is not allowed to do so and was curious what it would take to get it changes so that a person can take in this endeavor if they chose. With all of the regulations on packaging it would be great if we can work in a way to scan packages and make sure deliveries were only allowed private residences the has got to he a way we can scan peoples ID to make sure only legal consumers are being delivered to as well as coming up with a program to keep only a set amount of individual orders to be delivered at them same time (I.e. 1oz per person not more than 1 lb in the car and having vehicles registered with the police department etc). I would love to talk more about the idea with anyone who would allow the discussion so that we may attempt to bring this idea to fruition for consumers. Especially for consumers that needs this medically but pay out of pocket for it. Thanks for reading

Sincerely

Alicia Richmond
