MEMORANDUM

TO: Chair and Members of the Board DATE: December 28, 2021
FROM: Jane P. Sawyer, Regulations RE: Denali Fire Extracts lic. 14619
Specialist

Denali Fire Extracts, a product manufacturing facility in Anchorage, is requesting approval of amendment(s) to two of its products: Denali Fire Distillate, and Denali Fire Rosin. See attached MJ-15, the sections highlighted in green are the changes.

The MJ-15 has been temporarily approved, noting that, until I was writing this memo, I missed the fact that the licensee is also adding a second production step to the rosin, so the temp approval does not mention that.

Alaska Marijuana Control Board Form MJ-15: Operating Plan Change

What is this form?

This operating plan change form is required for all marijuana establishment licensees seeking to change a licensed marijuana establishment's existing operating plan, as required by 3 AAC 306.100. With this form, a licensee may request changes to as much or as little as desired of Form MJ-01 and/or the corresponding operating plan supplemental for the establishment's license type. **The required \$250 change fee may be made by check, cashier's check, or money order.**

Please complete and submit with this form the pages of Form MJ-01 and/or the corresponding operating plan supplemental that contain sections that you are requesting to change. **All fields must be completed of any page for which you are requesting changes** – upon board approval, the submitted pages will replace those currently on file. If your current, approved operating plan is on the original version of the forms, you may be required to complete and submit the new operating plan forms in their entirety.

The form(s) that I am requesting board approval to change is:

- Form MJ-01: Marijuana Establishment Operating Plan
- Form MJ-03: Retail Marijuana Store Operating Plan Supplemental
- Form MJ-04: Marijuana Cultivation Facility Operating Plan Supplemental
- Form MJ-05: Marijuana Product Manufacturing Facility Operating Plan Supplemental
- Form MJ-06: Marijuana Testing Facility Operating Plan Supplemental

This form must be completed and submitted to AMCO's main office prior to changing existing operations. The licensed establishment's operations may not be altered unless and until the director has given temporary approval or the Marijuana Control Board (MCB) has given final approval of the changes. Please note that licensees seeking to change operating plans for multiple licenses must submit a separate completed copy of this form for each license.

Section 1 – Establishment Information

Enter information for the business seeking to be licensed, as identified on the license application.

Licensee:	Denali Fire Brown LLC	MJ License #:	14619		
License Type:	Marijuana Product Manufacturing Facility				
Doing Business As:	Denali Fire Extracts				
Premises Address:	6209 Mike St., Ste. 2B				
City:	Anchorage	State:	Alaska	ZIP:	99518

Form MJ-15: Operating Plan Change

Section 2 – Summary of Changes

Provide a summary of the changes for which you are requesting approval.

Denali Fire Extracts is seeking approval to add a new packaging option for both their distillate and rosin cartridges. Additionally, Denali Fire Extracts is seeking approval to add a second production step for their rosin product.

Section 3 – Declarations

Read each statement below, and then sign your initials in the corresponding box to the right:

Initials

The proposed changes conform to all applicable public health, fire, and safety laws.

[Handwritten initials]

I understand that any temporary approval granted by the director is pending a final decision by the MCB; therefore, any investment I make, based upon temporary approval, is at my own risk.

[Handwritten initials]

As a marijuana establishment licensee, I declare under penalty of unsworn falsification that this form, including all accompanying schedules and statements, is true, correct, and complete.

Director Comments:

Temp. approval of additional packaging for product Denali Fire Distillate, and temp approval of additional packaging and delivery system (vape cartridge) for product Denali Fire Rosin. jps/AMCO

Section 6 – Proposed Marijuana Concentrates and Marijuana Products

Review the requirements under 3 AAC 306.520, 3 AAC 306.525, and 3 AAC 306.560.

Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.

Product Name:	Denali Fire Distillate		
Product Type: Choose one.	Marijuana Concentrate		
Perishable: Yes/No	Yes	Shelf Life: If perishable.	1 (one) Year
Intended Use: Smokable/ edible/topical/wholesale/etc.	Smokable		

Product Description: Details must include the color, shape, and texture.	Distillate is oil extracted from cannabis vegetative matter and then post-processed through short path distillation. Color ranges from transparent to yellow and has a gooey and smooth consistency, similar to honey. The product is sticky and oily in nature, and forms to the container it resides in. Distillate is produced from a variety of strains and ranges of THC/CBD levels. Distillate is used for inhalation and vaping.		
------------------------------------------------------------------------------------	-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	--	--

Ingredients:	N/A - Marijuana Concentrate		
---------------------	-----------------------------	--	--

Standard Production Procedure and Detailed Manufacturing Process:	Distillate is produced by extraction and distillation of the cannabis vegetative material. The vegetative matter is initially processed through a closed loop cold ethanol extractor and the collected concentrate is then post processed and distilled through a short-path Distiller. The distillate can then mixed with food grade flavoring, MCT oil, flavored Alcohols and packaged. Expiration date is one (1) year.		
--------------------------------------------------------------------------	----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	--	--

Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.			
--------------------------------------------------------------------------------------------------------------------------------	--	--	--

Section 7 – Proposed Product Packaging and Sample Labels

Review the requirements under 3 AAC 306.520, 3 AAC 306.565, and 3 AAC 306.570.

Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.

Product Name:	Denali Fire Distillate
Product Type:	Marijuana Concentrate

Packaging Description:
Details must include the color(s), size, packaging materials used, total amount of THC, individual serving sizes (if multiple), and other specifics showing compliance with 3 AAC 306.565. Please include photos, drawings, or graphic representations.

Packaging options consist of non-toxic, opaque, black or white mylar/blister pack with an optional clear front/back to show the product, as well as black tamper-evident, child-resistant company-branded boxes with clear small windows to the show the product. Bags/Packs range from 3"x4" to 4"x5" (not to be repackaged). The designated amount of product will be packaged in a vape cartridge, JUL Pod, or syringe and then placed in the packaging. Cartridges, Pods and Syringes will be plastic or glass and 0.3ml - 1.0ml in size. Total THC per product will range from 40-99%. *To be placed into exit packaging in compliance with 3 AAC 306.345(a)(3) by the retailer*

Sample Labels:
Provide sample labels showing how the labeling requirements set forth in 3 AAC 306.570 will be met.

Section 6 – Proposed Marijuana Concentrates and Marijuana Products

Review the requirements under 3 AAC 306.520, 3 AAC 306.525, and 3 AAC 306.560.

Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.

Product Name:	Denali Fire Rosin		
Product Type: Choose one.	Marijuana Concentrate		
Perishable: Yes/No	Yes	Shelf Life: If perishable.	1 (one) Year
Intended Use: Smokable/ edible/topical/wholesale/etc.	Smokable		

Product Description: Details must include the color, shape, and texture.	Rosin has a gooey and silky consistency and ranges in color from yellow to light brown. Its sticky and oily in nature and can have a hard or soft consistency, depending on the strain. Used for inhalation. It comes in a variety of strains and THC/CBD levels.		
------------------------------------------------------------------------------------	-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	--	--

Ingredients:	N/A - Marijuana Concentrate		
---------------------	-----------------------------	--	--

Standard Production Procedure and Detailed Manufacturing Process:	<p>Rosin is created from dried/cured plant material that undergoes pressure & heat to vaporize volatile liquid terpenes, with an industrial heat press. After pressing, the product is placed in a freezer until cool and solid. Expiration date is one (1) year.</p> <p>The rosin may also be further processed with the use of a vacuum oven under specified conditions to create a rosin product that can be put into cartridges for vaping.</p>		
--------------------------------------------------------------------------	---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	--	--

Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.
